

## GOD PACAL OR MAYAN ASTRONAUT

Now, it is convenient to observe in direction of Palenque, some time ago I explored that marvellous tomb, in truth, Palenque offers magnificent surprises.

We found an entire funerary city around Palenque which is still to be discovered. It is unfortunate that many temples and sepulchres even today are totally covered by the jungle. We were amazed with all of this, we found some marvellous and extraordinary relates from the people of Palenque.

It comes to my memory the unusual case of certain lady from the United States who came to Palenque and that solicited the services of a friend of mine who from many years lives dedicated exclusively to the investigation of the Mayans and of course he could not deny his services. The lady asked him to be her guide, and he did so willingly.

However, here it appear an unusual situation, in the moment when the guide was to enter in the car, she stops him saying: "You are the guide, but you will have to obey me, I will say you in what place of the forest we have to stop." Of course, the man was perplex. "How come she is asking me to be the guide and then it happens that is she the one that has to guide me? So, who guides whom?"

They entered to the car, the lady was accompanied by her husband. In arriving to certain place she orders him to stop: "Here it is." Of course, the guide was amazed, he did not know what was going on, she and her husband get off from the car and asks the guide to do the same, they lack the car and she says: "We will go right forwards through that mountain and then we will find the place."

A lady who has arrived not long ago from the United States acting in that way, was something as to make him feel very confuse because he did not know what was going on. The lady, heading them, made her way to the mountain and suddenly stopped: "Here it is." Afterwards she took off some stones and before the amazement of the guide it appears an human skeleton, a sepulchre.

She said: "Let's go." The guide and her husband followed her. She came back to the car, returned to the town of Palenque, payed the guide and left. It was not known from this lady any more.

I also arrived to the place which is in the middle of the forest. Obviously was the guide the one who leaded me to the place, he said me: "Here, there is a magnetic center. Master, could you say me in what part of this place is located the magnetic center?" I felt telepathically that the magnetic center was located exactly in the sepulchre, hidden among the stones. I said: "Here, there is more magnetic force." Don't exists it in another place? -says the guide- Well, let's take a walk around. I said to him: "Here is the opposite pole of the magnetic center." The guide exclaimed: "You are right Master, here it is." Let's return to the center... He took off the stones and it appeared the skeleton!

Was the when the guide told me about the strange story that I am relating to you.

There are many interesting stories in Palenque that catch the attention; that guide is in contact with the Mayans and it is very interesting that the Mayan people still exist.

For example, an elder was asked: When do you think will come the catastrophe that threaten the world earth? He answered: "In the Katun 13." Will your son see it? Answer: "No, my son will not see it. Answer: "Yes, my grand son will see it." In what year the Katun 13 enters in activity? Answer: "In the year 2.043."

Really, a great catastrophe is awaited and the Mayans are well informed. Somebody whose name I do not mention, a high authority in the field of the mere official anthropology affirmed: "The Mayans did not have astronomical knowledge, they were ignorant." However the fact of the matter is that they know astronomy profoundly.

Even today, they make great mathematical calculations. The Mayans taught to my friend the guide, a system based in seeds of corn and coffee with which is possible to make mathematical operations in thousands of a second.

It appeared a great expert in mathematics, a great professor! My friend said to him: "You can use the computers very well, you are a professor of mathematics, but I challenge you to make a mathematical operation. I will use the Mayan system and you the computer." The man said: "Really, you can know very much but you are been disrespectful."

"Not sir, I am not been disrespectful with you, all I want is to demonstrate you that the Mayans are experts in mathematics and that meanwhile you use a computer to do your calculations, here the same calculations are done much more faster than any computer, and if you want, let's do the experiment."

That professor, full of a tremendous pride, preferred to keep silent and left watching the clock. It was too late, -he said- and left.

Therefore, observe that Mayans are not ignorant as people believe, really the Mayans pass their time doing astronomical calculations. And they know that a world that the men of science already baptised with the name of "Barnard I" is approaching the earth; that world belongs to another solar system, it has a huge orbit and comes dangerously near to the world earth.

When "Barnard I" could be visible at simple sight there will be extraordinary catastrophic events, the Mayans do not ignore this.

Then, as is written in the Katun 13, that gigantic world will attracts by means of magnetic force all the liquid fire to the surface of our earth, the volcanoes will appear everywhere and terrible earthquakes and cataclysms will be provoked. As the Mayans say, this will happen in the Katun 13, in the year 2.043. They are preparing themselves to that event. They say: "My son will not see it, my grand son will see it."

So, they are great wise men. According to their doctrine it is written that: "In the maximum point of approximation of "Barnard I," a revolution of the axis of earth will be produced, the oceans will change their bed and the actual lands will be swallowed by the oceans, this is, a radical change in the entire geological physiognomy of our world.

What amazes is that the Mayans since ancient times judged the actual humanity, they say that in arriving the Katun 13 it would be seen in the streets of the cities of the world "men of two days," that would be the shame of this race.

Searching about the cited men of two days, we realized that they were the homosexuals, that the whole world would be perverted by the homosexuality and lesbianism, something that is been fulfilled today.

The Great Universal Conflagration predicted by Nostradamus is already written in the Katun 13 of Mayans. They say "that the fire will burn like blood everywhere and anything alive will be burned." So, the Mayan do not ignore all of this, what is coming.

Well, I stayed in the sepulchre of the "God Pacal," it was extraordinary. Obviously that sepulchre has a big cover of carved stone. Don Pedro Ferriz, distinguish gentleman dedicated to the investigation in the field of the flying saucers, a man serious in these studies, believes that the plate of stone which covers the sepulchre of the "God Pacal" of Mayans, was an astronaut or traveller of the space.

In that, even though I admire Pedro ferriz, I regret to disagree because I was examining carefully that great gravestone and I could verify by myself and in a direct manner that the "God Pacal" was not an inhabitant of another planet as don Pedro Ferriz believes.

It appears over the stone which weights several tonnes and that covers the sepulchre, a great cross made of corn stems, and this invite us to reflect about the Mayans, Nahuas, Zapotecs, Toltecs, etc.

The corn is sacred, it allegorizes or symbolizes the human seed. For example, in China, India, Japan, etc., the human seed is allegorized or symbolizes by the rice and in the Christian countries of Europe and Middle East, the seed was allegorized or symbolized by the wheat.

The cross made of corn stems, obviously is tremendously significative because we know very well that the cross is an instrument of liberation, not exclusively of martyrdom.

Really, the penetration of the vertical Phallus within the formal Ecstais form the cross. Well, if that cross is made of corm stems, is indicating us something extraordinary; obviously in the Ens Seminis within which is contained the Ens Virtutis of the Fire there exist extraordinary powers.

The Ens Seminis or entity of the semen or sacred sperm of the human being contains formidable transcendental mystic powers that were analyzed carefully by the Mayans in their studies, not only in Palenque but also in Can Cun, Chichen Itza, etc.

If people would know the power which exists in the Ens Seminis, they would never waste those energies torpidly to the brutal satisfaction of the animal passions, rather, they would learn to transmute. The Mayans knew that science, they knew that if the Glass of Hermes was not spilled, that is, if the mistake of ejaculating the Ens Seminis was not made, this one would be transmuted in creative energy.

In this manner the cerebrum is seminized and the semen is cerebrized. As a result of this action in man surges a third force, profoundly divine, I am talking about the sacred fire. When the latter ascends through the spinal column of man it transforms us radically, and it transforms us in true Super Men like the "God Pacal."

We descended the stairs that go to the sepulchre of "God Pacal"; a triangular stone seals the entrance, now that stone is placed besides. The fact that such stone is triangular invites us to think in many triangular stones of the gothic cathedrals of Europe.

That triangular stone would represent to the Christian world: the Father, the Son and the Holy Spirit, that is, the three forces of nature: Holy Affirmation, Holy Denial and Holy Conciliation.

Obviously, without those three forces creation cannot exist, when those three forces flow in different directions, there is no creation; a new cosmic unity surges within the infinite space, when those three forces coincide in a given point.

The same happens with the perfect marriage, man is the positive force, the woman is the negative force and the third force, the Holy Conciliation, conciliates both sides.

The three forces united make a new creation and it comes to the world a new son, a new child. The Mayans comprehended all of this, so it is interesting that the stone that seals the entrance of the "God Pacal" is triangular.

There is a very well made pectoral on the chest of "God Pacal," nine necklaces, those nine necklaces represent the ninth dantesque circle: the well of the universe within the human being, the human well. The creative organs indicate that "God Pacal" was a man who transformed the sacred sperm in creative energy, a completely chaste man, righteous in the most complete sense of the world, a man that never adulterated, that never fornicated.

In his neck there appear three more necklaces which represent the three primary forces of nature and cosmos, this indicates that "God Pacal" could crystallize in his nature the force of the Father, the force of the Son, the force of the Holy Spirit. The Holy Affirmation, the

Holy Denial and the Holy Conciliation, that is, the "God Pacal" could form those three forces within himself.

The "God Pacal" has ten rings in his ten fingers, this indicates us the Ten Sephiroths of the Hebrew Cabbala, a man who filled himself of extraordinary virtues, is a magnificent man, a true Avatar or Messenger for the humanity of that epoch. A man that gave to the Mayans great knowledge.

In his hands there appear a cube, a cubic stone and in the other a sphere. The cubic stone indicates us that this man was wise in such a manner that he possessed the philosophical stone, that is, the stone of the truth, a man who had found the truth. About the other element, the sphere, it indicates us that he was a perfect man, a man who had awakened his consciousness, a man who enjoys infinite wisdom.

However, in all of this there is something that frightens, something that terrifies and scares: It happens that he was buried with six beheaded. It is an aspect merely symbolic.

But the six beheaded are concrete facts, they beheaded six men and buried them with the "God Pacal," of course, to transmit a message to posterity.

However, we have to recognize that the way to transmit such message was very sanguinary, six beheaded men. With that the Mayans wanted to say that this man had eliminated all his defects of psychological type, because when we consult the Hebrew Cabbala we see the six pointed star of King Solomon, six points are masculines and the six entrances between point and point are feminine.

The twelve radiations are decomposed through alchemy in the twelve constellations of the zodiac. Well, the number six indubitably also reminds the lover, the love, the passion, etc., that is, this man eliminated from himself all his passional defects, all the psychic aggregates that caused sorrow to him, he attained the maximum perfection, and the testimony to posterity were the six beheaded.

If one would not know a little bit of Hebrew Cabbala it would be impossible to find the meaning of the six beheaded. The tomb of "God Pacal" is tremendous, he has a mask of jade which has been reconstructed by the Museum of Anthropology, this mask indicates that his face was perfect in such a manner that it had to be hidden from the profanes, the face of a Man-God. Therefore, an entire monument was built to bury that great Avatar or Messenger of the Mayans who was called "Pacal."

"Pacal" was a man who worked with the corn, that is, with the seed. About the plate or cover of stone which covers the tomb of "God Pacal," he seems to be descending from the cross; is then when don Pedro Ferriz thinks this man is driving some artefact capable to travel through the space.

There, it also appears the symbol of the planet Mars to indicate us that "God Pacal" was somehow related with the planet Mars, however, this does not mean that he was an inhabitant or extraterrestrial from Mars, but a man influenced by the martian radiation, a man of energetic personality, a strong man who knew how to teach his doctrine to the Mayans.

So, in investigating all of these Mayans things, all of these anthropological aspects, we must become profoundly reflective.

According to the Mayans, we are in the moments when a great catastrophe is coming, then they say that before that great catastrophe come to the world, there will be wars all over the world, and this is also affirmed by the prophecies of prominent wise men.

We are seeing wars everywhere, for example, the world of the Middle West in these moments is on the verge of a new war; there are calamities, lots of them before the Katun 13.

Let us think that the bottom of the oceans is cracked, for example, in the Pacific there are some cracks so profound that they are already putting in contact the water with the liquid fire of the internal earth, as a consequence or corollary of this, in these moments great pressures and vapours are in formation within the earth.

Those vapours originate tremendous earthquakes and earthquakes at sea here and there.

Obviously, earth is in a great agony, this is known by the scientists. For example, the fish of the immense ocean are becoming extinct because of the contamination and are many the human beings who are becoming sick because of the contamination. The air is contaminated and are many the human beings who are getting sick because of the pollution.

Certain men of science said that if we are unable to correct the pollution, before 40 years at least half of humanity will be dead.

In these moments the lands are becoming sterile, they are already unable to produce all what humanity needs. We must know that over the face of earth there exist four and a half billions of persons and the cultivable lands in these moments are in agony.

The fruits of the land have been adulterated by the know it all, they with their great knowledge undoubtedly have provoked a great deal of damage, they have grafted the plants with other plants and appear fruits that are a pleasure to the sight but that do not possess the same vital powers of the real fruits. It is absurd to try to correct nature, "she knows what she does."

Therefore my dear friends, after have been travelled through the lands of Mayab and to have known what comes to the world (the Katun 13), I have wanted to talk with you

tonight to say you that the Mayans were not a kind of ignorant people and that all the peoples of Mexico were endowed with a terrible wisdom.

INVERENCIAL PEACE

Samael Aun Weor
