NEW THE GAS VANS: a critical investigation by Santiago Alvarez and Pierre Marais NEW

Steve Paul Jobs has died!

1955 — 2011

Rest in Peace

Did Steve JOBS die from S-t-a-r-v-a-t-i-o-n or T-y-p-h-u-s ? The images to the left—[click to enlarge](#)—were taken in August 2011 a few days after Jobs' resignation as CEO of Apple due to "ill health." Jobs was clearly being reduced to skin and bone just as many concentration inmates were before they died at the end of WW2. The simple facts are that in spite of his great wealth and access to the best medical care and nutrition in the world, Jobs seemed to be dying of starvation—and it happened (*shock, horror, awe*) in America! Was some Nazi version of Dr. Frankenstein to blame for all this? Of course, not! The best food passed through his system without leaving much, if anything. If Steve Jobs had removed the top of his pajamas, would Jobs have looked any better than any of the "victims" of Bergen-Belsen or Dachau? Of course, not! The same can be said for thousands upon thousands of terminally ill patients in any major hospital anywhere. The denial of this simple, but extremely unpleasant, fact of life is the key to promoting the most monstrous hoax of all time—the so-called "holocaust." **Holocaust insanity in the USA today** is based on the dirtiest kind of racist hate propaganda:—photos of dead and dying persons found in concentration camps where every informed person knows there were no exterminations, ever, in gas chambers—and where the real mass murderers responsible were the western Allies. Years of total blockade (deliberate mass starvation of Germany and Europe) from the first day of the war, and bombing, and strafing of civilians did have their effects. That is what the pictures in *Atlantic monthly* really show. Shame on America!

Was Steve Jobs a victim of fiendish medical experiments? One would certainly expect him to have undergone many questionable procedures with medications that are far from "proven"—but that does NOT suggest anything "fiendish" at all. It is merely good medical practice in a near hopeless situation. There are millions of cases similar to Jobs' case every year throughout the world. A high proportion of us will look no better than Jobs when we die—from AIDS, or cancer, or any number of slow debilitating diseases. What is extraordinary is that these images of Jobs have become public. Normally, the dying person is tucked away in a hospital until the undertaker takes him to be restored to some kind of normal appearance for public display in a funeral parlor. That is normally the case unless the images can be used to make holocaust propaganda. Some people have no shame at all. Please read the discussion below on this homepage with even more images. That Jobs was alive at all in spite of his obvious deterioration is a tribute to the good care he was receiving. If his care had been of poor quality, he would have died long before his body had been reduced as it was. That simple fact suggests that victims in Belsen and other German concentration camps at the end of WW2 were treated well under the impossible circumstances imposed by the western Allies. If any kinds of "exterminations" had been occurring, those "useless victims" would have been disposed of long before they could have ever looked like Steve Jobs.

To the extreme right, we have an image of [Robin Gibb from the BeeGees who is quite sick](#). Nonetheless, for reasons about which one can only guess, he still appears publicly. Is he another holocaust victim? Why not?

Josef Kramer (the commandant of Bergen-Belsen), **Dr. Fritz Klein** (Belsen's chief medical officer), **Dr. Josef Mengele**, **Rudolf Hoess** (the commandant of Auschwitz) and many, many other Germans were thoroughly decent men and totally innocent of the obscene charges made against them by Allied prosecutors and, of course, the Jews who are still at it to this day. If Allied prosecutors and judges had been serious about finding sadistic, depraved mass murderers—they had only to look at themselves in any mirror. It was the cowardly but victorious western Allies who had brought about the horrible conditions, far from any ground fighting, inside the German concentration camps at the end of WW2. Regarding **Dr. Josef Mengele**, although there has been enormous attention on him including the revelation recently of five thousand pages of his personal correspondence, there is not one shred of any real evidence such as medical records or correspondence that he ever did anything atrocious. The r-e-a-l mass murderers were—and still are—the USA and Britain. Driven, of course, by the Jews who are without any doubt in this author's mind—the greatest liars and racist hatemongers of all. WW3, nuclear and even thermonuclear, to make Israel "secure" and to "prevent another holocaust" (Hillary Clinton) seems inevitable. Herman Cain, the leading Republican presidential candidate at this time, has already announced that he will attack Iran to protect Israel. The "Nazis" were the real heroes of WW2 who, in spite of their defeat, saved the world from total enslavement to communism. They continued their heroic struggle in spite of the overwhelming odds against them and long after the tragic outcome of their heroic struggle was inevitable. The "Nazis" saved us sixty years ago! Who will save us now?

Will Jews ever stop telling their horrendous lies about the Nazis and Germany? Only time will tell! Will America ever apologize for the horrendous crimes it committed during and after WW2 against civilians? Of course, not! This is an extremely sick country and a continuing menace to the entire world as America's newest wars in Iraq and Afghanistan show all too well.

NEW Commentary on Typhus Control in World War II NEW

Tyler Kent — history is repeating itself

Roughly two-thirds of all alleged Nazi gassings were supposedly carried out with carbon monoxide or CO. According to all of the self-described "eyewitnesses" to such crimes, the corpses were "blue" or colorless, or "unremarkable"—but never "red." The world's medical literature tells us that the supposed "eyewitnesses" are ALL liars. The following is just one example from that literature:

"In a-l-l of the fatalities from acute carbon monoxide poisoning in which the victim was found dead at the scene, a conspicuous finding was the characteristic pink or cherry red post-mortem lividity of carboxyhemoglobin in the skin of the dependent portions of the body. These suggillations are readily distinguishable, because of their color, from ordinary post-mortem lividity."

from: [American Journal of Public Health, March 1952, page 262.](#)

Contrary to what people believe, even within revisionist circles, most holocaust gassing victims were murdered with CO (carbon monoxide) supposedly and NOT with cyanide (HCN) or Zyklon-B at all. In Treblinka, Belzec, Chelmon, Maidanek and in the so-called "gas vans" in Russia, the killing agent was always CO, supposedly—perhaps from gasoline engines but perhaps from diesel engines, take your pick. Nearly two million Jews and countless non-Jews (no one really cares how many) were all supposedly murdered in this way. In countless war crimes trial beginning already in Russia in 1943 (Kharkov and Krasnodar) and continuing even to this day (Munich), countless "eyewitnesses" testified under oath about what they supposedly saw—but NONE have ever claimed that the victims were pink or red. There is not even one such example from any of the

www.nazigassings.com

Introduction

There are NO autopsy reports of Nazi gassing victims. There are NO autopsy reports that show even one body found anywhere was of someone killed with poison gas by the Nazis or Germans. Many thousands of bodies were found in German concentration camps by the end of the war, (they clearly had NOT all gone up in smoke at all) and at least a thousand were autopsied—but, none of the autopsies indicated poisoning by any substance. This simple fact should already undermine anyone's belief that the "holocaust" story is supported by "overwhelming evidence." Please see the discussion, column left, of Dr. Charles P. Larson's forensic medical examinations in Dachau and elsewhere. The British at Belsen seemed to have recognized early on (based on their own autopsies?) that there had been no gassings there either but, nonetheless, made the gassing charges central in their famous **Belsen Trial (Sept. 17—Oct 16, 1945)**. See also [The Belsen Trial](#) in pdf format which allows any reader to jump to keywords in the text such as "gas." for example. Those gassing claims pertained, however, entirely to what had supposedly occurred in Auschwitz to which British judges, prosecutors and staff were denied access by the Soviets until many years later. The gassing claims and even the descriptions of Auschwitz are based entirely on the "testimony" of self-described "witnesses" and NOT on any incriminating documents or physical evidence. It is as if people had been tried and executed for witchcraft hundreds of years ago—in a remote foreign country to which even the inquisitors had no access..

There are NO German documents identifying any gassing victims. The belief that the gassing claims are supported by German documents is pure myth. There are NO German documents describing any gassings, anywhere. The German documents that are most frequently used, for example of Zyklon-B disinfection gas chambers and crematoria, are in fact evidence of structures and equipment designed and used to keep people alive—in other words, for precisely the opposite purpose from what is alleged.

Claims about how the Nazi gas chambers functioned are wild speculation. The alleged gas chambers bear absolutely NO resemblance to real, known gas chambers such as those widely used in the USA for the execution of criminals where it still takes as long as 18 minutes to kill a single prisoner as opposed to the fictitious Nazi gas chambers where thousands were supposedly murdered in as few as three minutes. What is more important, they could not possibly have worked in anything like the manner alleged in any of the holocaust-related war crimes trials. Gassing someone to death, even one person, is a complicated messy process that takes as long as eighteen minutes in the USA.

There are NO photographs of corpses of Nazi gassing victims. What really makes the hoax work are the pictures of countless sick and dead in the camps at the end of the war—none of which are of people killed in gas chambers. The people who show those pictures know perfectly well they are of people who died of other causes such as typhus—but use them for their powerful psychological effect to precondition their audience for the gassing and mass extermination pitch which inevitably follows. The pictures are irrelevant except for their shock value. Pictures of countless healthy prisoners in the same camps are generally not shown for reasons that are all too obvious. This misuse of photographs is rather widespread and illustrates the collective eagerness of many people (the "hoaxers"), especially in the American media, to throw whatever they can find against the Nazis, SS and Germans generally.

Americans are not used to seeing what death really looks like even when it occurs around them every day. Only rarely will the hoax promoters make the mistake of actually alleging that they have a picture of someone killed in a gas chamber. They know better but misuse the pictures anyway—because they have nothing better. The pictures cover up the fact that the "evidence" for gassings and mass extermination is minuscule. This deliberate misuse of pictures already shows the sinister and widespread hookery which makes the hoax so successful. Who even reads courtroom testimony of self-described "eyewitnesses"? Who even reads the writings of Elie Wiesel? It is the pictures that grab the hearts and minds. For most people when they see the pictures, what else matters? The accused are guilty, guilty, guilty! By contrast, pictures of the vastly greater numbers of Germans or other Axis civilians murdered by Allied terror-bombing raids or from disease or starvation (also caused by the Allies) are almost impossible to find. Why? Why bother? The goal is not understanding or historical truth. The goal is fanatical belief in the new religion, even by children—with no tolerance for those who dare to disbelieve or even question.

The really "incriminating" evidence consists entirely of "eyewitness accounts" (lies) and "confessions" (lies extracted under torture) and a few documents which provide nothing more than food for wild speculations.

The fascination with crematoria in German concentration camps merely shows how incredibly desperate the hoax promoters are to find anything that looks remotely like "evidence." The Kremas used normal crematoria ovens designed to only cremate one body at a time consistent with cremation practice throughout the world. The insistence that there was anything sinister about those crematoria is sheer stupidity. Their use helped keep people alive! For simple mass disposal of corpses, cremation makes no sense at all. For that, incineration with co-mingling of the ash of many corpses is far more logical, and efficient, and faster. The Germans had large incinerators for garbage, in some cases in the very same buildings where crematory ovens were also used—but NEVER allegedly used those garbage incinerators to dispose of any corpses.

The words "pure evil" are frequently used to describe the Nazis, and Hitler, and the SS, and even Germans of that era. I suggest that people who do that look at themselves in the mirror. Even if the "holocaust" were true, the mass atrocities committed by the US and Britain were far worse and far more cowardly than anything the Nazis are even accused of. The US and Britain murdered as many people as they possibly could by deliberately r-o-a-s-t-i-n-g them to death with massive incendiary air attacks ("strategic bombing"), then with napalm, and even with nuclear bombs. The intensity of those horrors grew as the dangers to the US and Britain diminished to nothing at all. If the Nazis had murdered people with poison gas, that would have been humane by comparison. There is no doubt in this writer's mind that one motive for the holocaust hoax is to rationalize the far more heinous and shameful crimes of the US and Britain. Perhaps the real monsters of WW2 have a conscience, if only an extremely primitive one. When the victors were no longer able to simply murder Germans or "Japs" after the war had ended—they were still able to lie about the Germans and that continues to this day. Who is to stop them? The Jews, of course, are also driven by boundless greed as well as a need to rationalize their racist state of Israel.

The Total Number of Jews Gassed by the Nazis is: ZERO!

The grand total number of Jews, Poles, Gypsies and others killed in Nazi gas chambers is ZERO! There was a kind of "holocaust" in German concentration camps, especially in the last months of the war, from disease and starvation. However, the culprits responsible for those horrors were the Allies, especially the US and Britain, using blockade, bombing and strafing of civilians—and NOT the Nazis at all. The Nazis had been trying to keep their concentration camp inmates alive and healthy as best they could under impossible circumstances. If the Nazis had merely wanted to exterminate prisoners, there would have been no need for concentration camps to begin with. The real mass murderers were the Americans and Brits. The "Greatest Generation" was, and still is, the worst generation ever, anywhere, in all of human history. Even though the USA was far removed from the actual conflict and never in any real danger, it gratuitously chose to employ mass murder by incineration of civilians as its key strategy for victory. The USA, and Britain deliberately raised women, children and babies to death—as many as they possibly could. There were well over a

testimony or in any of the countless books on the subject.

The CO gassing stories are clearly a monumental LIE! The "holocaust" hoaxers blundered about the most basic and most easily recognized feature of any CO gassing victim: the dramatic and "conspicuous" color of the corpse. There are many other essays from the medical literature that have essentially the same message about CO fatalities (elsewhere on this homepage) but the above paragraph from New York City may be the clearest and most dramatic of all. Jews as a people and holocaust promoters in general owe the German people the most profound apologies and lots of money. American support for Israel and America's eagerness to "prevent another Holocaust" (Hillary Clinton) should be thoroughly reconsidered before America's current Middle East wars become nuclear or even thermo-nuclear.

*So, where did all those dead RED Jews go?
Did they turn white?
Did they turn blue?
Did they turn to vaporware?
No--oh No! They were never there!*

NEW ["Skin discoloration caused by carbon monoxide poisoning – Reality vs. Holocaust eye-witness testimony" by Thomas Kues](#) **NEW**

from: [D.A.L. Bowen "Medical Investigations in Cases of Sudden Death," British Medical Journal, 1 April 1967, page 35:](#)

"Poisoning

The possibility of poisoning must be considered when apparently healthy persons are found dead at home without signs of injury. Carbon monoxide poisoning may be diagnosed easily, because its inhalation in lethal quantities produces a characteristic **cherry red coloration in the areas of hypostasis. A similar reddish hue is seen in cases of cyanide poisoning."**

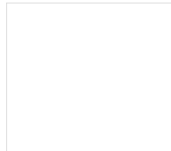

Although nearly two million Jews were supposedly murdered by the Nazis with carbon monoxide, ALL of the "eyewitnesses" on whom this allegation is entirely based failed to ever mention any RED coloring of even one of the victims. Wouldn't those huge piles of naked RED Jewish corpses have been rather sensational? Perhaps the "eyewitnesses" all lied--and the accused Nazis are totally innocent! Since there is absolutely NO physical evidence of such alleged gassings either, or documentary evidence--the logical conclusion is inescapable--: the CO gassing claims must simply be an extremely dirty HOAX! Nothing about those gassing stories is credible!

from: ["Poisonous Gases in Submarines," The British Medical Journal, May 1, 1915, page 769.](#)

"The symptoms of poisoning by CO in most cases may be said to be quite sudden unconsciousness without any preliminary manifestations, because, as a rule, the victim is suddenly exposed to a somewhat concentrated gas; the chief point about this unconsciousness is that the victim retains an exceptionally bright colour, due to the fact that COHb has a bright cherry-red tint, which, when seen through the skin, merely strikes the observer as a high colour. Unless aid is speedily rendered, this unconsciousness is very rapidly followed by death--so rapidly, indeed, that sudden unconsciousness and death constitute practically the whole picture. The records of cases of more gradual poisoning come chiefly from explorers in coal mines after an explosion who have met with the gas as the principal part of "after-damp." In these cases the symptoms described are those mainly of buzzing in the head and throbbing in the neck, coupled with the very important symptom of great muscular weakness (preventing or hindering escape), mental activity with confusion, and difficulty of connected attention. This stage may last, perhaps, a few minutes, during which the weakness increases, and then, if nothing is done, insensibility supervenes as in the sudden cases. In the air that is being respired a percentage of 0.17 is highly dangerous, and of 1 almost inevitably fatal.

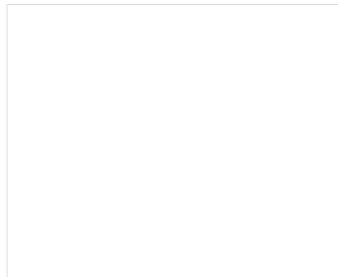

The essential treatment is removal to fresh air (this at times seems for a moment to increase the symptoms), where artificial respiration should be performed. Strychnine hypodermically, or oxygen inhalations with a mask, should be tried in addition; the trouble is that COHb is a very stable compound dissociated with difficulty."

The victim described above in the highlighted text is still alive but unconscious and has a "bright colour"--but still not cherry red.

NEWEST Holocaust Survivors who Tell the Truth **NEWEST**

NEW [LBJ killed JFK according to Jackie and Madeleine Duncan Brown.](#) The linked essay presents stunning evidence--some old, some new--regarding a pivotal moment in modern history. The official version of events, that Lee Harvey Oswald had acted alone, was an elaborate hoax with its own coverup conspirators including Chief Justice Earl Warren and many of America's most prominent citizens. That such a hoax succeeded as long as it did should open the minds of readers to that other, even greater hoax which is the focus of this website: the Holocaust HOAX.

The JFK assassination conspirators had gathered at the home of Clint Murchison the night before the assassination and included many of the wealthiest and most powerful people, not just in Texas, but in the US generally--including J. Edgar Hoover and Richard Nixon. JFK's murder the next day allowed LBJ and the US military to greatly expand the Vietnam War which JFK had been wisely trying to shut-down. The JFK assassination also allowed the Israelis to blackmail the US prior to and during Israel's 1967 war of aggression--the so-called: **"Six Day War"**--in which Israel acquired the Sinai desert, the West Bank territory and east Jerusalem as well as the Golan Heights of Syria. Those conquered territories except for Sinai are still the basis of the most dangerous military confrontations on the planet--that may well bring about a nuclear world war. LBJ's fear of the Israelis and their information about his role in the assassination, no doubt, allowed Israel to also **attack the USS Liberty during that war on June 8, 1967 and murder 34 Americans with impunity**. The USS Liberty had somehow failed to get the memo to stay clear and let the Israelis do whatever they wanted which included murdering countless Egyptian POW's in the Sinai. The Israeli attack on the Liberty was NO accident. The assassination of Bobby Kennedy in June, 1968--supposedly by a Palestinian, of all people--and Martin Luther King also in 1968 occurred within one year of the attack on the USS Liberty. Ted Kennedy was not assassinated but merely marginalized by the Chappaquiddick incident.

Cord Meyer was a Jewish CIA agent, and probably the real "Deep Throat" who destroyed Nixon and admitted his role prior to his death in 2001. The Cord Meyer family had grown rich developing the so-called "Cord Meyer" section of Forest Hills in Queens, New York. Many of the eventual residents were Russian refugee Jews and the area became especially valuable because of the very rich Jews who filled the area with well-kept mansions. Cord Meyer seemed to have had a deep and legitimate grudge against JFK for Kennedy's affair with Meyer's wife, and that was why LBJ confided to him also on the day before the assassination. Whether Cord Meyer was actually part of the plot is far from certain--but obviously, Meyer knew about it. Was he at the home of Clint Murchison the day before the assassination? LBJ had probably been gleefully shooting off his

million victims of these cowardly and horrific crimes. If Americans ever want to "hunt down" real mass murderers and war criminals, they need only look at themselves in the mirror.

Holocaust-belief is a kind of modern superstition, not unlike superstition in the Middle Ages when Jews were sometimes blamed for plague and severely persecuted. But today, it is the Jews who are blaming and persecuting gentiles, especially Germans, for the many deaths from disease at the end of an horrific war which they themselves had done so much to bring about. They were screaming for war against Germany already in March of 1933, in huge demonstrations on the streets of New York and elsewhere. They were continuously agitating for war against Germany until their wishes actually came true in September of 1939. The horrible deaths from disease in German concentration camps were a direct result of the cowardly air attacks on German civilians which Jews themselves had encouraged. The German people are routinely portrayed as having been morally defective somehow and, therefore, worthy of mass murder. In the process of murdering German civilians, many Jews died also--how ironic! Holocaust-believers totally ignore the deep involvement of Jews with the communist revolutions and the horrors which necessarily followed in order to try to make those revolutions work. Anti-Semitism was a natural and entirely reasonable response to the Jewish role in extreme leftist causes, including Soviet style communism where mass murder of any and all opposition was accepted as entirely normal to advance the "glorious" revolution. If Jews or any other ethnic group were as closely connected to Al Qaeda and the horror of 9/11, most people would understand perfectly. The horrors of communism already in the 1920's were far worse.

For all their cheering about "democracy" and "freedom," the "real Nazis" were, and still are, the Americans. The "real terrorists" were, and still are, the Americans. The ultimate racist fiends and genocidal maniacs were, and still are the Americans. Next in line are the Israelis and Jews generally. If Americans and/or Jews wish to see or confront "pure evil," they can spare themselves the airfare to faraway places like Germany, Iraq or Afghanistan and simply look at themselves and their own history.

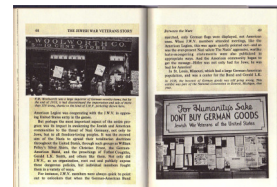

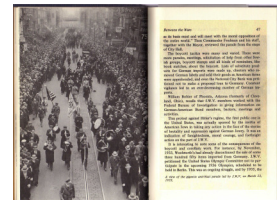

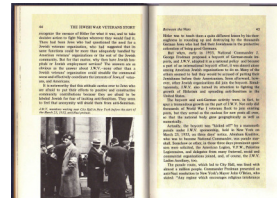

A recent book by Judge Andrew P. Napolitano entitled: ***Lies the Government Told You*** (2010) reveals many of the dirty secrets that Americans deny about themselves. From its earliest days when George Washington mutilated his own slaves until now when even the Obama administration tortures prisoners, America's true history is so foul that it has no moral standing to lecture anyone about human rights--or anything else. As to evidence for the genocidal depravity of Jews, one should simply read the ***Old Testament***. Samuel I. Cohen, the inventor of the neutron bomb, **"stated that his only regret...was that the bomb hadn't been ready in time to be dropped on Germany. This was a feeling shared by many Jewish scientists, Cohen wrote."** Although Germany was spared the nuclear nightmare, what the western Allies actually did to Germany was bad enough. The following is from Cohen's book: ***F*** You, Mr. President***, page 31:

This was particularly true for most Jewish scientists, and there were a lot of them, including Oppenheimer. Many of them were refugees from Hitler, whose friends and relatives had suffered hideously at his hands, and who harbored precious little affection for the Nazis. They had a vindictive and even barbaric compulsion to complete the project in time to bomb Germany. Of course, this never happened and when we finally had a couple of bombs to drop, Germany had surrendered.

Trying to throw a little logic into this emotionally supercharged equation, I might say that even if we had finished in time to drop a couple of bombs on Germany, it's far from clear it would have made any real difference on the outcome of the war. By this time, the allied bombing and shelling of German cities had reduced most of the country to rubble and it was just a matter of time, a very short time, before the Nazis would have given up. It had become clear to practically everyone but Hitler that the jig was up. Most Germans were in no mood to fight to the bitter end, as many were predicting the Japanese would do. So what might have happened if the atomic bombs that burst over Hiroshima and Nagasaki, had landed on Zilchburg and Hinkledorf? I'd say: What happened.

Undoubtedly nuclear bombing Germany would have made many scientists at Los Alamos, especially the Jews, including myself, deliriously happy....

From the moment Hitler became chancellor of Germany in 1933 six years before WW2 started, intense Jewish agitation against Germany became well known to everyone. Such activities included boycotting of ALL German goods to the United States. The following images are from **The Jewish War Veterans Story** by Gloria R. Moeseson (1971) but there are many more stories if one examines the pre-war literature in America. [Click images below to enlarge](#)

- Organized Jewry fired the first shot already in March 1933 in the war against Germany.
- The Germans in 1933 were behaving reasonably by defending themselves from the enemy within by introducing anti-Jewish legislation.
- The Jews are unashamed, congenital liars. There was no plan to exterminate them.
- When the fighting war began, the Germans were perfectly within their rights to protect themselves by placing Jews in concentration camps.
- Jewish scheming led to WWII. Jews should be very grateful the Germans treated them so humanely during the period 1933-1945.

The Anglo-American Holocaust in Belsen and Dachau

The real truth about the "holocaust" is far more than Americans can bear. They will not be able to handle it because it is they, the Americans and Brits, who are the chief culprits--the real "holocaust perpetrators."

Those horrible photographs of Belsen and Dachau and other German concentration camps from the last two months of the war are enormously important. They are the real basis, the "undeniable

mouth to lots of people about what he expected would happen the next day in Dallas. In any event, Meyer knew about the conspiracy and who the real man behind everything was, LBJ, and probably passed it to the Israelis who would have used it just a few years later to be sure of American neutrality for their 1967 war of aggression against Egypt, Syria and Jordan. A few years earlier, in 1956 when the Israelis had also invaded Egypt together with Britain and France—Eisenhower had told them all to get the hell out of Egypt which they did, reluctantly of course. For the 1967 war, the Israelis needed American acquiescence and more. They also needed LBJ to cover up the Israeli attack on the USS Liberty which has to be one of the most amazing betrayals since Benedict Arnold. The Israelis had the goods on LBJ to be certain of his compliance. How deep had Secretary of Defense McNamara been involved as well? Even if the Israelis did not have enough to prove LBJ's guilt, they had enough to destroy him politically in America. LBJ declined a second term, in any event. If LBJ had sent aircraft to fire back at the Israelis, they would have contacted him to JFK's murder just as years later, they hamstring President Clinton with what they knew about Monica Lewinsky. Barack Obama must beware of the people around him

NEW

[Auschwitz: The Comedy \(YouTube video\)](#)

[NEW BLOG The Third Craft NEW BLOG](#)

[Rupert Murdoch's Deeply Hidden Jewish Roots](#) from [an essay by Christopher Bollyn](#)

Murdoch "*became an American citizen for business reasons*," according to Richard H. Curtiss, editor of the [Washington Report on Middle East Affairs](#). Keith Rupert was born in Melbourne, Australia, on March 11, 1931. "*Rupert's father, Sir Keith Murdoch, was a newspaper publisher, and his mother an Orthodox Jew*," Curtiss wrote, "*although Murdoch never offers that information in his biographies*."

Murdoch's father married Elisabeth Joy Greene, daughter of Rupert Greene in 1928. They had one son, Keith Rupert and three daughters. Later in life, Keith Rupert chose to use "Rupert," the first name of his Jewish maternal grandfather.

The young Keith Rupert was educated at Australia's fashionable Geelong private school, and went on to the elitist and aristocratic Oxford University in England, according to [Candour](#) (UK) magazine.

"*Rupert's father Sir Keith Murdoch attained his prominent position in Australian society through a fortuitous marriage to the daughter of a wealthy Jewish family, née Elisabeth Joy Greene. Through his wife's connections, Keith Murdoch was subsequently promoted from reporter to chairman of the British-owned newspaper where he worked. There was enough money to buy himself a knighthood of the British realm, two newspapers in Adelaide, South Australia, and a radio station in a faraway mining town*," [Candour](#) wrote in 1984. "*For some reason, Murdoch has always tried to hide the fact that his pious mother brought him up as a Jew*."

While Murdoch may have "*tried to hide*" his Jewish roots, he has been quite forthright about his support for extreme right-wing Zionists, such as Benjamin Netanyahu and Ariel Sharon.

Commentary by this webmaster: The Murdoch empire includes *Fox News* (nominally conservative) and the *Wall Street Journal*. But Ron Paul, for example, with his isolationist views regarding America's criminal wars in the Middle East will never get a fair shake there even though he is extremely popular, and brilliant, and as politically conservative as almost anyone. But, Ron Paul is NOT "neo-conservative" which is really just a synonym for Zionist. In several revealing [videos](#), the [British actor Hugh Grant](#) courageously discusses the deep incestuous ties between the British government, the tabloid press and the British police. Can anyone seriously believe that the British press during World War 2 was any less corrupt than it is today? It seems all too clear that the Allied press was motivated by the basest kinds of sensational, fraudulent journalism—then, just as today. Microphone monitoring of German prisoners in their cells was common. The absurd charges made during the Belsen Trial, for example, all served their interests extremely well.

[Zelda GORDON: the Irene Zisblatt of Treblinka](#)

In the above video, [Zelda GORDON](#) (6 mins to 12 mins into the video) describes how she backed out of the Treblinka Gas Chamber ...

"I can say that a quarter of those people in that synagogue just dropped dead. . . . It took seconds for people to disappear."

It is another fantastic tale, reminiscent of Irene Zisblatt's pack of lies about Auschwitz and her five precious diamonds being ingested and expelled many times over for several years. But Zelda's tale has some important truth in it nonetheless. Obviously, all of the Jews and Jewesses that went to Treblinka were NOT killed at all. At least 100 Jews according to Zelda's own account re-boarded a train and went on to other camps. Some even went on to live very comfortable lives into the 1990's in charming places like Beverly Hills, California. Those dirty Jewish "holocaust historians" have been caught lying again. Will the Jews ever give back all of the money?

This video and many others like it, prove that Treblinka was indeed a "transit camp" as revisionists have always claimed and NOT an extermination camp. Many people, including Jews, arrived from various places, and after a brief stay—which included a shower, a medical exam, a change into clean lice-free clothes, and a meal—departed for other places such as Lublin and Maidanek to the south where they worked like normal people usually do, even during wartime. The holocaust hoaxers are proven completely wrong, once again. If the Nazi motive had been to simply kill or torture the Jews, such train stops as at Treblinka and other Aktion Reinhardt camps would have been pointless; those evil Nazis could have simply by-passed the transit camps, and let the Jews suffer and die on the trains—no pit stops, or rest stops—as they continued on their long journeys to the east, or wherever. Clearly, the purpose of Treblinka was to help keep Jews alive and healthy. Zelda has, of course, embellished her tale with the most sinister accusations against the Germans and yet, her story contains much which seems true and believable and thoroughly undermines the holocaust hoax in general. Thank you Steven Spielberg for making a permanent video record of Zelda GORDON's story.

Is a major motion picture likely—perhaps with Angelina Jolie playing the role of Zelda to help teach everyone in the world about those horrific AR camps? Will Steven Spielberg ever tell the truth about anything?

[Download Video as MP4](#)

"evidence" for the "holocaust" as far as nearly everyone is concerned. By contrast, the "evidence" from war crimes trials and the arguments of scholars, even revisionists, are largely unknown and even incomprehensible to nearly everyone. But, instead of showing how horrible war truly is in general, the images are grossly misused to condemn the very people, the Germans in general and the SS and Nazis in particular, who had gone to enormous lengths to prevent such horrors. The real mass murderers were the Americans and Brits.

When historians and journalists insist that the scenes from Belsen and Dachau are aberrations from a more acceptable kind of the warfare, they are the greatest liars. They are simply massaging the egos of their depraved patrons, the victors of World War 2. Those misused scenes show essentially the same horrors that abound in nearly every war going back to sieged warfare from our earliest human history. For WW2, the horrible scenes in Belsen and Dachau were the direct result of the cowardly blockade beginning the moment Britain declared war on Germany and the deliberate bombing of civilians (begun by the British on May 11, 1940) and the strafing of civilian targets throughout most of the war. Even Germany's water supply had been poorly bombed by the British in 1943—the Dambusters Raid [The horrors that the US and Britain inflicted upon civilians would have been bad enough if WW2 had been the end. But such horrors continued—even with the deliberate roasting to death of more than a million totally innocent women, children and babies as in Korea and Vietnam. In Iraq, the US sanctions strategy may have killed half-a-million children which Madeline Albright assured Americans was OK on "60 minutes." Israeli sanctions against the people of Gaza are essentially backed and funded by the US. And there is no end in sight. If Americans or Brits want to hunt down and punish real perpetrators, real "killers," real mass murderers—they need only look at themselves in the mirror and then hang themselves from the nearest tree.](http://webcache.googleusercontent.com/search?q=cachewjg2fuhMbpCj&news.bbc.co.uk/onthisday/hi/dates/stories/may/17/newsid_3623000/3623223.stm-Germany+&--with obvious consequences; it was biological warfare. Eventually, with America's involvement and overwhelming air power, those clever strategies achieved the horrible results that one could see throughout Germany. The immediate cause of death for the vast majority of genuine victims in German concentration camps was disease, especially the kinds of disease that waste the entire human body (typhus, typhoid, tuberculosis, diarrhea, dysentery)—and the Anglo-Americans knew that perfectly well since they had studied and ruthlessly employed that same strategy many times in the past, even in the period after the 1918 Armistice to force Germany to sign the Versailles Treaty six months later against its will after 500,000 German civilians had died from disease and starvation from the blockade. But after WW2, rather than admit that they had inadvertently also killed thousands of Jews with their cowardly strategy, the embarrassed Americans and Brits blamed the Germans instead. They had, after all, won the war and could get away with anything.</p></div><div data-bbox=)

[The Nazi's Kept the Jews A-L-I-V-E !](#)

On YouTube there is a fascinating new video which is drawing some interest—including comments from me:

<http://www.youtube.com/user/AliceTheFilm>

Take a look, not just for the story of 106-year-old Alice Sommer but also for the revealing footage of life in Theresienstadt. If that was all staged by the Nazis, then they deserve some Oscars for "direction." Two other Czech Jewesses, not quite as old, also appear in this video. They ALL "survived!"

It is time to say "THANK YOU" to the Nazis! Obviously, Alice Sommer's wartime ordeals, whatever they were, had no adverse effect on her longevity. Obviously, the Nazis took very good care of her as well as all of the others. That is the real lesson of this story. The Nazis did NOT exterminate them. Alice Sommers is clear evidence that the "holocaust" story really is a monstrous Jewish hoax for which ALL Jews should apologize. Jews have nothing to cry or whine about—and they should give back all the money they swindled out of the German people, their victims.

The Nazis kept the Jews alive! Alice Sommer and the other Jews in this video could have been killed so easily. Did they "survive" because of their religion, or music, or because of some inner strength? Of course, no! They ALL "survived": because the Nazis protected them and kept them alive just as they kept most of the Jews alive. The so-called "survivors"—and there were 1,092,000 of them still alive in 2003 according to Dr. [Sergio DellaPergola](#)—are all evidence that the "Holocaust" really is a monstrous Jewish hoax. The real killers of most of the Jews who did die on German-occupied territory were the Allies, especially the British and Americans, who strafed and bombed refugees and evacuees and civilians generally throughout the last months of the war—and disease, especially typhus, brought on largely because of the failure of the Germans to hold on to places like Auschwitz.

Auschwitz served the exact same purpose as Ellis Island in NY harbor: to keep disease out of the country with medical exams, forced bathing, quarantine, gas chambers and crematoria just as in Auschwitz. When the Germans evacuated Auschwitz and abandoned it to the advancing Russians in mid-January 1945, the dam broke (the Cordon Sanitaire) and disease, especially typhus, entered Germany with a vengeance that had not been seen since the Third Years War.

The Germans still tried to confine the medical disaster to the concentration camps with horrible results that made excellent visual propaganda for the true genocidal maniacs: the Allied victors of WW2—and especially the Jews. If the Germans had not tried to confine the typhus outbreak to concentration camps such as Dachau and Bergen-Belsen, the consequences would have been even worse just as the victors discovered quickly enough for themselves. The death rate at Bergen-Belsen actually increased after the British took over the camp and quickly spread beyond the camp until the British re-imposed tight security on all of the camp inmates.

The real reason Alice Sommer and the others "survived" is that the Nazis never tried to kill her, or any of the others, in the first place. That should be rather obvious. She NEVER was under any kind of "gallows." Instead, the Nazis kept her alive, fed her, provided her with housing, medical care and safety as best they could while millions of people around her, including millions of Germans who were and still are the real victims of videos like this one, were being killed and even buried alive in the war that Jews had done so much to bring about. Alice's "story" is essentially a Big LIE! When the Nazis tried to expel her and others like her from the new, saner Europe that they tried to build, they certainly had the right idea.

Holocaust propaganda, regardless of its historical merit, is used to justify the real atrocities and mass murders by the victors of WW2 which were far more horrific than anything the Germans or Japanese supposedly committed. But, from the prevailing American point of view, those horrors—especially the mass incinerations of women, children and babies—were merely unfortunate but morally necessary measures to achieve "peace" with democracy and freedom. America consistently externalizes its own problems. All the moral problems for which America went to war against Japan and Germany were rampant in the USA—and still are. If America and its allies could recognize that the holocaust story is indeed a monstrous Jewish hoax, then perhaps America and the world could also avoid the heading stampede to bigger wars and, ultimately, obliteration in a thermo-nuclear world war, the ultimate final solution..

Many tens of thousands of Jews were indeed victims of an "extermination program" from the air during WW2—but, Jews were not the target, they were merely some of what is now called "collateral damage." All of the treks west by millions of civilians to escape the Russians were potential "death marches." The real targets and the real victims of an extermination program were the Germans. So long as the women and children murdered by American "heroes" like Chuck Yeager were merely Germans—no need to apologize afterward. But, when many of them were Jews, that had to be explained differently even if just to avoid lawsuits for generations to come. Hey, why not blame the Germans? What America actually did during WW2 was truly monstrous—but that such a country, even sixty years after the war, continues to strut on the world stage as a symbol of righteousness is beyond insane. Don't these folks have any conscience at all? America in WW2 committed the most despicable and cowardly rampage of mass murder in all of human history. If there were a God who gave a damn about punishing evil-doers, he would surely destroy America from sea to shining sea with flamethrowers. Americans should pray there is no God.

The holocaust story is a monstrous hoax for four important reasons: 1) no one was ever killed in gas chambers by the Nazis, 2) the numbers of Jews who died in German-occupied Europe is minuscule compared to what is alleged, 3) forensic medical or scientific evidence to support the holocaust gassing claims is non-existent, and 4) Jews were rather well-treated by the Nazis compared with other minorities such as blacks, Hispanics or American Indians in the USA—or non-whites by the British Empire, or Palestinians by Israel. In general, Jews as a group, or as a people, or as a race (take your pick) have no reason to complain about their treatment by Nazi

In the above video, Maj. Gen. Lev Sotkov ignores the all-important fact that the [Molotov–Ribbentrop pact of August 23, 1939](#) did NOT necessarily mean war at all, not even in its secret additional protocol. After the pact was signed, there was still time (at least seven days) for Poland to come to its senses and negotiate with Hitler regarding Danzig. Danzig was the real tinderbox, a so-called “free state” under international protection, but whose citizens wanted by an overwhelming majority (96%) to be reunited with Germany. Poland was, however, obsessed with the obscene illusion that Poland had a divine moral right to incorporate Danzig and even much more German territory into Poland, even if that meant going completely against the will of the effected peoples. The Molotov–Ribbentrop pact was a desperate attempt by Hitler to undermine the efforts of Britain, France, the USA, Poland and even the Soviet Union made over many months in the spring and summer of 1939 to strangle Germany without war and crush Germany militarily in the event of war. Everyone knew that was the trap being set for Germany. Hitler’s negotiations to escape the trap were brilliant and entirely admirable.

The problem was that Poland, foolishly, still wanted war even after the Molotov–Ribbentrop pact was announced, even after the first day’s fighting showed that Poland was totally outclassed militarily, and even after Hitler offered to pull all German troops out of Poland and pay reparations to Poland for the damages caused by the German invasion—if Poland would negotiate the return of Danzig with England as mediator with a road through the corridor. The incredibly generous terms Hitler offered Poland are spelled out in *Adolf Hitler* by John Toland (1976), page 573 and in *Origins of the Second World War* by A. J. P. Taylor (1962). The real culprits were the Poles who remained convinced, in large part because of US Ambassador William Bullitt and the anti-German lunatics (many of whom were Jews) in the USA, that war would bring Poland some great victory. The Poles did ultimately win but the price was staggering. Read also [“Was Stalin to blame?”](#) by Tom Segev in Haaretz.com.

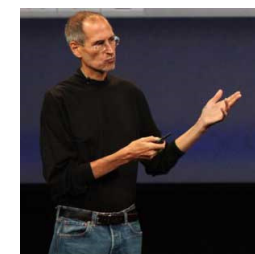

If the so-called “western democracies” had really cared about peace and democracy, they would have supported Hitler and his entirely legitimate efforts to return economically ruined Danzig to Germany peacefully. Reunion with Germany was what Danzig also wanted. Except for an access highway to Danzig, no loss of any Polish territory was necessary. Hitler was the great man—brilliant, inciteful, entirely reasonable and extremely generous. That he is still vilified today merely shows that the same people who truly wanted WW2 are still in near total control—except for this and certain other websites.

Stalin’s world ambitions are spelled out in many revisionist works over the years including a [book review by Daniel Michaels](#) of a major work in German by Wolfgang Strauss.

[From those Wonderful People who brought you the Inquisition.](#) This lengthy link is quite relevant for what it has to say about WW2. The horrors of witch burnings are tame, however, compared to the deliberate mass incinerations of totally innocent civilians by the US and Britain in response to the pious prodding from Jews and others, including some of the world’s leading Christian clerics and theologians.

BREAKING NEWS Dominique Strauss-Kahn was in handcuffs (it was so cruel and humiliating!) when he appeared before the judges this week for the whole world to see—but, Jews in Auschwitz-Birkenau, supposedly on their way to the gaschambers and extermination, had NO shackles or personal restraints on them at all. They were strolling, and resting, and picnicking, and snacking along the way as the [pictures from Yad Vashem clearly show.](#)

Holocaust propaganda has empowered Jews as never before. The consequences will be disastrous for the world and especially America whose economy is already collapsing from within. No foreign army or terrorists were needed. Not that long ago, *Untermenschen* like DSK were not even allowed into polite society—but today, they are the “elite,” even the guardians of power, especially their own. Greenspan, Bernanke, Kissinger, Wolfowitz, Libby, Blankfein, Spitzer, Madoff are just some of the names that we have come to know so well. The “holocaust” was the crowbar which allowed them to break in. Even a low-life con-artist like Elie Wiesel was able to scold President Ronald Reagan with a morality lecture before the entire nation when Reagan was about to merely visit a cemetery in Bitburg, Germany. In the adjoining picture—[click to enlarge](#)—DSK looks like the predatory cockroach that he truly is, and ready to pounce, whereas Barack Obama and his wife look like aristocracy. Compared to DSK, they are aristocracy!

Steve Jobs Holocaust Victim

The above photos of Steve Jobs were taken over the last few years. Just look at those bones beneath his skin!

To the right we have a young, handsome, healthy Steve Jobs from more than ten years ago. All the makeup and the best medical care in the world can not make him look like that today.

Steve Jobs is one of the most successful people on the planet with access to the best medical care and nutrition. He is sick with cancer but manages to “survive” somehow—and still makes public appearances to promote the great company which he manages, Apple. Investor confidence is directly tied to his presence and so he endures what must be terrible public ordeals. At today’s Apple conference (June 6, 2011) some people commented that he appeared even more emaciated than before. We wish him well. The vast majority of people in his situation will simply avoid all public appearances and retire to nursing facilities.

One result is that the American public does not generally even know what sick people really look like. When they do visit a sick or dying relative in a hospital, that person is in pajamas and is well-cared-for in a well-made bed with neat and clean surroundings. When the relative dies, the corpse is scooted off to a funeral parlor where extremely well-paid, highly trained cosmeticians do their best to make the corpse appear as healthy as ever. The “departed” relative is merely asleep and at peace with the universe. Billions of American dollars are spent every year on such outright fraud and deception. And so, Americans especially, have a thoroughly false impression of what death looks like. The sad fact is that a good proportion of us, perhaps a third, will be reduced to skin and bone before our demise. Cancer, AIDS, tuberculosis are just some of the diseases that have such effects on their victims. Military combat, by contrast, tends to kill people who are healthy, even in great health, until they are killed. And so, the claims that so-called “battle-hardened soldiers” were deeply shocked by what they saw in German concentration camps near the end of the war has some credence.

Many years ago I was confronted by a Czech doctor who refused to believe for an instant that there could be any merit to revisionist claims about the “holocaust.” I suggested that he let me go to the major hospital where he was a proud director and let me photograph those patients who were likely to die in the next few days—but, with the tops off their pajamas. At that point, he understood me perfectly and declined my challenge. Even with the best of care in the most modern hospitals today, people still do die and look horrible at the end. It is shocking but so true!

Stephen Hawking’s horrible appearance to the left shows a person who is still quite functional, at least mentally, and not be the product of any gratuitous mistreatment at all. Is it conceivable that Hawking and Steve Jobs might be receiving some treatments of an “experimental” nature. No doubt, there are millions of such cases but the pictures are hidden far from public viewing—except for holocaust propaganda.

In 1945 *LIFE* magazine to the right discussed America’s horrible medical experiments on its very own citizens—shock, horror, awe! No doubt, any German who had dared educate the victors as to how similar scenes arose in German concentration camps would have merely put his or her neck in a noose or would have been shot outright.

It was the cowardly British who had been trying to starve all of Germany to death from the moment they declared war on Germany in September of 1939. When the British actually did have a chance to “fight” the Germans in April and May of 1940, they quickly ran away, literally—first from Norway, and then from France and Belgium. By the end of the war, however, with the help of the US, their cowardly strategy to murder and starve as many Axis civilians as possible had to a great

extent succeeded. So long as the victims were merely German women, children, babies, old men—there was no moral problem at all. But, the discovery that some of the victims were Jews was so embarrassing. What to do, already? Well, just make the Germans! The victors do write the history books.

The grossly misused photographs of the sick and dying in the concentration camps are the real basis for belief in the “holocaust” and they deserve far more of our attention. Some well-known Jews who looked as if they just returned from Bergen-Belsen are Elie Wiesel (today in his 80’s) and J. Robert Oppenheimer (just look at those forearms)—image lower right—in the fullness of his success just after the war. Should America be condemned for not having done more for such people? Why not?

The real mass murderers and ultimate genocidal maniacs were, and still are, the Allies—especially the Americans. Holocaust propaganda is the continuation of their insane war against countless, totally innocent people—especially the Germans. Will Steve Jobs, Stephen Hawking or Elie Wiesel look any better when they die than Rock Hudson, image upper left, after he died—or any better than the dead in Bergen-Belsen? Of course, not! Countless people die every day in America and look not one bit better than the dead in Bergen-Belsen in 1945. Just take their clothes away and show them as they are. *C’est la Vie!*

We have all seen photos of some of the 18,000 people who died in Belsen before the British took over. We are, however, NEVER shown photos of the 14,000 people who died in Belsen a-f-t-e-r the British took over. Why? Can anyone seriously believe that the victims in the first group

Germany before or during WW2. They had been actively driving the world toward war against Germany since March 1933—and they eventually got their war. So, stop whining! That Jews were interned in concentration camps by Germany and that by war’s end some tens of thousands of Jews were also among the dead and the sick, and among the ashes to which Germany had been reduced should surprise no one. So, stop whining! What should be surprising is that any Jews “survived” at all. In fact, at least five million Jews “survived” as the work of Sergio DellaPergola and others confirm.

So, what really happened? Nearly everything that Americans regard as “overwhelming evidence” or “proof” of Nazi genocidal barbarism is actually “evidence” if not outright “proof” of Anglo-American barbarism. The real perpetrators of “indescribable horrors” that the world should never forget were the Americans and Brits themselves. The “ugly truth” about themselves is, however, far more than they can bear, or tolerate. They are in “deep denial.” They are the real “holocaust deniers” and they are bigots as well. Merely to say that Anne Frank was murdered by the Americans or Brits will bring imprisonment in Germany and no criticism from the US or Britain. So, why bother to even try to tell the “ugly truth”? There will be no Pulitzer prizes or book or movie contracts. How can anyone possibly profit from telling it? If one tries to tell the “ugly truth” however, one might help save the world from the real war criminals, the Americans and Israelis, who are unleashing themselves upon to world once again. They will destroy everything!

The “evidence” that Americans are most taken in by are the photographs of sick or dead people in the German concentration camps. The overwhelming numbers of healthy “survivors” are rarely shown, but the pictures are easy enough to find if one looks for them. The real mass murderers of many tens of thousands of Jews were NOT the Nazis, or the SS—but, the western Allies themselves as they proudly bombed and strafed the vast and unending columns of desperate civilians trekking west to escape the Soviet army. The refugees and “evacuees” including Jews were fleeing west to find safety and protection but found something else instead. The Allied intent was, of course, not to kill Jews—but only Germans. But, who could separate them; who could tell the difference between Jews on a so-called “death march” (an obscene misnomer) or on a train even with open flat cars, or Germans, or eastern Europeans. How could anyone tell the difference, even if they wanted to? So, what to do? Kill ‘em all? A careful documentation of the numbers murdered in this way is probably impossible. The masses of dead in German cities such as Dresden included countless Jews also. Who can possibly tell how many? And as far as the concentration camps, the deaths there were another, generally indirect result (but not always as Gardelegen shows with its napalm victims) of the rampaging air campaign against all German civilian targets. Retreating German military were, by contrast, far less appealing targets for the cowardly air men. German soldiers had a nasty habit of shooting back and could with some lucky shots even from an ordinary rifle bring down Allied airplanes, and often did. Unnamed civilians—women, children, and old men, often half-starved—could not. It was so much safer to promote freedom, democracy and world peace by killing lots and lots of civilians: *“They were all Nazis anyway, right”*

The “holocaust” is anti-German racism gone wild. It is not history. If historians and holocaust educators and the USHMM (United States Holocaust Memorial Museum) and the US and German governments were really interested in the “holocaust” and its history—they would surely spend a great deal of time and space on those super extraordinary weapons of mass murder: the gas chambers. But that is not what one finds. In the vast literature that can now be called “holocaust literature,” there is hardly any information about the gas chambers or the extermination process. Too horrible? Why bother when most people are thoroughly convinced already? Clearly, the purpose is not to understand the subject in depth. The purpose is to simply make more and more pro-Jewish propaganda and crush the Germans again. Since two world wars failed to exterminate the Germans, perhaps the Germans can be persuaded to exterminate themselves? What holocaust propaganda really proves ultimately is that Hitler’s policy to expel Jews from Germany was entirely reasonable and appropriate. Hitler was right!

The word “hoax” in its harshest sense applies to what was done. Although there may have never been a formal meeting to hatch the hoax, that was not even needed. There certainly was an “incredible meeting of minds, a consensus — misreading by a far-flung bureaucracy” (words lifted from Raul Hilberg) among the victors, and especially among the Jews. The tale of the six million was to be a huge dead abattoir around the necks of the entire German people (not just the Nazis) to “keep them down” forever. Whether the hoaxers actually believed their own propaganda and outright lies hardly mattered. The Germans, the most civilized and most highly educated people on the planet, had to be “re-educated” and “democratized” by people who had themselves committed far worse atrocities than anything the Nazis were ever accused of committing. Those same victors also continued to hold hundreds of millions of people in virtual slavery and misery. The hoax has succeeded perfectly. Germany which had contributed far more to human enlightenment in its brief period of independence than any other country from its founding in 1871 until 1945—was reduced to making expensive automobiles and machinery, and enslaved with guilt and endless payments and apologies to people who were never exterminated to begin with.

What people find most compelling are photographs of dead and sick people within concentration camps at the end of the war—none of whom had been killed in gas chambers. The so-called “scholarship” of historians is by and large irrelevant, and unreliable, and amounts to little more than nibbling around the edges of the real subject of mass extermination. When ordinary people say the evidence for the holocaust story is “overwhelming,” they are telling us what they have been programmed to believe. They believe what is drummed into their heads from morning until night by the press and media. However, when historians tell us the evidence is “overwhelming”—they are lying.

People who do occasionally try to defend the gassing claims have no idea as to what they are talking about, or writing about. They provide revisionists endless opportunities to show how thoroughly stupid and baseless, even impossible, the gassing claims are. So, do not even talk to holocaust deniers. Avoid and even prevent any possible discussion of the gas chambers or else you too will surely fall into their trap. Do not look at this website unless you are truly alive and evil. Belief in the holocaust is far more important than the basic human rights nearly all nations of the world are pledged to protect. For the holocaust and its beneficiaries (“God’s Chosen People”) everything must be different—and, of course, it really is different. Holocaust-belief is the new religion. We should all bow down and worship at its many altars (16 holocaust museums in the US already). We should do all we can to perpetuate the divine message—and support Israel, and prevent another holocaust. If that also means murder of countless moslems, so be it. It is all part of the same message.

The Nazis and SS shared their food and medicine and much more with the Jews—even until the very last days of the war! The misery in many of the camps at the end of the war was the Allies’ doing. Ultimately, all that holocaust propaganda and “scholarship” really proves is that when Hitler tried to expel Jews from Germany forever, he certainly had the right idea.

DEMIJANJUK: Scapegoat for Jewish Madness

The ongoing trial of JOHN DEMIJANJUK in Munich, Germany is another anti-German horror show to appease the victors of World War 2, especially the Jews. Demijanjuk can no longer be accused of operating a genocidal diesel engine in Treblinka but perhaps he can be convicted of something else. Perhaps he operated a genocidal diesel engine in Sobibor. Perhaps he was merely a guard. In any event, the Jews are clearly obsessed with blood lust and must punish Demijanjuk for something, one way or another. In the good old days just after the war, it was so easy for prosecutors to find people like ADA BIMKO (Jewish) to lie for them under oath: “Yes, your honor, I actually saw Demijanjuk kick a dozen Jews to death when they refused to wipe his boots fast enough.” If nothing else worked, testimony like that was still good enough to hang any Nazi or SS member. “Eyewitnesses,” just like BIMKO, were so easy to find among the anti-Nazi fanatics, especially Jews, in the former camps. That was, after all, precisely why the victims had been put there in the first place—and rightly so. But today, the prosecutors cannot simply trot out “eyewitnesses.” The possible “eyewitnesses” seem to all be dead. Demijanjuk has outlived them all.

The new (and probably last) Demijanjuk trial, this time in Germany (no other country would touch the case), is a farce. Where one might expect some new insights into whatever happened at Sobibor, one gets nothing. From a [recent Reuters story about the Demijanjuk trial](#), one can not even tell whether the deadly mixture of carbon monoxide and (now) carbon dioxide was from a diesel engine, or a gasoline engine, or any kind of engine.

But, why bother with such details? Everyone knows it happened! To have any doubt about the crimes is a horrible sin. To actually express doubt, openly, is punishable with imprisonment—and rightly so [according to Elie Wiesel](#). It is not any yearning for historical truth or understanding (*Vergangenheitsbewältigung*) that motivates these German prosecutors and judges. Their purpose is simply to appease the Jews who monitor everything. The trial is a form of national groveling at the feet of Germany’s true masters. For the Jews, the trial is about revenge against a helpless old

looked any worse than the victims in the second group? Truth was not an object of the British propaganda regarding Belsen at all. Today, if one speaks the truth in Germany about Belsen, one is imprisoned for supposedly "inciting racial hatred." Why? Obviously, truth is a terrible threat to German "democracy," and even to Europe generally.

NEW HELL: The Physical and Cultural Destruction of Germany NEW

Rare Moments of the Third Reich (video)

German Auschwitz Records, May 1940 - December 1944

The Revisionist Workshop with Discussion Forum

For something really stunning, see the discussion, column right: "[Cremation and Incineration in Kremas 2 and 3 with POISON GAS from Coke](#)" The fiendish Nazis cremated Jews with clean carbon monoxide (from coke) but supposedly used something else (cyanide) to gas the Jews to death—in the same buildings. And they used the garbage incinerators, also in the same buildings, to only burn garbage—but not bodies. Go figure??

The End of the Diesel Gassing HOAX as explained by Dr. Achim TRUNK (auf Deutsch)

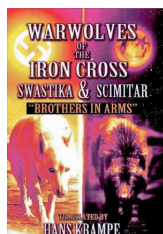

Norwegian MP loses party support for Holocaust Denial

Les Visible's Big Ticket item

FPBerg on the Deanna Spingola Radio Show (audio)

Mountains of Brilliant RED Corpses from CO and Cyanide! So, where were they?

Carbon monoxide was supposedly used to murder two million Jews in places like Treblinka, Belzec and Sobibor. So where were the piles or pits of RED corpses? The "eyewitnesses" never, ever, even mentioned such unforgettable spectacles.

The image right is from the [Textbook of Maritime Medicine](#). "Fig. 10.9.2: **Bright red lividity on the dorsal side of the body as the expression of lethal carbon monoxide poisoning. Livor mortis is bright red in cases of carbon monoxide or hydrocyanide poisoning (or in cases where the corpse is kept in cold storage). Carbon monoxide is a colourless and odourless gas that arises, for example, from incomplete fuel combustion. Thus it is always necessary – primarily for self-protection – to consider or exclude carbon monoxide poisoning, particularly when bodies with bright red lividity are found in engine rooms, after engine room fires (automatic carbon dioxide fire extinguishing system) or in boiler houses.**"

Many large piles of corpses have been shown repeatedly since the war to condemn Germany—but, it has NOT even been claimed once that any of the corpses were **RED in color**. So what about all those "eyewitnesses" to alleged mass gassings of millions of Jews with carbon monoxide (from diesel or gasoline engines) in the Reinhardt camps (Treblinka, Belzec and Sobibor)? Wouldn't those "eyewitnesses" have noticed that spectacular coloring? Of course, they would have been **stunned** by that coloring. They would have certainly remembered it years later during any of countless anti-Nazi war crimes trials if they were not simply lying their heads off for those trials.

It seems so unlikely that these "eyewitnesses" would have simply been given a brief peek-a-boo at the **red** corpses shortly after death in the gas chambers and then shunted far away from the dead bodies. The "eyewitnesses" spent a great deal of time at those camps according to their own accounts. So where is testimony like: "**the naked corpses were or turned cherry-pink after being piled up for burning**" or "**the naked RED corpses could be seen for miles in spite of the camouflage around the camp?**" The fact is there never was any testimony even remotely like that in any of the trials or accounts by self-described "eyewitnesses." Clearly, the "eyewitnesses" lied bigtime! .

An important [essay](#) showing the nearly perfect correlation between intense **RED coloring** in corpses and fatal carbon monoxide poisoning is originally from Austria based on examinations of 182 corpses of people who died from CO. Clearly, nearly all of the evidence about the supposed deaths of more than 2 million Jews in the Reinhardt camps is absolute rubbish. All of the "witnesses," from **Kurt GERSTEIN** on, lied about the most obvious kind of evidence for such claims! The "holocaust" really is a monumental Anglo-Jewish HOAX of epic proportions! Another [essay from CBS News](#) shows how CO maintains a bright **RED color** in meat even when it is held at room temperature for more than five days.

NEW Hitler demands liberty and independence for Palestine (video) in April 1939. Hitler in this brilliant, rapid-fire speech reminds Roosevelt that the Palestinians were not at all concerned by possible Nazi aggression but wanted to be free of British military occupation and Zionist terror instead. The following quote about American Gas executions is from: <http://www.deathpenaltyinfo.org/descriptions-execution-methods#gas>

"**The prisoner is instructed to breathe deeply to speed up the process. Most prisoners, however, try to hold their breath, and some struggle.** The inmate does not lose consciousness immediately. According to former San Quentin, California, Penitentiary warden, Clifton Duffy, '**At first there is evidence of extreme horror, pain, and strangling. The eyes pop. The skin turns purple and the victim begins to drool.**' (Weisberg, 1991) Caryl Chessman, before he died in California's gas chamber in 1960 told reporters that he would nod his head if it hurt. Witnesses said he nodded his head for several minutes. (Ecenbarger, 1994) ...At postmortem, an exhaust fan sucks the poison air out of the chamber, and the corpse is sprayed with ammonia to neutralize any remaining traces of cyanide. About a half an hour later, orderlies enter the chamber, wearing gas masks and rubber gloves. Their training manual advises them to ruffle the victim's hair to release any trapped cyanide gas before removing the deceased. (Weisberg, 1991)."

Bengal 1943

The image to the right shows some of Churchill's 2 million victims from the famine in Bengal in 1943. That holocaust had been caused by the diversion of shipping normally used to bring food to Bengal. The shipping was used instead to bring military supplies to the British army in North Africa in 1942. See: [Churchill's Secret War](#) by [Madhusree Mukerjee](#) (2010).

"Nazism and the German Economic Miracle" by Henry C. K. Liu. The greatest economic miracle of all time was achieved by Hitler from 1933 to 1938 during a world depression and in spite of the worldwide anti-German boycott by Jews. Click the unemployment graph left for an enlarged view. If America ever intends to seriously deal with its own economic disaster today, it must first learn from Adolf Hitler.

The chart appears in Barton Folsom's excellent new book: *New Deal or Raw Deal?* on page 243. One can see that in 1932, the year before

man who escaped their hangman in the past, a symbolic anti-Semite or scapegoat. It is another media op to vent more hatred and lies. Appeasing Hitler was evil—appeasing Jews is moral and good! We must give those pathological Jews everything they want—forever, and ever. That is the great "moral" lesson being taught in Germany today.

Consider how much is unknown about those engines (diesel or gasoline) that supposedly made the gas that killed millions. Those engines are surely the most spectacular devices for mass murder in all of human history. Who made those engines? Was it Mercedes-Benz, or Deutz, or GM, or Ford, or who? When were they purchased, and installed, and by whom? Who serviced or repaired the engines. Supposedly, there was a two-hour and 49-minute delay (measured with a stopwatch) in the diesel gassing witnessed by **KURT GERSTEIN** because the diesel would not start. How was such an embarrassing problem corrected? Imagine how profitable it would be for the Jews if they could only show—somehow—that the genocidal engines were made, or installed, or repaired by any of the large corporations that are still out there today. Those corporations could be blackmailed and bled white for years. Such an opportunity!

Surely, to fight global terrorism and protect Jews from "another holocaust," we must understand how automotive engines were used to commit such crimes during WW2. Perhaps we should simply ban all such engines. If we really care about the "holocaust" as much as we pretend, then surely we must take such questions seriously. If the next al-Qaeda terrorist kills some Jews in America with diesel exhaust or gasoline engine exhaust, it would be so embarrassing. Heads will roll at homeland security. How big and powerful were those murderous engines in Nazi Germany? What fuel was used? **Was producer gas the fuel? If not, why not?** At what rpm or speed? Was there any external load on the engines? Are there any records at all for these marvelous murder weapons? Is there any scientific, forensic or medical evidence or literature anywhere to show how these engines might have actually killed masses of people? Although there are some anecdotal claims made after the war about the engines, they are so contradictory and vague that they are worthless even by the shabby standards of holocaust historiography. They are hardly mentioned in the holocaust literature any more. Every snippet of info from one "eyewitness" is contradicted by at least one other snippet from another "eyewitness." Many "witnesses" merely heard that such and such had happened. Was the engine really from a Soviet T-34 tank as was sometimes claimed, or from a Russian submarine as **EICHMANN** seems to have claimed? The anti-German prosecutors and holocaust promoters can't keep their lies straight—and, they have nothing better.

Surely, if the evidence really were "overwhelming," we would at least know something—but we know nothing at all! Was the engine a diesel engine as was almost universally claimed by the "holocaust scholars" until recently—or what? Nothing is known about those genocidal engines because the gassing story really is rubbish. It never happened!

There are no German documents showing that even one person was ever gassed in Sobibor, or anywhere else. There are no exhumed corpses with autopsies showing death from gas in Sobibor, or anywhere else. There are no cremains (bone fragments after cremation) in Sobibor, or anywhere else showing death from poison gas or any other kind of foul play. There is not even an examination methodology that makes any sense forensically or technically.

The Historians have Blood on their Hands

The wildest, pseudo-scientific conspiracy theory imaginable has been blindly embraced by historians. As a social class, historians are far too lazy to do any real research beyond their ivory towers. They pander to those in power which means, in our age, to the Jews. Until a few hundred years ago, people believed in "overwhelming evidence" about witchcraft and contacts with the devil—but, it was all bad evidence manufactured in superficially fair, legal proceedings by skilled fanatics. It was all about "eyewitness testimony" and "confessions." The anti-German, anti-Nazi gassing claims are the same phenomenon. The fanatics are still at work even if the story line has changed. Although there were tens of thousands of corpses in German concentration camps at the end of WW2, and many more outside the camps—there is absolutely no forensic evidence from autopsies to show that even one person was ever killed by the Nazis with poison gas or poison. The holocaust is a "pseudo-event," concocted and promoted by the worst war criminals in all of human history, namely the victors of World War 2. Holocaust-belief is a form of collective insanity driven by the ravings of unhappy Jews.

As to those horrible photographs of thousands of dead and sick in concentration camps at the end of the war, it is really so hard to recognize that those scenes were the end product of the cowardly Anglo-American air war against civilian targets in Germany? And, by the way, that air war against civilians was begun by the British in 1940 and not by the Germans. It is extremely hard for the victors to look at themselves in the mirror. So, blame the Germans instead! And, if the Germans even dare to protest—the victorious Allies can destroy Germany again.

Hitler had superb, cyanide gas chambers—but they were used ONLY to keep people alive. Those gas chambers were used in many strategic locations throughout eastern Europe to fumigate entire railroad trains, for example, with cyanide gas from Zyklon-B. Other superb gas chambers were used in hundreds of POW camps and concentration camps, including Auschwitz, to fumigate and delouse everything from clothing to furniture, also with cyanide gas from Zyklon-B. Those superb gas chambers certainly could have been used for mass murder as well. But none of those real gas chambers have ever been implicated in any of the holocaust gassing claims. Instead, the Nazis supposedly used diesel exhaust and Zyklon-B—but, here is where it gets really crazy, the Zyklon-B was simply dumped, supposedly, through small holes in the roofs of cellars—without the warmed, forced air and circulation that was routinely used in all of Germany's most highly-advanced gas chambers. See my [essay: "Zyklon-B and the German Delousing Chambers."](#)

The gassing hoax has succeeded in part because of the widely held, but false, belief that murder with poison gas is almost childishly easy, and quick—and even painless. That false belief has actually been fostered by official practitioners of gas executions in the US, the government itself, in order to disarm critics of the death penalty. By American law, legal executions must NOT be cruel. Even the American execution expert and holocaust revisionist **FRED LEUCHTER** believed that "**if I do my job properly, death will be quick and painless.**" When he said that in 1988, he had never actually witnessed even one gas execution. He was a qualified expert in a field where gas executions had not been carried out for decades. It has only been in the last decade that an enormous body of evidence from actual gas executions has emerged (see the links at the bottom of this page, column left) which show that even where only one person is gassed to death, the killing process is far from easy, quick or painless. Death by gas is in fact slow, rather complicated technically and excruciatingly painful. The best results occur when the victims assist in their own executions by inhaling deeply after the poison gas enters the gas chamber. But such a claim, especially about Jews, is too absurd to be believed. See my [essay: "Self-Assisted Holocaust Hoax."](#)

The Jews were still alive

The simplest reason for rejecting the Holocaust story in general is that the vast majority of European Jews were **still alive** at the end of World War 2. Professor **ARTHUR BUTZ**, the author of [The Hoax of the Twentieth Century](#), made this claim nearly thirty years ago—and he was absolutely correct as the following quote from a credible, recent Jewish source shows.

The Jewish Week 11-28-2003

Two new studies to determine the location of Jewish Holocaust survivors, for use in making future allocations to the most needy, differ widely on the number of survivors worldwide. The Jewish Week has learned. **Sergio DellaPergola**, a demographer for the Institute of Contemporary Jewry at the Hebrew University of Jerusalem, found 1,092,000 survivors worldwide. **Jacob Ukeles**, a policy researcher in Manhattan, found 688,000. The Ukeles survey, an update of one he prepared in 2000 for the Congressional Jewish Material Claims Against Germany, found only minor differences from his previous effort. Lawrence Eagleburger, chairman of the International Commission on Holocaust Era Insurance Claims, commissioned both surveys. Eagleburger had hoped to use the figures in determining how to distribute \$13.2 million annually in humanitarian funds for needy survivors worldwide.

If someone had produced a video showing JFK speaking to an audience months after his "alleged" assassination in Dallas—holding a newspaper with text showing the newspaper was clearly published long after that date, we would all know there was something seriously wrong with the story we have been told. Any number of "alleged" events could be debunked in the same way if they were false events. The "holocaust" is just such a false event because of the stunning evidence that we have today.

SERGIO DELLAPERGOLA's amazing discovery of 1,092,000 Jewish holocaust survivors alive in 2003 is thoroughly discussed in his [2003 report](#). Clearly, the numbers of "Jewish holocaust survivors" alive more than fifty-five years after the war are so enormous that one should wonder if any Jews at all perished during World War 2. Any conservative and reasonable statistical analysis of population decline over the post-war years would surely conclude that there were more than five million Jewish "holocaust survivors" alive at the end of the war. No doubt, some innocent Jews were killed—but, there is no good reason to believe Jewish deaths were statistically unusual for a long, horrific war in which many tens of millions of innocent civilians were killed of all nationalities. On the basis of numbers alone—the generally accepted

Source: League of Nations, *World Economic Survey: Eighth Year 1938/39* (Geneva, 1939), 126.

In his highly influential *Origins of the Second World War* (1961), British historian A.J.P. Taylor gave the Nazis credit for creating widespread prosperity, concluding on pages 104-05, “*The Nazi secret was not armament production; it was freedom from the then orthodox principles of economics. Government spending provided all the happy effects of mild inflation; while political dictatorship, with its destruction of trade unions and rigorous expropriation, prevented such unfortunate consequences as a rise in wages, or in prices.*” Hjalmar Schacht, who was temporarily head of the German central bank and a defendant in the Nuremberg Trial, summed it up thus: “An American banker had commented, ‘Dr. Schacht, you should come to America. We’ve lots of money and that’s real banking.’ Schacht replied, ‘*You should come to Berlin. You should make money. That’s real banking.*’” Hitler’s miracle was comparable to Jesus “feeding the multitudes” next to the Sea of Galilee except that Hitler’s performance was far more spectacular—and it was real. Hitler did NOT just feed a multitude of 5,000 people with five loaves of bread and two fishes—he fed tens of millions with nothing at all. That was a real miracle!

Can America ever admit that it might learn something, anything at all, from Hitler—that supposed “madman”—or the Nazis in order to solve the mess it is in today? Of course, not! The “holocaust” will blind America to real solutions and so, indirectly, it will pay an astronomical price for the holocaust mytho-mania which it has embraced and promotes as a nation. In the meantime, the Jewish wizards of Wall Street and high finance will

The MYTH of the Soviet T-34 tank in WW2

IGOR BUNICH describes **Stalin’s Plan to invade west in July of 1941**, less than one month after Hitler actually pre-empted him with his own attack on the Soviet Union on June 22, 1941. That pre-emptive attack ultimately saved western civilization even though it led to Germany’s defeat and destruction. Hitler’s gamble and Germany’s self-sacrifice saved our asses!

RED Corpses and Big Lies about BLUE Corpses.

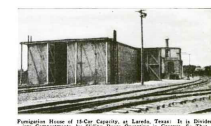

It was generally accepted until about twenty years ago that the vast majority of alleged Nazi gassings had been done with diesel exhaust in Treblinka, Belzec and Sobibor. Since then, that story has been shelved by many holocaust “scholars,” perhaps because of the research and essays of your webmaster. Many “scholars” now simply avoid choosing between diesel exhaust or gasoline engine exhaust as the source of deadly carbon monoxide for the alleged mass murder of nearly two million Jews.

“Holocaust Controversies” is a website for a group of exterminationists who have been backing away from earlier claims about mass gassings with diesel exhaust. These newer exterminationists suggest that the killing gas might have been gasoline exhaust instead of that it may not even matter, one way or the other. Either way, the killing ingredient is carbon monoxide (CO). The major problem for the new gasoline exhaust theory is that the corpses, with only few exceptions, would have been a very dramatic **RED in appearance already at the moment of death, and even before death.** The onset of the reddish appearance occurs when the carboxyhemoglobin in the blood exceeds 30% regardless of when that occurs. Many people will remain alive with carboxyhemoglobin levels as high as 70% and display the typical intense red coloring. The older claims that the corpses were **BLUE** (instead, from SS Leut. Kurt Gerstein, for example) are a monumental blunder in holocaust mythology, for the new gasoline theory as well as the older diesel theory, Victims of asphyxiation (from hangings, for example; either suicidal or execution) are NOT **blue** either until many hours after death, if ever—except for small areas of cyanosis which can only be recognized with some medical expertise.

Exterminationists fight as hard as they possibly can on these issues. For them, these are existential issues. They must grasp at straws—because every “eyewitness” to the alleged CO gassings except one, Dr. Leidig, claim the corpses were either “**BLUE**” or “**bluish**” or **unremarkable in color**. Dr. Theodor Friedrich Leidig had testified about an alleged experimental gassing in Sachsenhausen resulting in **RED** corpses—but, not at any of the alleged “extermination camps” For all of the major camps, the “eyewitnesses” have clearly undermined the holocaust hoax. Nearly two million Jews had supposedly been murdered with CO at the major camps as Treblinka, Belzec and Sobibor —far more than with cyanide or Zyklon-B, at Auschwitz, for example.

The leader on the color issue for the exterminationists is **Roberto Muehlenkamp**. He and I have debated informally many times on RODOH and elsewhere. He is definitely a nut case with an anti-Nazi agenda. He insists that any reddish coloring would have ONLY appeared l-o-n-g after death had occurred based on the meaning of the words: **livor mortis**. His linked essay is the most bizarre piece of pseudo-scholarly gibberish I have seen since Charles Provan published his farce about “**Blue Coloring.**” The authors of the **Risser et al** essay repeatedly stressed the direct and “**immediate**” relationship between color and carboxyhemoglobin levels; but they simply used a different meaning for **livor mortis**. The words “**immediate**” or “**immediately**” appear twelve times in the essay, even in the title itself, and they mean exactly what normal people understand those words to mean. When Risser et al referred to the reddish coloring as **livor mortis**, it was definitely NOT the typical, purple-grey color that corpses generally acquire only many hours, even days possibly if temperatures are low, after death Fatal CO poisoning is different from other causes of death because the CO gas source may persist and release more gas near the death scene. The authors were eager to promote an “**immediate**” response to a danger threatening all living people near the death scene. See the essay by Thomas Kues also. “*If the CO₂ color does not fit, you have to accept it! If the CO₂ color does not fit, the ‘eyewitnesses’ LIED bigtime! Without credible eyewitnesses, without corpses, without documents, without even a plausible theory as to how the gas chambers worked—the holocaust gassing claims are rubbish. Without the gassing claims, there is no uniqueness to the ‘holocaust’ at all. Without even mass graves with victims of mass shootings, what is left to sustain the HOAX except the ruthless fanaticism and bigotry of the many believers? They are the real ‘deniers’*”

POPULAR MECHANICS magazine in 1922, page 595, describes how huge “**Poison-Gas Chambers Disinfect Freight**” with cyanide gas. Oh, my-oh my! “*One of the largest houses, located in El Paso, has three five-car units, each of which measures 225 ft. in length, 12 ft. in width, and 16-1/2 ft. in height.*” Four locations along the US-Mexico border had a capacity of 60,000 railcars per year. (Click images to enlarge) Could those same gas chambers, using Zyklon-B or plain cyanide gas, have been used to gas Mexicans or Jews as well? Why not? Didn’t the Jews travel to Auschwitz, Treblinka, etc, on railroad trains anyway? Instead of gassing them to death a-f-t-e-r they stepped off the train, do it all before they get off the train and not-to-worry about any escapes or turmoil.

American railcars are substantially larger than European railcars. If 100 Jews had been trapped in each railway car, 6 million could have been killed in just one year at the Texas-Mexico border. It would have been technically achievable. It never happened because there was no desire to do anything like that in Texas, or in Europe. The holocaust gassing claims really are a monstrous Jewish hoax!

Early History of U. S. Cyanide Fumigation from Clemson University “Fighting Our Insect Enemies”

1886 —Hydrocyanic acid gas (HCN), one of most deadly gases known, discovered as fumigant for insect control purposes, **1887** —Pot generation of HCN gas developed for fumigation purposes, **1894** — Hydrocyanic acid gas (HCN) first used for control of insects in

Treatment of Gas from Mexican Insect Powder into One of the Poisoning Gases. (From the report of the U.S. Department of Agriculture, Bureau of Entomology and Plant Quarantine, 1910.)

story is a monumental hoax. The continued worldwide acceptance of that hoax, even in Germany, is a tribute to the enormous power and influence of the supposed victims and the Jewish community in general. The uniqueness of the mass gassing claims has also appealed to the darker sides of human imagination and gullibility.

TABLE 1. ESTIMATE OF SHOAH SURVIVORS,* BY MAJOR GEOGRAPHIC DIVISIONS, 2003

Region	Number	Percent
World Total	1,092,000	100.0
Israel	511,000	46.8
United States	174,000	15.9
Former Soviet Union	146,000	13.4
Western Europe	197,000	18.1
Eastern Europe	32,000	2.9
Rest of the world	32,000	2.9

* A intermediate extensive definition, see p. 3.

The total of Shoah survivors reassessed in 2003 according to the comprehensive criteria outlined above, is currently evaluated at 1,092,000 persons (see Table

6

The above table is from page six of DellaPergola’s report. (click to enlarge)

One profound shortcoming in the DellaPergola report is that its “intermediate extensive” approach (see page 13 of the report) includes only “*Jewish persons who are alive today*” (meaning 2003) which obviously excludes people who had been Jewish during WW2 but who had “converted” or assimilated during the war and abandoned their earlier attachments to Judaism—and who are NOT Jewish today. The numbers of people who fit into this category can only be guessed at by this author—but it does seem reasonable to imagine that the numbers are quite substantial. To escape the real, or perceived, dangers to their survival, many Jews would have certainly dropped their religious attachments just as Germans after WW2 abandoned their earlier attachments to national-socialism. One might even call this the Madeline Albright phenomenon. Ms. Albright supposedly only learned of her family’s prewar Jewish-Czech identity after she herself had been raised as a Roman Catholic in the U.S. and had risen to become Secretary of State. Although her parents had come to a supposedly religion tolerant society, they did not resume their Jewish identity and raised their daughter as a Christian instead. Any other living Jewish relatives of Ms. Albright apparently remained silent or out of contact as well.

A similar shortcoming of the DellaPergola report is that it does not include people who had been Jewish during WW2 but who abandoned any Jewish identity in the fifty-eight years since the end of the war, for whatever reasons, which might simply be intermarriage—or, outright rejection of religion in general as one would expect in communist eastern Europe. To ignore the postwar pressures to conform to an atheistic world view would be like taking the difference in censuses of Christians in eastern Europe, before and after communism—and then concluding that the difference represented the number of “Christians exterminated under communism.” Accusations of rabid anti-Semitism under postwar communism have been rather frequent and, therefore, one should expect the pressures to conform to have significantly reduced the Jewish population in the postwar period as well.

In view of real, or perceived, dangers to their survival, why would any sane Jewish person want to remain Jewish? Are Jews more fanatical about their religious beliefs than other people? What this all means is that the true numbers of Jewish “holocaust survivors” alive at the end of the war must be significantly greater than the millions implied by the DellaPergola report directly. The true numbers of “surviving persons of wartime Jewish identity” are, in any event, enormous and are the clearest and most dramatic refutation of the hoax. The numbers of additional “wartime Jews” who abandoned their Jewish identity after the war make the case against the hoax even more dramatic.

The archives at Bad Arolsen are becoming available and contain more than 50 million pages of documents about people who were in German camps during the war. By some accounts, those archives provide extensive documentation of Nazi atrocities. But, a **recent letter** from Bad Arolsen shows otherwise: “*Unfortunately, we cannot reference a single document listing the death of a detainee due to gassing by Zyklon-B. As a rule, the Nazis gave other causes of death for inmates, who perished in the concentration camps. With kind regards,*

U. Jost Archival Manager”

Almost needless to say, they could not provide any evidence of gassings with carbon monoxide, or diesel exhaust, or gasoline engine exhaust either—or else, they would have been more than delighted to provide it.

The implications of the following essay are enormous: <http://www.cipress.org/article/35149> One might well ask if there is some kind of extermination process at work today. In the USA, out of 100 Jews during the general post war era, there are supposedly, according to the essay, only three left four generations later. The essay also supports my view that the vast majority of “missing” Jews at the end of WW2 had NOT been killed at all but had simply discarded their Jewish identities. And, why not? No doubt, many “converts” restored their Jewish identities after the war—but many others did not. How many is the important question. Judging by the willingness of Jews to discard their “Jewishness” since the war based on the linked essay above, the numbers of Jews who did so during the war must have been at least as great.

We should begin to speak of a holocaust through conversion and collaboration—and NOT of physical extermination at all. So, what to do about it, if anything? Should anyone in their right mind even care? I think not, except to unravel the holocaust insanity in general. Holocaust-belief is a kind of collective insanity. It has already become a new religion which one must believe, without question, or be condemned as an “evil” heretic—even imprisoned as in Germany, or Austria, and ruined as well, as happened to David Irving and Bishop Williamson. “Guilty for the holocaust” has come to replace “original sin” for which all except the Jewish victims themselves **must** “bear responsibility” or suffer severe consequences.

The Nazis could have done it – the Technology for Mass Murder was there

Mass gassings were technically possible—and the Germans were more than capable technically of committing such deeds, just as all modern industrial nations are—but NOT by using the absurd and clumsy methods alleged in the Holocaust literature. Even with the most generous allowances for “errors” (major, as well as minor) on the part of self-styled “eyewitnesses”—the gassing claims, including those involving so-called “gas vans,” are simply impossible. There are no exceptions.

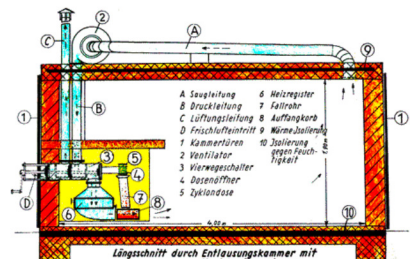

Abb. 26. Längsschnitt durch eine Entlausungskammer mit Kreislaufanordnung

The diagram above shows the standard DEGESCH gas chamber of which hundreds were used in many POW camps and concentration camps including Dachau and Auschwitz. They all used Zyklon-B and cyanide to keep people alive. The technical literature and structures which still exist show us what the Germans were actually thinking and how they used Zyklon-B and cyanide. For more, see **my essay**. Ironically, those German facilities and the cyanide handling technology which

greenhouses, 1898 — Hydrocyanic acid gas first used for control of insects in homes, 1904 — Potassium cyanide powder advocated for control of ants, 1905 — Hydrocyanic acid gas advocated for control of cigarette beetle, 1912 — Hydrocyanic acid gas used for ship fumigation, Hydrocyanic acid gas adopted by U. S. Public Health Service as standard fumigant, 1915 — liquid hydrocyanic cyanide first tested for insect control purposes, 1917 — Hydrocyanic acid gas fumigation methods developed for control of insects affecting greenhouse ornamental plants, First railway car fumigation houses erected at Brownsville, Laredo, Eagle Pass, and El Paso, TX, liquid hydrocyanic acid gas introduced commercially.

“HOLOCAUST DENIER“ website and discussion forum

American Atrocities in Germany by Judge EDWARD L VAN RODEN “All but two of the Germans in the 139 cases we investigated had been kicked in the testicles beyond repair. This was standard operating procedure with our American investigators.” [12]

JOHN E. GORDON, M.D., Ph.D., “Loose-Borne Typhus Fever in the European Theater of Operations, U. S. Army, 1944,” in Forest Ray Moulton, ed., *Rickettsial Diseases of Man*, for the Advancement of Science, Washington, D.C. 1948, pp. 16-27. The Gordon essay is probably the best discussion of what was happening in the concentration camps from any Allied source. There is no mention of gas chambers or any of the typical atrocity propaganda. The “list of contributors” page says that Gordon was Professor of Preventive Medicine and Epidemiology, Harvard University School of Public Health, Boston, Mass. Obviously, Harvard had not yet been enriched by the presence of Goldhagen and Dershowitz.

Using the Adobe Acrobat features which are on the top menu, one can, for example, search for any word or group of words. “Gas chambers” or “gassing” are NOT mentioned anywhere. The measures recommended by Gordon and others to control the typhus epidemic at the end of the war, and even long thereafter, are essentially the exact same measures the Germans (Nazis) had been using throughout the war, albeit with DDT instead of Zyklon-B.

NEW Thomas Dalton's Holocaust Radio Debate on April 24, 2016: NEW

Dalton is the author of: **DEBATING THE HOLOCAUST: A New Look At Both Sides**—Michael Santomaro, Editorial Director - Call anytime; 917-974-6367 ReporterNotebook@Gmail.com <http://www.DebatingTheHolocaust.com>

Before Americans *kwetsch* (“complain” in Yiddish) about Nazi atrocities, they should look at their own history carefully. In the American Civil War, for every soldier who died from wounds sustained in combat, more than two soldiers died from disease alone—without any wounds. According to the official *Medical and Surgical History of the War of the Rebellion*, 44,558 Union soldiers died from diarrhea and dysentery. That is far more than died from combat at Gettysburg, Antietam and all the major battlefields combined. This is discussed in my essay: **Typhus and the Jews**. The victims of diarrhea or dysentery or any number of other diseases, even in the Union Army which had an abundance of food and supplies generally, looked no better than the worst “victims” of supposed Nazi barbarism. Today’s victims of cancer or AIDS look no better either when they die. The Union soldier to the right had been a prisoner in Andersonville ([click to enlarge](#)) where conditions had been horrible just as in northern prison camps—but about which it is agreed there had been no extermination program or policy of deliberate abuse. Gross overcrowding had indirectly been the great killer which allowed disease to spread rapidly—even when adequate food was available. But, when one dies from diarrhea or dysentery, regardless of where, one looks like the individual to the right if one is put on display as this person obviously was to make anti-Confederate propaganda. The appearance of “starvation” is no indication of deliberate starvation.

The following linked essays explain what happened in German-occupied Eastern Europe far better than all of the “holocaust” literature put together. **E. W. Goodall** (1920), **Melville D. Mackenzie** (1942), **J. C. Snyder** (1947), **K. David Patterson** (1993). See also “Fumigation with HCN” (1937), “The Absorption of Hydrocyanic Acid through the Skin” *Journal of Hygiene*, (1934), “Procedure for the Disinfection of Railway Coaches” *Am Journal of Public Hygiene*, (1909).

In **Typhus and the Jews** the following German references in footnote 35 are most revealing: Franz Puntigam, “Hygienische Gesichtspunkte bei der Auswahl des Platzes für ein zu errichtendes Durchgangslager mit Entlausungseinrichtungen für ausländische Arbeitskräfte” (Hygienic Consideration in the Site Selection for a Transit Camp with Delousing Facilities for Foreign Workers), *Arbeitsseinsatz und Arbeitslosigkeit* (Berlin: Feb.-Mar., 1942), Heft 3/6, pp. 274-. Hucho, “Die Durchgangslager für ausländische Arbeitskräfte” (The Transit Camps for Foreign Workers), *Arbeitsseinsatz und Arbeitslosigkeit* (Berlin: Nov.-Dec., 1943), Heft 21/24, pp. 124-7. H. Kayser, “Ärztliche Erfahrungen bei der Planung, dem Bau und Betrieb von Durchgangslagern für ausländische Arbeitskräfte” (Medical Experiences in the Planning, Construction and Operation of Transit Camps for Foreign Workers), *Arbeitsseinsatz und Arbeitslosigkeit* (Berlin: Nov.-Dec., 1943) Heft 21/24, pp. 127-9. The most detailed discussion with many construction plans was given in: Franz Puntigam, “Die Durchgangslager der Arbeitsseinsatzverwaltung als Einrichtungen der Gesundheitsvorsorge” (The Transit Camps of the Labour Supply Administration as Facilities for Protecting the Public Health), *Gesundheits-Ingenieur*, Vol. 67 (1944) Heft 2, pp. 47-56.

The “holocaust” is a grossly obscene misrepresentation of humane German measures to subdue a typhus epidemic and keep people alive, including Jews. That epidemic was only one of many that ravaged eastern Europe throughout its entire history. Typhus broke out in Poland again at the beginning of WW2 and spread—even to Germany by the end of the war. German measures to keep typhus away from Germany failed by the beginning of 1945. At that time, millions of Germans and many others, including Jews, from eastern Europe fled into Nazi Germany where they overwhelmed German measures of quarantine and hygienic control. German efforts to keep people alive were undermined by the war itself, by paranoia stoked by anti-German propaganda, and especially by the almost unopposed fury of Anglo-American terror bombing and strafing as the war approached its end. The mortality spiked in the winter months of 1945 following the usual pattern for typhus in times of social chaos when masses of people huddled together for warmth and protection—peaking in late winter and subsiding with the onset of warm weather when people were more willing and able to change their clothes and wash themselves. There was NO extermination program or policy!

Zyklon-B was the infamous substance supposedly used by the Nazis at Auschwitz to murder millions of people. To understand Zyklon-B, its properties, and its limitations — there is no better source than the **U. S. Public Health Service** which used it widely long before WW2 and reported on it in its **Public Health Reports** as follows: **G.C. Sherrard** (1927) pp. 3071-75, **C.V. Akin & G.C. Sherrard** (1928) pp. 2647-70, **G.C. Sherrard** (1928) pp. 1016-22, **C.L. Williams** (1929) pp. 443-76, **J.G. Townsend** (1929) pp. 2847-2912, **John D. Long** (1930) pp. 2880-87, **J.R. Ridlon** (July 3, 1931) pp. 1572-78, **J.R. Ridlon** (July 10, 1931) pp. 1623-36, **C.L. Williams** (1931) pp. 1680-94. See also: **C.L. Williams** (1932) *Am J Public Health Nations Health*. To expedite your reading, you can use the pdf search engine to find and track important keywords such as “Zyklon” or “HCN.” [Click for an enlarged view](#). In the image to the right, note the large size of the granules which would have clogged any shower piping or spray nozzles.

Until the introduction of DDT in 1944, there was no better substance than Zyklon-B to keep people alive and healthy in lice-infested Eastern Europe, especially Poland. The Nazis, using Zyklon-B, saved the lives of countless Jews. Although Zyklon-B certainly could have been used for mass murder, its special properties and limitations would have required measures totally different from the Ruble Goldberg quackery given in the holocaust literature. Circulation fans and appropriate ductwork would have been the simplest kind of common sense features for mass gassing but they are totally absent from the holocaust methodology we are given. Supposedly, the mythical “fans” were only turned on afterwards. Many other common sense features are totally absent as well.

From 1924, we now have a good insight into what must have really been happening at the so-called *Aktion Reinhardt* camps (Treblinka, Belzec and Sobibor) where nearly 2 million Jews were supposedly murdered by the Nazis with diesel exhaust during WW2. Revisionists have long insisted that these camps were nothing more than “transit” camps for processing and delousing Jews and others prior to continuing their journeys to the East. The railroad cars had to be cleaned up also for the delousing of the passengers to make any sense. Simply letting clean passengers re-board railroad cars which were still infested with lice and other vermin would have undermined the entire exercise.

Gas Chambers for Fumigating and Delousing Railroad Trains

An essay by P. G. Stock in *Proceedings of the Royal Society of Medicine* tells us on pages 26 and 27 that:

“The method [fumigation with hydrogen cyanide] has been used to a large extent, and with successful results, for the destruction of lice in clothing, in baggage and in railway carriages on the Russo-Polish border. In 1920 the local authorities in Warsaw constructed a chamber or tunnel which could be hermetically closed, large enough to contain several railroad cars (Fig. 17). The cyanide for the fumigation is obtained from poison gas shells which were left in Poland in 1915. After fumigation the gas is withdrawn from the chamber by means of fans and passed through a stove where it is burnt. [Admirers of Robert Faurisson and Fred Leuchter should note that these cyanide gas chambers did NOT simply explode.]

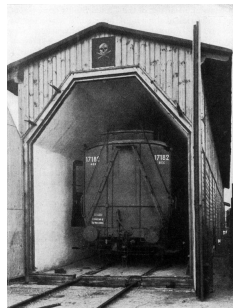

At nearly all quarantine stations on the Russo-Polish frontier there is a cyanide chamber which, it is claimed, has given more satisfactory results than the other methods formerly in use. The process is not considered to be expensive, and all baggage, clothing, bedding, &c., of refugees has been treated in this way.

Cyanide chambers are also used at the Quarantine Station, New York.”

[Click the image above for an enlarged view and notice the skull and crushbones above the doorway.](#)

The primary facility within the Quarantine Station complex in NY harbor was Ellis Island (see also the discussion below). It should be obvious that railroad cars can be fumigated almost as easily with people trapped within them as when the cars are empty. But, such a method for mass murder has never been suggested anywhere in the holocaust literature. Please see the discussion of **Nazi railroad delousing tunnels** below and take the “Sanity Test.”

For a discussion of the early history of railroad delousing tunnels to control typhus epidemics after WW1 see **Melville D. Mackenzie** (1942) pp. 12-16.

From Mackenzie page 12 we have the following: “... The size of the work may be gathered from the fact that at one centre alone Baranowice, on the Polish-Russian frontier in 1921 we were for a long time disinfecting each day 10,000 refugees returning to Poland from Russia. The method of disinfection varied according to the country and the apparatus available. In Poland, steam and cyanide were often used, the latter being employed on an extensive scale on the frontiers. At Baranowice, where the refugees arrived chiefly by train, a tunnel was built, into which hydrocyanic gas could be introduced. On the arrival of each train, all the passengers were given a blanket and told to strip, leaving their garments and all their belongings on the train. Each person was then bathed in hot water with soap and paraffin, while the train was backed into the tunnel, the engine uncoupled, and cyanide gas liberated in the tunnel. When the bathing of the refugees was completed, the train was pulled out of the tunnel by means of a rope attached to a locomotive and was allowed to arrive. In due course the passengers dressed, gave up their blankets, and continued on their journey.”

Wie sprengen die Einwanderung gefährlicher Infekten

The advertisement to the left ([click to enlarge](#)) was placed by DEGESCH on the cover of the 1939 issues of *Anzeiger für Schädlingskunde*, a German technical journal for pest control. The advertisement begins with words saying “We are blocking the entry of destructive insects.” Superimposed on a map of Germany one can clearly see three large railroad delousing tunnels. The purpose was to save lives—but the same technology could have certainly been used to kill Jews trapped inside locked cattle cars.

existed and which could have been used for mass murder has never been implicated in any way by the accusers.

Throughout German-occupied Europe poison gas was also used as fuel (producer gas or *Holzgas* with as much as 35% CO) to power nearly all civilian motor vehicles in order to conserve gasoline and liquid diesel fuel for the military. However, every historical work on the subject of alleged Nazi gassings, even on World War 2 generally, is totally oblivious to the existence of that enormously important technology. Producer gas was a major feature of German survival throughout the war—and yet, it would have also been ideal for mass murder.

In addition, the Germans also had huge, superbly designed gas chambers in strategic locations such as Budapest and other major cities in eastern Europe [for fumigating entire railroad trains with cyanide and Zyklon-B](#). Those facilities were vitally important to prevent typhus-infected lice from being shipped to the west with returning soldiers, or workers, or Jews. Typhus was endemic in many parts of eastern Europe, especially Poland. However, those gas chambers would have also been perfect for mass murder—but they are never even mentioned in any of the tales of mass gassing. Also, hundreds of thousands of German civilian bombshelters were “gas-tight” by law and would have been ideal for suffocating victims trapped inside—even without any poison gas, although gas could have been added easily enough. The existence of all such facilities was widely and openly discussed in great detail in the German technical literature of that period and is readily available today in major libraries throughout the world—but the “historians,” including those who specialize in “holocaust studies,” have simply not bothered to use it if they are even aware of it.

The availability of the large, railroad delousing tunnels and also the widespread use of producer gas or *Holzgas* to drive most motor vehicles (to be discussed here later) lead to only two possible conclusions: either (1) the Nazis and Germans were the most clumsy, inefficient and technically stupid, mass murderers in all of human history, or (2) the “holocaust” is a monumental hoax as alleged by revisionists. Since the “fiendish” Nazis were certainly far from technically stupid, only one possible conclusion remains.

The heart of the hoax—DIESELS

Even among the most ardent proponents of the WMD theories about **SADDAM HUSSEIN**, or even among the Israelis, or the most extreme neo-conservatives—no one has even suggested that the exhaust of Iraq’s many hundreds of thousands of diesel trucks or diesel tanks might have been used for mass murder. If they had, they would have been laughed at—and rightly so. And yet just such an insane theory is still at the very heart of the Holocaust legend. Two million of the alleged three million Nazi gassings of Jews were supposedly committed with diesel exhaust (the vast majority in Treblinka, Belzec and Sobibor). The fact that most people do not even know of the importance of diesels to the “Holocaust” suggests that the hoaxers themselves know just how thoroughly stupid the diesel claims truly are—otherwise, they would have certainly made much more of that part of the story. Nonetheless, when one reads the works of the Jewish holocaust “scholars” (**HLBREG** and **GALBERT**, for example) it is clearly spelled out that two million Jews, as well as countless non-Jews (no one really cares how many) were all supposedly murdered by the Nazis with diesel exhaust in gas chambers or gas vans—whereas only about a million were supposedly murdered with Zyklon-B and cyanide. The most often referred to “eyewitness” to any gassings anywhere was **KURT GERSTEIN**, an engineer, who claimed he watched the entire process with a stopwatch in his hands. As recently as 1999, the U. S. government was still trying to deport **JOHN DEMIANIUK** for his alleged involvement in the alleged mass murder of **200,000 people in Sobibor with diesel exhaust**.

For people who have ever been behind a fully loaded bus during rush-hour as it pulls away from a bus stop at peak acceleration, the smell is overwhelming and it is easy to imagine that diesel exhaust must be extremely toxic. The truth is quite different, however. Diesel exhaust smells bad, it may even look bad, and it may cause cancer. But, as a source of a toxic gas, specifically carbon monoxide, for killing anything in half-an-hour, diesel exhaust is thoroughly impractical even under heavy loads. The smell is due to small amounts of certain chemical components which are totally harmless except for some possible long-term effects. Carbon monoxide, the real potential killing ingredient, is completely odorless and is only present in trace amounts less than 1/2% by volume; at idle the amounts are less than 1/10 of one percent. The presence, or absence, of carbon monoxide has absolutely no relation to the smell of diesel exhaust.

For any conceivable diesel gas chamber—the real danger is **heat** and nothing else, except at extremely heavy loads which are not even suggested by any of the holocaust scenarios. By contrast, gasoline engines produce lots of toxic CO (much more than any diesels ever could) with no oxygen left over either. With diesel exhaust the great danger, and it would have been quite lethal, would have been the temperature of the exhaust—especially if the engine had already been warm and/or idling at high rpm. With diesel exhaust, the danger from CO or reduced oxygen would have been essentially zero from any idling diesel—but the temperatures, well above 200 degrees Fahrenheit, would have killed anyone eventually—and probably in less than half-an-hour. In other words and contrary to PS-501 (forged letter from Becker to Rauff), there would have been NO “**Erstickungstod**” (death from suffocation) or “**Einschlafvergengstod**” (death from CO). The same argument applies to all alleged diesel gassings a la Kurt Gerstein.

Diesel exhaust might be useful for torture—but certainly not for murder. In 1957 a **British scientific study** on hundreds of living animals showed that five hours of continuous exposure to full-strength, diesel exhaust from an idling diesel (two separate tests) failed to kill even one of the test animals. Each test used 4 rabbits, 10 guinea pigs and 40 mice. There has never been any refutation of those results—before, or since. Nonetheless, the gassing claims including those involving diesel exhaust persist through endless repetition by a hopelessly corrupted and willfully blind media. See the [Color Graph](#) for Toxic Effects of Low Carbon Monoxide Levels

See Graph #1 in the [essay about diesel exhaust toxicity](#).

An Extraordinary Suicide with Carbon Monoxide

Although the importance of the diesel engine to the holocaust legend is quite strong and consistent, some holocaust believers are now backpedaling and suggesting on [their own website](#) and [blog](#) that it must have been gasoline engine exhaust instead. The two major problems with that revised holocaust theory are that (1) it still takes a long time to kill many people with gasoline exhaust, and (2) the corpses would almost invariably appear a bright, distinct **RED** or cherry-red which is contrary to ALL of the known witnesses for Treblinka, Belzec and Sobibor. Only one witness Dr. Leidig did claim corpses were **RED** after an experimental gassing in Sachsenhausen. All of the other witnesses claimed either nothing about the appearance of the corpses as far as color or that the corpses were either **BLUE** or **BLuish**.

An extraordinary case of suicide with gasoline engine exhaust reveals that even with gasoline engine exhaust—death is far from quick. But how quick? A British [essay by Flanagan et al](#) examines the case of a 36-year old man in good physical health who had a tape recorder running during his suicide. The tape recording provided that rarest kind of information about any automotive suicide—a timeline. The last sounds recorded occurred **twenty minutes** after the victim turned his car’s gasoline engine on. A reconstruction of the suicide showed that the CO levels had increased steadily over that period reaching nearly 5% before the victim ceased making any sounds. Death came even later. .

If the engine had been a diesel running under a heavy load, the maximum CO concentration would have been only 0.5% (only 1/10th the concentration of the Flanagan case). If the engine had been a diesel running only at idle—which is the most likely comparable running condition—the CO concentration would have been less than 0.1% (only 1/50th of the Flanagan case). What it all means is that death from diesel exhaust would have taken far, far longer than the 32 minutes claimed by **KURT GERSTEIN** and every other self-proclaimed “eyewitness” to such alleged diesel gassings. All of those “eyewitnesses” are liars. Nearly 2 million Jews had supposedly been murdered at Treblinka, Belzec, Sobibor and in the so-called “gas vans” with diesel exhaust. The evidence shows that those alleged gassings never happened because they were technically impossible.

In another [case](#), this time in Japan, a 27-year old man committed suicide with gasoline engine exhaust. Most unusual was the fact that the victim made handwritten notes as the exhaust entered the vehicle. His last entry was made 17 minutes after the gas began entering. In other words, when the time until death is known, it becomes obvious that death with carbon monoxide is quite slow even when the CO levels are vastly greater than one would ever have in diesel exhaust.

Homicidal Gas Vans

In 1943 the Soviets held show trials to convince the world that the Germans had been using gas vans to murder Soviet citizens with the exhaust gases from diesel engines. The proceedings at Krasnodar and Kharkov are described in [The Verdict](#). From the indictment for the Krasnodar trial on page 49 we have the following:

general. Instead of mass murder in large, superbly designed, cyanide gas chambers (such as the railroad delousing tunnels), we are obliged to believe the Nazis and SS murdered people with Zyklon-B in makeshift gas chambers which could not possibly have worked as alleged.

The great expert on Zyklon-B was Dr. GERHARD PETERS. After the war, he was tried for war crimes but was acquitted unlike Dr. BRUNO TRESCH who was also an expert who was actually convicted and hung. Peters was by far the most prolific author of many superb technical essays promoting and explaining the use of Zyklon-B. Those essays provide a powerful, albeit indirect refutation to the techno-lunacy which permeates the holocaust hoax. The Budapest gas chamber to the right could have easily been used for mass murder as anyone with the least bit of technical common sense can recognize, but—and this is so stunning, folks—nothing like this superb gas chamber has ever been implicated anywhere in the vast mythology of holocaust pseudo-technology.

The three images to the right ([click images to enlarge](#)) are all from a single essay: Dr. Gerhard Peters, “[Eine moderne Eisenbahn-Entwesungsanlage \[A modern railroad disinfection plant\]](#),” [Anzeiger für Schindlingskunde](#), August 15, 1938, Heft 8, pages 98-99. The captions in English are: “[Figure 1 \[above right\], Railroad fumigation plant in Budapest \(empty with open door\).](#)”

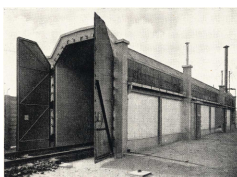

Abb. 1. Eisenbahn-Entwesungsanlage Budapest (mit offener Tür)

“[Figure 2. Interior view of the chamber with a three-part, gas return \[suction to the blower\] duct and a supply duct \(on the floor\)—on the back wall, a powerful blower for mixing and distribution of the gas and for \[subsequent\] ventilation with fresh air.](#)” For the English text of the Peters essay (pictures will NOT match) see my essay: “[Typhus and the Jews – Appendix A](#)”

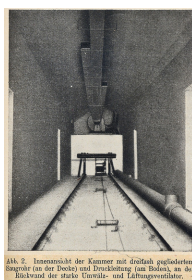

Abb. 2. Innenansicht der Kammer mit drölfzig gelochten, senkrecht in der Decke und Döhrung mit dem blauen, an den Rückwand der staten Uebersicht- und Lüftungseinheit.

“[Figure 3. Two Zyklon gasifiers \(Zyklonvergaser\) in the equipment room connected directly to the circulation ductwork \(Kreislaufleitung\).](#)” This arrangement for opening the Zyklon-B cans, by simply turning the crank handles while the cans are safely enclosed, shows essentially the same arrangement used in the standard DEGESCH fumigation chambers later on. Anyone familiar with the Zyklon literature would have known this. That in turn makes the alleged use of so-called “Zyklon introduction mesh columns” ([Drahtnetzzeinschiebvorrichtung](#)) totally absurd and ridiculous. Note that this long compound German word does not include “Zyklon” at all and referred in reality to something totally different. Here we see just how several cans at a time could be opened, easily and safely, with the cyanide going directly into the circulation ductwork ([Kreislaufleitung](#)) with the help of forced air for quick distribution throughout the entire gas chamber. The alleged “Zyklon introduction columns” (see discussion on this webpage below) would have merely had convection—a very slow process, indeed—to disperse the cyanide gas among the tightly packed crowd of several thousand Jewish victims with, supposedly, all fans turned off until the gassing was complete. It would seem (if the gassing hoax were true) that the Nazi fiends never even read their own literature nor heeded the advice of their own technical experts. Using forced air to drive cyanide gas out of the Zyklon-B granules was a standard common sense feature that one tried to employ whenever possible, especially in permanent, high capacity fumigation chambers. But, the alleged cyanide gas chambers in which millions of Jews were supposedly murdered contained no such feature. Can one really believe that the designers of the most infamous gas chambers in human history were that technically stupid?

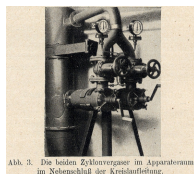

Abb. 3. Die beiden Zyklonvergaser im Apparatraum, im Nebenschalt der Kreislaufleitung.

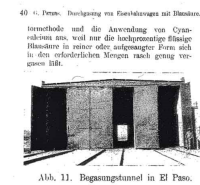

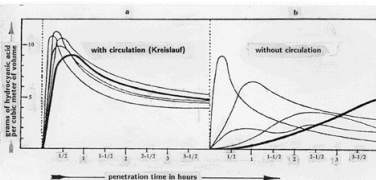

Abb. 11. Begasungstunnel in El Paso.

already there, in strategic locations at major railyards, throughout eastern Europe. WOW! I guess the “holocaust” must be a dirty Jewish hoax after all!

David D. ROMO and Alexander COCKBURN (“[Zyklon B on the US Border](#)”) connected this gas chamber to the alleged later use of cyanide and Zyklon-B by the Germans and Nazis for mass murder. That is a logical connection since this huge gas chamber certainly could have easily been used for mass murder of people trapped inside cattle cars—but, but, and this is so enormously all important—that logical connection was never made by the Germans or Nazis, ever! Nowhere in the vast holocaust literature has it ever been claimed that anything like a railroad delousing gas chamber was used for mass murder. And, that is all the more reason to reject the holocaust gassing claims as absurd and false. Surely, if David D. Romo and Alexander Cockburn are clever enough to see this logical application, the highly trained, but finnish German technicians would have seen this logical application as well! The Germans failed to see it because they were not at all interested in gassing anyone. **There is NO other explanation.** Corrupt-filled railroad cars could have been brought to a brick kiln or lime kiln and reduced ash easily enough. Within the Bible there is actually a precedent for such extremism. See: **Samuel 2, Chapter 12, Verse 31** regarding the treatment of the Ammonites by the victorious Jews under King David: “[And he brought forth the people that were therein, and put them under harrows of iron, and under axes of iron and made them pass through the b-r-i-c-k-k-i-l-n and did he unto all the cities of the children of Ammon.](#)”

German Wartime Cyanide Concentrations from Zyklon-B in Gas Chambers

LEFT: with circulation or [Kreislauf](#) throughout the chamber. RIGHT: without circulation—the gas must find its own path.

The heavy lines represent concentrations in the center of the chamber whereas the other lines represent concentrations in each of the four corners of the chamber. With circulation, the cyanide levels range from 8 to 12 grams per cubic meter throughout the chamber within less than half-an-hour and then gradually drop off as the cyanide is absorbed. But without circulation, ONLY one of the cyanide levels reaches 8 grams per cubic meter in the corner nearest to the Zyklon granules—and for the rest of the chamber, the cyanide levels remain much lower for the entire four-hour period. (original source: DEGESCH as given in [Blausäuregaskammern zur Fleckfieberabwehr](#) by Pontigam, Breyemeyer and Bernfus, Sonderveröffentlichung des Reichsarbeitsinstituts, Berlin 1943, page 33.)

Cyanide Dispersal in Real Gas Chambers The two figures show the way cyanide disperses throughout a small, filled gas chamber over a four-hour period. On the left, the gas concentrations increase rapidly because of circulation or [Kreislauf](#) of the gas. Warm air is driven through Zyklon-B granules near one corner of the chamber. The gas mixture is continually withdrawn from the opposite side of the chamber and returned after being driven through an external circulation blower. In effect, the blower drives the entire process. On the right, we see how slowly the cyanide concentrations increase when there is no circulation or [Kreislauf](#).

Without circulation or [Kreislauf](#), the heavy line in graph (above right) shows us that even after half-an-hour, the cyanide level only a few feet away in the center of the chamber has risen to only about 1/10 of a gram per cubic meter. In other words, the concentration gradient in the chamber is about 100 to 1 without circulation. This means that whatever HCN concentration would have been lethal for any individual would of necessity have required that one hundred times that concentration would have been required near the source of the HCN. A more inefficient and wasteful way to disperse HCN is hard to imagine—but such nonsense is just what one is expected to believe. By merely applying some basic, common sense HVAC (heating ventilation and air conditioning) to this problem using a blower and suitable ducting, the problem would have been easily solved. But that is not what is claimed by the hoaxers at all. What we are given instead is a thoroughly absurd theory about “Zyklon introduction columns” ([Drahtnetzzeinschiebvorrichtungen](#)) which, in reality, would have only made the dispersal of the gas much more difficult. The simple answer (obvious to any German engineer) would have been to simply modify the existing ventilation ductwork with a much larger blower and a sheet metal opening somewhere in the ductwork to allow a basket of Zyklon-B granules to be placed into the air stream—and removed afterwards.

Zyklon-B releases cyanide S-L-O-W-L-Y. The product was designed that way in order to allow far safer handling of cyanide than earlier methods such as the “pot” method. The pot method is still used in American gas execution chambers. The figure on the right corresponds to what one can expect for the alleged homicidal gas chambers at Auschwitz-Birkenau—and it shows that those “executions” would have been a *fiasco*. Mass murder with Zyklon-B would have required **hours of exposure** and nothing like the three minutes that self-styled “eyewitnesses” have claimed. The alleged homicidal gas chambers had NO circulation; persons standing near the Zyklon B granules might have been effected in less than half-an-hour, but persons in at least one remote corner of the chamber would have only been effected hours later. But more than that, even American gas execution chambers with a rapid release and dispersal of cyanide simply cannot kill their intended victims in less than an average time of nine minutes—see links below. These simple facts are good reason to reject the anti-Nazi cyanide gassing claims as complete rubbish. The self-styled “eyewitnesses” to the alleged mass gassings lied bigtime. That postwar courts and judges accepted such “evidence” merely showed how thoroughly corrupt those courts and judges were. The absence of any better evidence for the gassing tales should

Medico-legal experts who exhumed and examined bodies found in an anti-tank ditch near Krasnodar stated in their postmortem findings on 29th June, 1943: “The skin, skeletal muscles and mucous membranes of lips, stomach, intestines, pericardium and peritoneum were either a pale pink or bright cherry colour, also noted in some cases in sections of internal organs such as the kidneys, lungs and heart. Spectroscopic and chemical examinations of the blood and portions of organs removed for biopsy showed that in 523 cases out of 623 bodies, death was caused by carbon monoxide poisoning.” As established by the investigation similar “gas lorries,” which were nicknamed “murder vans,” were used by the Germans for murdering peaceful Soviet citizens not only in Krasnodar but also in Kharkov. These vans, as testified by the German defendants in the present case and also by witnesses who witnessed the crimes committed by the Germans, are large closed trucks of dark grey colour, driven by Diesel engines. The vans are lined inside with galvanized iron and have air-tight folding doors at the back. The floor is equipped with a wooden grating under which passes a pipe with apertures. This pipe is connected to the exhaust pipe of the engine. The exhaust gases of the Diesel engine, containing highly concentrated carbon monoxide, enter the body of the van, causing rapid poisoning and asphyxiation of the people locked up in the van.

Diesel exhaust contains hardly any carbon monoxide, even under heavy engine loads. If the engines had simply been idling (no load on the engine) with the vehicles parked as suggested by the infamous unsigned letter from Becker to Rauff in Nuremberg File PS-501, the carbon monoxide levels would have been practically nil and the exhaust gases would have been harmless except for the heat. Death, if it occurred, would NOT have been from carbon monoxide at all. The Soviet, purported “medico-legal” investigations could have only been a sham.

RED Coloring of Corpses versus Blue

The self-styled “eyewitnesses” invariably described corpses after gassings as either “blue,” or “bluish,” or normal in appearance, and even “green.” People killed with carbon monoxide or cyanide appear, with rare exceptions, as a distinct “red” as soon as they are dead, even before death, because of the intense, bright-red coloring of the blood itself. See the [discussion](#) of this important topic on the CODOH Revisionist Forum and see also the two images on this page at the bottom, column left. Such dramatic errors in the testimony of key witnesses undermine the entire holocaust story—but, in reality, they have had no impact on the courts or on the acceptance of the holocaust myth in general. Defendants and their counsels rarely if ever want to challenge the myth in general and so, the holocaust myth persists. How can “eyewitnesses” possibly mistake red for blue or green unless they are all liars?

Note the bright “cherry red” or bright pink lividity to the hand. Carbon monoxide (CO) poisoning is a form of asphyxia that results when CO is inhaled, diffuses across alveoli, and binds tightly to hemoglobin. Poorly ventilated houses with faulty heaters, housefires, and motor vehicle exhaust are the most common sources. Even small atmospheric concentrations of CO are dangerous, because CO binds to hemoglobin 200 times more avidly than oxygen. Drowsiness and headache occur at carboxyhemoglobin concentrations between 10 and 20%. Levels from 20 to 30% can be fatal to persons with pre-existing cardiac or respiratory disease. Levels above 30 to 40% can be fatal to anyone. Similar lividity could be the result of cyanide poisoning or monofluoroacetate poisoning.

The most important [essay](#) showing the nearly perfect correlation between intense RED coloring in corpses and fatal carbon monoxide poisoning is originally from Austria based on the examinations of 182 corpses of people who died from CO. The answer to the question posed by the title of the essay is YES—and that means that nearly all of the evidence about the supposed deaths of more than 2 million Jews in the Reinhardt camps is rubbish. All of the “witnesses” from GERSTEIN on lied about the most obvious kind of evidence for such claims. The linked essays which follow help refute the claim that Germans would have ever used diesel exhaust for mass murder. Nearly two million Jews were supposedly murdered in Treblinka, Belzec and Sobibor with diesel exhaust. Although there are some rare, occasional deaths from diesel exhaust—any murder method based on diesel exhaust is preposterous and unbelievable when one understands what would have been needed. And yet, the claim that nearly two million Jews and countless others were supposedly murdered with diesel exhaust persists. The US government was still making this claim with regard to Sobibor just a few years ago in its never ending hounding of John Demjanjuk, the Ukrainian who had supposedly operated the diesel engine at Treblinka.

“However, in the medical examiner area, lethal CO poisoning from inhalation of diesel fumes from any make or model of on-road vehicle is virtually unheard of and contemporary medical literature does not report it.”

See page 1206 of the linked Griffin et al essay which follows:

Griffin, Ward, Terrell, Stewart: “[Diesel Fumes DO Kill: A Case of Fatal Carbon Monoxide Poisoning Directly Attributed to Diesel Fuel Exhaust ...](#)” (pdf)

([click icon, above, for audio commentary](#))

“Under light load the [diesel] engine produced highly acid fumes. Five hours’ exposure caused no deaths, but seven hours’ exposure did so.”

See page 55 of the linked Pattie et al essay which follows:

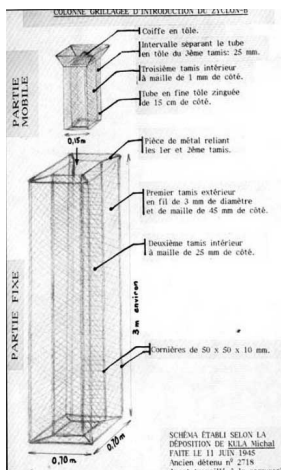

Pattie, Stretch, Burgess, Sinclair, & Edginton: “[The Toxicity of Fumes from a Diesel Engine under Four Different Running Conditions](#)” (pdf) ([click icon, left, for audio commentary](#))

The greatest danger from diesel exhaust is from the temperature of the exhaust which can be 200 degrees Fahrenheit at idle. If that is introduced into only a small space with people, death will follow eventually. But temperature is not a form of toxicity. Diesel exhaust is only marginally toxic for short exposures if the diesel engine is operating at or near its maximum load rating. That means it must be operating with a substantial load on the engine—and that is quite inconceivable for any of the diesel gassing scenarios that appear in the holocaust allegations, anywhere. One critical essay regarding diesel exhaust temperatures is: “[Diesel engine exhaust gas recirculation—a review on advanced and novel concept](#)” by Ming Zheng [👤](#), [📧](#), Graham T. Reader [👤](#) and J. Gary Hawley [👤](#)

Another important essay which illustrates the same nearly perfect correlation is: Thomsen, Asser H. and Gregersen, Markil, “[Suicide by carbon monoxide from car exhaust-gas in Denmark 1995–1999](#),” [Forensic Science International](#) 161 (2006) pp. 41-46. From page 44 we learn that of the 388 car exhaust-gas suicides during the period in Denmark, the “characteristic pink livor mortis was found in 353 (93.6% of those with livor mortis) victims. Nine (2.4% of those with livor mortis) victims had normal colored livor mortis; three of these had survived more than a day after the poisoning. The color of livor mortis was not described in 15 (3.9%) victims.” For 11 (2.8%) of the victims, putrefaction or burns had been so extensive that livor mortis was impossible to find.

The RED coloring appears b-e-f-o-r-e death and continues long after death. It arises when the blood carboxyhemoglobin (COHbG) level is greater than 30% in any white person, l-i-v-i-n-g or d-e-a-d. The coloring (cherry-red, bright red, or pink) occurs because the blood itself, just below the skin surface, becomes intensely bright red from the presence of the COHbG. If death is involved, the COHbG certainly did not jump above 30% upon death, or anytime thereafter—but rose gradually, while the victim was still breathing, above the threshold well b-e-f-o-r-e death occurred. A person can still be quite healthy except for that coloring if he is in good physical condition generally. They may not die until his or her COHbG level rises above 70%. In a sense, the red coloring is not *livor mortis* at all since the coloring does not mean a person is even dead;

persuade everyone that the homicidal gasings never happened! There simply is no credible "scientific evidence" for any of the gassing claims. By "scientific evidence" this author means objective evidence that has not been the product of corrupt judges and prosecution teams determined to convict at any cost, using methods the LSoDA and others still use to this very day to gain information and convictions (such methods are still common in police precincts throughout America).

The above figure shows a "Zyklon Introduction Column (Drahtnetz-Einschiebevorrichtung)" as it appears in Pressac's book to support the statement of Henry Tauber. It is not from any known German drawing. It is pure Rube Goldberg pseudo-engineering made for some of the post war trials by self-proclaimed eyewitnesses. The word itself does not fit the alleged function. There is a vast difference between "einschieben" and "fallen." *Einschieben* is translated as "shove in, push in, or slide in" and is widely used in German technical literature for its very specific meaning. But there is no pushing or shoving involved here.

According to Pressac page 484, "Inside this last mesh cage there was a removable can that was pulled out with a wire to recover the [inert] pellets from which the gas had evaporated."

One could not possibly have "shoved, or pushed, or even slid" that removable can into the mesh column, even if one had wanted to. It would have been like pushing on a string. One could have used the wire to pull the removable can out—but one could not possibly have used the wire to push, or shove, or slide it in. It simply would not have worked or have even made any sense.

The Germans would have called it something like *Drahtnetz-e-i-n-s-c-h-i-e-b-e-v-o-r-r-i-c-h-t-u-n-g* instead based on the fact that a similar stovepipe in the standard DEGESCH delousing chambers was called a *F-a-l-l-r-o-h-r*. See Figure 1, item #7 in *Zyklon-B and the German Delousing Chambers*. The strong similarity between the *Fallrohr* and the "Zyklon Introduction Column" suggests that the innocent *Fallrohr* had been the basis through misunderstanding, at best, of its lifesaving function. In *Autobiography* which was supposedly written by Rudolf Hoess and published by the Auschwitz Museum in 1978, German edition, we have on pages 50 and 51 the claim that holes in the ceiling were tied to a *Fallrohr* which allowed the granules to drop to the floor. As a mental exercise, just try to imagine calling the *Fallrohr* an *Einschiebevorrichtung* instead. Here we see how part of the hoax was constructed from a small piece of something else, which is true—but which makes no sense technically for homicidal gasings. Simply letting the basket hang a foot below the ceiling would have let the breathing of intended victims provide some air movement o-v-e-r the granules—but still NOT k-h-o-o-s-e-g-h the granules. Letting the granules drop to the floor would have made no sense either, and would have merely put them into a *cul-de-sac* with absolutely NO air circulation at all.

The technical solution is rather simple. Simply run the circulation fans (during the gassing itself, and NOT merely afterward as claimed again and again), that were supposedly there for venting anyway, with a basket of Zyklon-B granules placed in front of each circulation fan within the ductwork. The air which would have been presumably warmed already by the presence of so many naked, even panicky, Jews in the chamber would have been forced through the granules just as in any standard 10-cubic meter DEGESCH chamber. The "Zyklon Introduction Column" story is sheer Rube-Goldberg pseudo-engineering by people who have no clue as to what would have been involved and needed—or how comparatively easily it could have been done using the exact same technical concepts as were employed every day in Birkenau with Zyklon-B to keep Jews alive. For glib judges and others who also had no idea as to what was really needed, the "zyklon introduction column" mini-hoax was still good enough to hang totally innocent Germans.

HELLSTORM The Death of Nazi Germany, 1944-1947 by Thomas Goodrich (Sheridan, Colorado: Aberdeen Books, 2010), 376 pages, is an excellent, well-written book about the horrors and madness that befell Germany during WW2, especially in the final months. The mass rapes and murders inflicted by the Russians are well-known. Goodrich, however, spends much time and space on the atrocities, rapes, looting and murders and many other crimes perpetrated by GIs. In other words, the book is politically incorrect (PI) but invaluable to anyone who wants to understand what was really happening, especially to ordinary Germans. The book is also notable for its absence of the now, almost obligatory repetition of Holocaust atrocity propaganda. For Goodrich, it seems the GIs were not the "greatest generation" but possibly the "worst." From page 344: "While Winston Churchill expressed astonishment at the tragedy they had wrought in eastern Germany, little was said about the deliberate starvation of the rest of the Reich, and utter silence prevailed concerning the Allied torture chambers in Germany and Poland, the on-the-spot massacre of Nazi Party members and SS troops, or the death camps run by Eisenhower." Goodrich has, at the very least, helped break the walls of silence.

Haaretz: American Jewish Committee (AJC) demands more censorship in Germany, especially at Amazon.de. According to Germany's "Basic Law," there shall be no censorship in Germany. Censorship is also a violation of basic human rights according to Article 19 of the UN Charter. But since Jews are concerned here, everything is different. They are, after all, "God's Chosen People." "The books cited by the AJC, such as *The Auschwitz Myth* by Wilhelm Stäglich and a volume by convicted Holocaust denier Germar Rudolf, were available for sale on Amazon.de Friday afternoon. Denial of the Nazi Holocaust is a crime in Germany, punishable by up to 10 years in prison." (German) Rudolf, Ernst Zündel, Horst Mahler, Guenter Descker, David Irving and many others have already served lengthy prison sentences in Germany and Austria. No doubt, Jews would like to enlarge the list of their victims to include Amazon.de as well. Is it time for an anti-Jewish revolution, or what? Should the vile hypocrisy and bigotry that is at work here go unrewarded?

Haaretz: "Stalin dragged Hitler into war to force Europe into chaos and facilitate a communist revolution on the continent," Viktor Savorov is right, after all —and Hitler is acquitted!

Do the **corpses of AIDS Victims** look any better than the victims of cancer, or of typhus in a German concentration camp at the end of WW2? Well, just toss some corpses into a pile or pit and find out for yourself. As to WW2, the Germans tried to prevent typhus from occurring and/or spreading by imposing strict hygienic and sanitary conditions including fumigation of all clothing and bedding, showering and shaving of prisoners and workers and soldiers—so, they should NOT be blamed for the typhus catastrophe. Who would be so vile as to blame the Germans for the typhus epidemic which occurred in spite of the extreme German control measures? Who?

NEW The World's First Helicopters (Amazing YouTube video) National-Socialist Germany did it—once again! Let's see now—they also invented the jet plane, the rocket plane, the first reliable liquid-fueled rocket engines which are the basis of almost everything man has learned about the universe since WW2. And before that the Germans also invented the automobile, the gasoline engine, the diesel engine and so much more. Without those creative Germans, we would be trying to do everything with steam—and we would be choking on the smoke! **NEW**

"Two Times Dachau" by Ingrid Weckert This courageous historian is best known for her book *Fuehrerzeichen* about the November 1938 *Kristallnacht* pogrom against Jews in Germany. Her apartment has been raided many times by German police with countless materials including her computer confiscated for prolonged examination.

Basic human rights mean nothing in the postwar Germany. During one raid, Ernst Zündel was arrested in her apartment in Munich. A former tourist guide for travel agencies, Weckert reads and speaks Hebrew fluently. She has visited Israel many times and knew Menachem Begin and other Jewish leaders personally. In 1998, she was tried, convicted and fined DM3,500 (\$2,000) for the linked essay. When she had completed several years of work and exams at the University of Munich for her Ph.D. in history, she was told that she could only receive the degree after she formally renounced her prior revisionist works—"bigotry with a smile and an apology." She refused to renounce anything! Is there a Nobel Prize out there somewhere for her? Why not? See also *Dachau according to John F. Floyd with pictures*.

NEW Germany and FBI probe Holocaust Claims Fraud by thousands of "Survivors" "...it is really disgusting." **NEW**

NEW The Dachau Death Train "These people were stuffed in these cars. The cars had bullet holes all over them, evidently from strafing on the way to Dachau. Most of the GIs just stood there in silence and disbelief. We had seen men in battle blown apart, burnt to death, and die many different ways, but we were never prepared for this. Several of the dead lay there with their eyes open, a picture I will never get out of my mind..." Well, who had been strafing railroad cars all over German-occupied Europe, especially in the very last months of the war? Is it so hard to realize that the victims on this train were murdered by strafing from American or British fighter planes? As sick and hungry as the victims might have been, they were NOT murdered by the Germans. If the Holocaust myth were even remotely true, the Nazis would have disposed of those sick people long before that train journey. The Germans had been trying to keep them alive as best they could. The real mass murders were the Americans and the British. If the GIs at Dachau had really wanted to wreak revenge on the murderers, they should have turned their guns on themselves! They were the real fiends and mass murderers. **NEW**

NEW Assault on "German Village" The linked essay by Mike Davis underlines the criminal and cowardly nature of the Anglo-American air war against German civilians. **3-D exterior tour of German Village**, and **Interior Views of German Village (click on red stars on the three floor plans)**. There is no doubt that the mock-up village planned by a famous Jewish architect, Erich Mendelsohn, was totally non-industrial and non-military in nature. Drill presses and tools were NOT on the menu. It was even called a "village" so as to avoid any possible confusion as to the genocidal and cowardly intent. Besides, military targets tended to shoot back. (click image for enlarged view) Mendelsohn helped insure the accurate integration of the most ordinary civilian features such as furniture into the mix of flammable raw material. Oh, and BTW—it was the British who had begun the deliberate bombardment and mass murder of civilians, not the Germans, with at least five air attacks on Berlin before Hitler responded reluctantly with the first German air attack on any Allied civilians with the attack on London on September 7, 1940. The prior German air attacks on Rotterdam and Warsaw were aimed o-m-g-y at military targets which would otherwise have been attacked with ground artillery and with far more loss to civilians. Churchill it seems, had been most eager to impress his good friend Roosevelt (neutral-in-name-only) with British toxicity and frightfulness. No doubt, Roosevelt was deeply impressed and soon added America's vast resources and financing to help l-o-a-s-e even more women, children and babies.

If you still salute the American flag or believe America has reason to be proud of anything, read Mike Davis, *DEAD CITIES and Other Tales*, (New York: The New Press, 2002). The third chapter, "Berlin's Skeletons in Ula's Closet," pages 64-83 indicts America and Britain and brilliantly summarizes the evidence and postwar literature about the true Holocaust WW2. When one understands the crimes the western Allies committed, can one still imagine that those same genocidal monsters would conduct fair postwar trials of the people they had been trying to exterminate during the war? Surely, there is a need for far more objectivity and openness to defenders of the German people, and its leaders, and to the pleadings of revisionists...

Is it conceivable that a smart and oh-so-talented Jewish boy like Mendelsohn was somehow unaware that he was helping murder ordinary German civilians, "villagers," women and children by burning them to death? Maybe the Nazis had the right idea when they tried to expel Mendelsohn and all people like him from Germany? What do you really think, folks? **NEW**

Hitler Declares War on the USA - PART 2 - (Video) with excellent English subtext including a listing of the many flagrant and deliberate US acts of war against Germany committed long before Pearl Harbor. This video is a MUST see and read for anyone who wants to understand the criminal nature of America's war against Germany as well as the current string of US wars in the Middle East on behalf of the Jews, once again.

so, don't bury the victim just because he looks like a cherry. The victim might still be alive and breathing normally. The coloring is merely a sign of a high level of CO in the blood. It is an excellent indicator of extreme CO poisoning—but no proof of death.

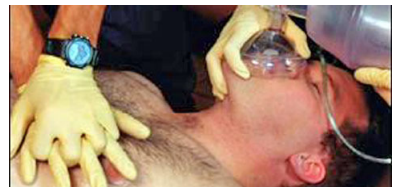

THOMAS KUES wrote two important essays recently which discuss the same evidence. The **first essay** is on CODOH and the **second essay** appears on pages 3 and 4 of **Smith's Report** for April, 2009.

Clearly, the "eyewitnesses" to mass gasings with engine exhaust (diesel or gasoline) in German camps are **all liars**. Since there is no other evidence of mass gasings for any of those camps, the related extermination claims should be dropped.

Green coloring of a corpse is an indication of putrefaction. According to Francis E. Camps editor, *Gradwohl's Legal Medicine*, Third Edition, 1976, page 88: "The first sign of putrefaction is a greenish discoloration of the lower abdominal skin which appears about the second or third day after death... Gradually the colour spreads over the whole abdomen, thence on to the chest, and by this time a putrid odour becomes apparent. By the end of the first week most of the trunk is discoloured, some areas being greenish and others more purple."

From the deposition of Henry Tauber given on May 24, 1945 as it appears on page 489 of Jean-Claude Pressac's *Auschwitz: Technique and Operation of the Gas Chambers*: "We found heaps of naked bodies, doubled up. They were pinkish, and in places red. Some were covered with greenish marks and saliva ran from their mouths. Others were bleeding from the nose. There was excrement on many of them. I remember that a great number had their eyes open and were hanging on to one another. The bodies were most crushed together round the door. By contrast, there were less around the wire mesh columns." The greenish marks could only appear on corpses at least two days after death which is consistent with a morgue where many corpses had accumulated over many days and NOT at all consistent with corpses of people killed only a few hours earlier.

monoxide poisoning

From The Journal of Forensic Medicine 19(2):171-174 (2012)

Victims who have been killed (not merely living patients who have been poisoned) with carbon monoxide or cyanide are, with rare exceptions, marked with a distinct, even "characteristic" red coloring over most of their bodies. The exceptions are the corpses of people, generally old and/or infirm, who died quickly before the carboxyhemoglobin or oxyhemoglobin levels could rise high enough to effect the color of the corpse. Let those who contend otherwise try to find photographic evidence from the forensic medical literature to support the Holocaust claims about "blue" or "bluish" or even "green" corpses. They will find, instead, only more evidence that the Holocaust story is a monumental hoax. If the Holocaust is not a hoax, then surely all of the forensic medical textbooks and atlases must be rewritten to include the "overwhelming" evidence from the Holocaust. We may as well turn science on its head. Why not?

The most important **essay** showing the nearly perfect correlation between intense **red** coloring in corpses and carbon monoxide poisoning is originally from Austria based on the examinations of 182 corpses of people who died from CO. The answer posed by the title of the essay is YES—and that means that nearly all of the evidence about the supposed deaths of more than 2 million Jews in the

Reinhardt camps is rubbish. All of the "witnesses" from GERSTEIN on lied about the most obvious kind of evidence. Except for such bad evidence, there is next to nothing to support those claims.

[Click the image left for an enlarged view.](#)

POISON GAS from Wood Chips—the Nazi Alternative Fuel

Throughout the war, Germany actually used carbon monoxide as an alternative fuel. All of the Holocaust gassing claims involving diesel engine exhaust, or even gasoline exhaust, are inherently absurd for that reason. As today's fuel prices rise, can anyone imagine using poison gas to drive their car or truck? Well, in World War 2 the Germans did precisely that—and so did the people of many other countries, even long after the war.

Noam Chomsky denounces Israel's "Sheer Criminal Aggression"

NEW **NETANYAHU: "America is e-a-s-y to Push Around"** NEW

George Galloway finally gets it right: "...the numbering of the days of the Zionist apartheid state of Israel!"

NEW Today, the US and Europe are struggling to escape economic collapse. The superficial successes of their societies since World War 2 were built with mountains of debt, so-called "sovereign debt." Before Hitler came to power in 1933, there were 38 different political parties competing intensely in what was without much doubt one of the most "democratic" societies ever—Weimar Germany. However, they could agree on little—not even where the borders of Germany should be or even whether there should be a single Germany rather than many separate states. The economics and world depression made everything even worse. The second biggest party in Germany was the communist party.

But, almost as soon as he became Chancellor in early 1933, Hitler began and achieved the greatest economic miracle and economic recovery of all time. Look it up. It should be in every economics textbook and nearly all of that recovery was due to w-i-i-h-o-u-t military spending. From 1933 to 1939, Hitler reduced German unemployment from more than 30% to only 2% whereas FDR, (supposedly a "great American" president) over the same period, reduced US unemployment from 24% to 19%. Big Deal! (see [Table 1 below—click to enlarge](#)). And even though Germany lost WW2, it was Germany's attack on the Soviet Union in 1941 which saved the world from a total communist victory before the US had its atomic weapons.

There is no better explanation, that I have found, of how **HITLER** achieved his miracle than the following short essay: [Life in the Third Reich by Friedrich KURRICK \(pdf\)](#). But, because this miracle was the achievement of **ADOLF HITLER** and the German people (Jews had no meaningful part in making it happen), it is a taboo subject. Jews had, in fact, been at war with Nazi Germany, albeit only an economic war, since March of 1933. Today's masters of world finance (mostly Jewish, btw) are loathe to even admit that **HITLER** ever achieved anything. Their alternative solutions for today's depression are to impose even more debt on the US and the world (great for their disastour, not everyone else). For all their financial creativity, they have nothing better to offer. Productive work is *unannehmt* to them. They live in a "post industrial" dream world (counting and "managing" other people's money) which is becoming a nightmare instead. The rest of the world has learned to "manage" it's own money without the Jews, or the English, or the Americans—thank you, anyway!

After **JESUS CHRIST** had tried to drive the money changers from the Temple, the money changers helped kill **CHRIST** just as they also destroyed **HITLER** and Germany. By contrast, the Chinese have learned from **HITLER** and have achieved a national-socialist miracle of their own with the hard work of their own people and w-i-i-h-o-u-t sovereign debt. America following the British advice of its most brilliant Jews has "bailed-out" the money lenders (Jews also—such a coincidence) with vast amounts of taxpayer money from future generations and new sovereign debt. Can it possibly end without world war and revolution? The American dream (built on the technological loot stolen from Germany) is over! Besides, China has nuclear missiles and will not be crushed or blackmailed easily. All who deny or ignore Hitler's economic miracle cannot possibly understand the chain of events that led to World War 2. They deserve the Great Depression Part 2 that is crashing them already. **NEW**

NEW Let's block Israeli ships from unloading their cargoes! Boycott Israel! "Free, Free Palestine—Don't cross the picket line" **NEW**

NEW [Map for the Postwar World from 1941 made by US Jews](#)—so audacious and almost unbelievable—and far broader in scope than the map in *Germany Must Perish!* by Theodore N. Kaufmann from March of 1941. Be sure to enlarge the map many times to see the proposed new world order (of 1941) in shocking detail including "Helthredland" which includes not merely Palestine—but all of Jordan as well. All countries of eastern Europe including Germany and Austria, except for the Rheinland, were to be "incorporated as equal republics of the U.S.S.R.," described as a "power for freedom and the maintenance of world peace." Why not? Hitler did not think it was a good idea (Roosevelt did, however) and we should all thank Hitler. **NEW**

HERESY: The Nazis and SS shared their meager food, medicine, housing and much more with the Jews—even until the very last days of the war! The misery and deaths of thousands, Jews and non-Jews, in many of the camps at the end of the war were the Allies' greatest achievements. Mass starvation of Germany (by naval blockade, initially) followed by disease had been among the principal goals of British, and later American, "strategy" from the beginning—and amazingly, some Jews died as well. Mass murder of innocent civilians from the air (bombing and strafing) was almost continuous during the last months of the war, weather permitting. The victors have nothing to be proud of. If Americans really want to find depraved "mass murderers," they need only look at themselves in the mirror. Ultimately, all that holocaust propaganda and "scholarship" really proves is that when Hitler tried to expel Jews from Germany forever, he certainly had the right idea. For many people, World War 2 was "the Good War" as Studs Terkel, a typical upward-winning Jew, tells us with his book of the same name. The truth is that Jews were the ultimate victors—but, what should seem more surprising is that Jews are still seen as the greatest "victims" ever. As far as what really happened to them, Jews have nothing to complain about. Some of them did die just like everyone else—and, why not? It was their war to begin with!

"After the Reich" by MacDonald reviewed with comments

NEW Mass Murder of German Civilians in Prague, May 1945 **NEW**

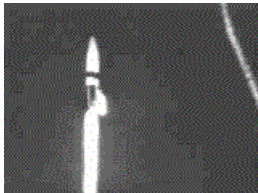

NEW Hitler in my Heart **NEW**

The monumental blindness and stupidity, unmatched barbarism and sadism of America and Britain nearly brought a new Dark Age upon a world dominated, not by them, but by the Soviet Union and communism. Although the Nazis and fascists lost their heroic struggle with hardly any resources against overwhelming odds allowed western civilization to survive. After 1945, it was the atomic bomb, beyond everything else, which allowed the west to survive—but before that, it was **ADOLF HITLER** who saved us.

Even if the holocaust story were true, the war crimes and atrocities committed by the US and Britain were far worse. The US and Britain as a matter of thoughtfully crafted "strategy," initiated the mass murder of huge masses of totally innocent women, children and babies by deliberately r-o-a-t-i-n-g them to death—and continued these sadistic and cowardly crimes long after there ceased to be any danger to the US or Britain. If the Nazis had murdered people in gas chambers, that would have been humane by comparison. In fact, however, Nazi gassings never happened! The Nazis were the "Good Guys." The anti-Nazis, especially the Americans, were the "Bad Guys"—and they still are. Holocaust propaganda is the continuation of anti-Nazi lunacy driven by the most rabidly racist and destructive people on the planet.

Of the many great technical and scientific achievements of Nazi Germany (some of which are spelled out on this website, lower column right) the one with the most profound consequences for the future of the entire human race is the **liquid-fueled rocket engine**, specifically the engine that propelled the V-2 rocket. Nearly everything mankind has learned since the war about the vast universe beyond earth's atmosphere (Hubble telescope, manned lunar landings, Mars and Voyager missions) is directly linked to that breakthrough invention—and it was an entirely German achievement made possible because of the enthusiastic support of **HITLER** and **Heinrich HIMMLER**. No one else in the world, other than the Germans, was even remotely close to developing anything like it. Even ten years after the war when America tried to launch its first satellite w-i-i-h-o-u-t the German engineers that it had in America, the result was an embarrassing fiasco—the failed Vanguard rocket of 1957. Although Robert H. Goddard had done important pioneer work in the US before the war, he never grasped the magnitude of the technical problems. Goddard's amateurish experiments are a series of failures for which even America soon lost interest.

Was the V-2 rocket engine the greatest invention since the wheel, or what? Men could at last walk among the stars. For the V-2 rocket engine alone, the world should rise in awe of Nazi Germany and the unmatched inventiveness and Faustian vision and genius of its people and culture. A world without the Germans would be dull by comparison. Do Americans even know that the automobile, the gasoline engine and the Diesel engine were all German inventions? Of course, not. A world without Germany was nearly achieved by the Jews and the Morgenthau madmen around Roosevelt. And their successors are still hard at work. Germany since the war is a false-gold-ridden shadow of what it had been. Germany's pseudo-democratic government since the war terrorizes and blackmails its own people to appease the Jews—and proudly admits to intending to do this forever. If Germany had won the war, there would be a human colony on the moon and probably far beyond as well. For America today, the question is why should one even bother when it can bailout AG, Goldman-Sachs and Citigroup instead. **NEW**

"The Sinking of the USS LIBERTY and Operation Cyanide from the BBC. Today, with five US carrier groups on their way to the Persian Gulf, the real powers in Washington want to trigger a war with Iran by provoking something so that Iran will have to fire the first shot. The Israeli attack on the Liberty provides a playbook for how it might be done. The US Sixth Fleet in the Mediterranean in June 1967 had launched nuclear armed aircraft not to rescue or defend the US Liberty—but, to make Cairo instead after the presumed Egyptian attack on the Liberty, an unarmed American ship in international waters. However, since the Israelis had failed to actually sink the Liberty and murder the entire crew, the botched operation had to be covered-up as best one could. Today, the American public must be tricked into believing that Iran is firing the first shot. There are no limits to **combined US and Israeli treachery**. The US Navy may pay a high price but that is what the Nazis is there for. Remember Pearl Harbor, Tonkin Gulf and the attack on the USS Maine in Havana Harbor, anyone? Just send lots of US ships into Iran's water and hope for the best! Something will surely happen so that American Jews will vote democratic again in November. Democracy is wonderful!

NEW War with Poland? Why? **NEW**

NEW Jews Cheered as Soviets Crushed Poland **NEW**

JR's Books and Commentary

Cl-Joe six-packs murdered German prisoners and wounded at Normandy—oh, my!! The donuts and coca-cola must have gotten lost at the beach. War is Hell! Maybe this explains Malmedy? Gen George S. Patton had actually called for killing ALL German prisoners and raping German women. His message to kill all prisoners was repeated often and he was not alone. See: Hirschson, Stanley P. *General Patton* (New York: Harper Collins, 2002) p. 374. For June 27, 1943, according to Captain Howard Cze, "He [Patton] said to kill and to continue to kill and that the more we killed then the less we'd have to kill later and the better the Division would be in the long run." If such words had been scripted for a psychotic Hitler or Himmler in a Hollywood farce, they would seem perfect. If they could be found in a Hitler or Himmler diary, the Jews would jump for joy. There is much more in Hirschson's Chapter Ten: "Atrocities amid the Triumphs," pages 363 through 406. On page 317 we have the quote from Patton: "We'll rape their women and pillage their towns and run the pusillanimous sons of bitches into the sea." Patton had helped set the stage for the Normandy massacres with at least five well-documented, prisoner massacres of his own in Sicily. He also helped set the stage for the treatment of members of the SS, especially those who had anything to do with concentration camps—the worst of those—whose "voluntary confessions" became the best evidence for the holocaust hoax. On page 593, Hirschson quotes a Hollywood American officer who had told Fred Ayer, Patton's brother-in-law, that "the Americans shot four or five prisoners for every prisoner killed by a German..."

The image to the left ([click image to enlarge](#)) shows Patton after he allowed someone to photograph him deliberately peeing into the Rhine River in March, 1945—an inspiration to us all! Patton's war crimes and incendiary speeches make his views after the war all the more surprising: **General Patton's Warning** Did Patton redeem himself before he was "accidentally" killed by one of his own soldiers in December, 1945? Decide for yourself. There may even be hope for you!

NEW Polish Atrocities against the German minority in Poland **NEW**

Friedrich Paul Berg's radio interview by Dr. Tomislav Sunic

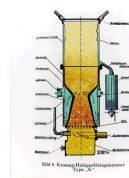

Ernst Zundel after years of false imprisonment for talking

German Holocaust Victims Murdered by Anglo-Americans and Jews

Wartime German-occupied Europe was desperately short of liquid fuels which had to be conserved for military combat vehicles. To deal with this genuine fuel crisis, most civilian vehicles used neither gasoline nor diesel fuel; they used a substance called "producer gas" instead. The producer gas was made in generators mounted on the vehicles themselves, generally near the rear. Solid materials such as wood, coke, or coal were burned in the generators with a restricted supply of air to yield the producer gas, called **Holzgas** (wood-gas, literally) in German. This gas was then drawn into modified diesel (compression ignition) or gasoline (spark ignition) type engines at the fronts of the vehicles by engine vacuum. The principal ingredient of the gas was carbon monoxide, 18% to 35%, which burned extremely well—but, the fuel was also extremely toxic. The usefulness of the producer gas as a fuel increased with the concentration of CO—which also increased the toxicity. That gas would have been ideal for mass murder if the Nazis had ever intended to gas anyone. The gas could have simply been called "poison gas," which it certainly was, but that would have also caused panic among the general public. Nonetheless, everyone involved with its use, either directly or indirectly, had to know for their own survival and safety that it was extremely poisonous and even explosive.

See the [Holzgas Generator](#) image.

The most shocking feature of this technology was that it was used throughout German-occupied Europe to drive more than **500,000 motor vehicles**. It was practically everywhere. Every auto or truck repair shop anywhere in German-occupied Europe repaired or worked on these poison gas generating vehicles at some time or other. In addition, all drivers of these vehicles were specially licensed only after rigorous training with a heavy emphasis on safety. They were all required by law to know that this fuel contained as much as 35% carbon monoxide and that already as little as 0.1% carbon monoxide was enough to kill—albeit only in about ten hours. They all, including loading and supervisory personnel, needed to know this for their own safety and that of the people around them—and even kept written reminders (the [Safety Guidelines](#)) in the glove compartments of all of these vehicles. And yet, nowhere have any Nazis ever been even accused of employing this superb and readily available, deadly gas to kill even one person. How ironic to say the least.

Producer gas is the key to unraveling the hoax—especially regarding the so-called "gas vans" many of which were supposedly built by the Swiss-Austro-German truck manufacturer "Saurer." "Saurer" built what were arguably the best producer gas trucks (**Holzgaswagen**) in the entire world. The fuel generated on such vehicles in the Imbert gas generators would have been ideal for mass murder. On the other hand, the engine exhaust from the diesel engines on the Saurer vehicles would have been practically harmless. Saurer diesel engines were possibly the most efficient and cleanest burning of that era, and decades later, became the basis for the phenomenal Volkswagen and Audi TDI diesel engines (bowl-in-piston) of today. Of course, after the war, if anyone had stepped forward to explain just how thoroughly stupid the diesel-exhaust gassing claims were because of the alternative poison gas they would have merely put their own neck in the noose. And so, the insane claim that diesel exhaust was used to murder millions persists to this day.

Abb. 1. Saurer 5 BHf, mit Holzgasantrieb.

There is a fraudulent connection to Saurer, however, in the stories of the "gas vans" that were allegedly used in Russia to kill prisoners. The forged document is an infamous letter from Becker to Walter Rauff (an unsigned carbon copy only) which describes a "Saurer" vehicle parked with prisoners in the van. The exhaust from the engine (diesel most likely) was then supposedly directed into the van to kill the prisoners. The simple fact is that the fuel for any Saurer producer gas vehicle would have been vastly more toxic. For more about the gas van hoax, see [the work of INGRID WECKERT](#).

Holocaust historians such as **RAUL HILBERG** repeatedly claimed that the "killing centers worked quickly and efficiently" on an "assembly line basis" resembling the "complex mass-production methods of a modern industrial plant." But producer gas is never implicated or even mentioned by any of the holocaust historians. Surely, if the diesel gassing claims persist, one should also condemn the Nazis and Germans for being the most clumsy and inefficient mass murderers in the entire history of the world.

Even the smallest automotive distributors, and dealers, and repair shops were intensely involved in the maintenance, alteration, and retrofitting of existing vehicles with producer gas technology. A truck pulls into a small auto repair shop somewhere in Poland and the driver complains that his truck (**Gaswagen**) is just not performing right—not enough power. Well, let's see—the generator may be leaking, or the flapper valves may have been knocked out of shape, or the blower may have a burned-out motor, or there may be bullet holes from strafing by a low-flying enemy airplane or from artillery fragments. Would any repair shop turn the driver away and insist that they only repaired vehicles that still operated with liquid fuels—and NOT producer gas? Of course, not.

The abundance of producer gas and its intense development by every part of the German automotive industry from major vehicle manufacturers such as Mercedes-Benz and Volkswagen—including even German subsidiaries of Ford, General Motors and International Harvester, down to the smallest repair shops anywhere in German-occupied Europe—are all facts which thoroughly undermine the holocaust gassing claims. The intense development of this poison-gas technology is clearly spelled in the German automotive literature throughout the war; one has merely to look at almost any issue of **ATZ Automobiltechnische Zeitschrift** from the war to see many articles and advertisements showing the latest developments in this poison-gas technology. However, since there is NO connection to holocaust gassings, the postwar pseudo-historians have never bothered to even look at that literature. It undermines everything!

The "Eyewitnesses" Lied

All of the self-proclaimed "eyewitnesses" to the alleged mass gassings are, in fact, easily exposed as liars. And there are many new fraudulent "eyewitness" accounts as well. If one reads a dozen accounts even for the same location, one almost inevitably finds a dozen totally different stories except for, perhaps, one or two details. There is hardly any consistency among the eyewitnesses and yet, judges have consistently juggled the evidence—a bit of one story here, added to a bit of another story there—to make the most damning judgments as to what supposedly happened. The historians, most notably **RAUL HILBERG**, did exactly that. They cherry-picked the evidence; they ignored and even suppressed what was obvious lunacy, and retained whatever might be believed. Prosecutors and defense lawyers are entitled to do such "cherry picking" in order to prod witnesses during a trial—but historians have no such excuse. They have time to reflect and do rigorous research free of the constraints that are inevitable in all legal trials.

SS disinfection officer and **Obersturmführer KURT GERSTEIN** is still a major prop for the Holocaust myth—and yet, all of his statements are generally ridiculous. **HILBERG** had cherry-picked the so-called "Gerstein Statement," as he actually explained when he was on the witness stand at the trial of Ernst Zundel in Toronto, Canada in 1988. **HILBERG's** use of **KURT GERSTEIN** is a prime example of the shoddiest scholarship imaginable—but **GERSTEIN** was, and still remains, the best reference **HILBERG** has.

The focus of **GERSTEIN's** "statements" was on diesel exhaust from mass murder in Belzec and Treblinka. Although he wrote about personally delivering Zyklon-B to some of the camps, he gave no specific information about Zyklon-B gassings even though that would have been the logical focus for his expertise. As a German disinfection officer he would have been extremely familiar with the widespread German use of Zyklon-B to save millions of lives especially in the east where typhus raged throughout the war and for years after the war as well.

FIGURE 18. Scene confronting rescue workers shown entering air raid shelter some time after a raid. Victims succumbed to carbon monoxide.

Image (above) with caption from: U.S. War Dept., U.S. Strategic Bombing Survey -- Medical Branch Report, "The Effect of Bombing on Health and Medical Care in Germany," (Washington, D.C.: October 30, 1945), page 23.

At the same time that they were portraying themselves as totally innocent victims of Nazi persecution and even extermination, Jews worldwide were actively promoting the mass extermination of innocent German civilians. The Germans in the above photo were murdered in their bombshelter by the first German air attacks on Hamburg in 1943. [Click the image for more images.](#) The deliberate carpet bombing of cities is a form of mass extermination! It was the British, and NOT the Germans, who began the deliberate bombing of civilians as early as May 11 of 1940 to which Hitler and Germany responded in kind only by September 7, 1940—nearly four months later and after five major British air attacks on Berlin. Already on August 24, Churchill had bragged to the British public that British airmen were bombing German cities almost every night. Hitler, after repeated appeals to the British for peace and sanity (NO surrender of Britain was demanded at all), had no choice but to respond with similar air attacks: nothing else made the slightest impression on the British. The nature of the German reprisals was, as expected, totally distorted by the American media which included lying journalists like Edward R. Murrow of CBS which was run by Jews (CEO: William F. Paley). The fact that it was the British who had begun the air war against civilians is still largely unknown. The first major crack in the myth about who started the air war against civilians is the most recent work of Patrick J. Buchanan, *Churchill, Hitler, and the Unnecessary War*, (2008). No doubt, Churchill knew perfectly well that his initiation of these cowardly air attacks would be portrayed sympathetically in the American press and that when the Germans responded in kind, they would be portrayed as monsters. He also knew President Roosevelt's thoughts and that he would support the British terror campaign.

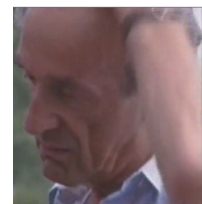

Goodbye America! by Dr. Lasha Darkmoon Although the Middle East is not a major focus of this website, the worsening disaster there is a direct result of WW2 and the Holocaust madness and terror which is actually getting worse—no doubt, as a bipartisan response to Holocaust revisionism. The cartoon to the left illustrates how concepts which might seem fundamental to our civilization are turned upside down. Of course, *zionism is a form of racism—but so is Judaism.* When Jews insist, as they invariably do, that Judaism is NOT racism—they are simply lying! The daily violence and terrorism against Palestinians is also "violence" and "terrorism"—but, is condoned by the US. American politicians know they will lose their generous funding from pro-Israeli lobbyists if they dare to say even one critical word about Israel, ever!

Adolf Hitler talks about Czechoslovakia, September 12, 1938 (auf Deutsch with English subtitles) – on YouTube – [Part 1, Part 2.](#)

The linked speech above may be Hitler's best. It is still relevant today because of the oppression of the Palestinians which Hitler discusses as well at the end of Part 2. Germany could not tolerate the oppression of fellow Germans in Czechoslovakia—and rightly so. Will the muslim world tolerate the oppression of the Palestinians indefinitely? Of course, not! One of Hitler's points was that the US and Britain were so selective in their advocacy of "democracy." For them, it was perfectly OK to deny freedom and democracy to the Juden Germans just as it is perfectly OK for the US and Israel today to deny freedom to the Palestinians, especially those who dare to support Hamas and its election victory. A major war with Iran is far more likely than the emergence of any independent Palestinian state—even though the US has been paying lip-service to the "sanctions" on Israel? Of course, not! The US is still shackled hand-and-foot to the racist and predatory madness of the Jews, just as it was in 1938.

BREAKING NEWS Is Elie Wiesel the greatest LIAR of all time, or what? Miklos Gruner insists that wily Elie is an impostor. Gruner, himself a "survivor" of Auschwitz's Monowitz plant, spells it all out in his book: [Stolen Identity \(in English\)](#). Can anyone imagine a teenage runt like Elie Wiesel actually doing the heavy work that would have been required at a petro-chemical plant like Monowitz? I can't.

If there is, or ever was, a tattoo on Elie Wiesel's left arm—it is NOT visible on this image from a [YouTube video](#) nor anywhere else to our knowledge. [Click the image for an enlarged view.](#) The number A-7713 should be visible in a photograph or video somewhere. Wiesel is the Bernie Madoff of the Holocaust racket and scam. It is vastly bigger than ENRON. When he isn't singing and performing at DAVOS World Economic Forums, Elie Wiesel is somewhere calling for the "imprisonment" of people who dare to challenge or deny the "Holocaust." Wiesel is a bigot with blood on his hands! No one personifies the hoax more than Elie. He is the no. 1 hoaxter and lunamonger of all time. For more images of Elie's arm, see [the link at CODOH!](#)

New evidence has emerged that Elie Wiesel was not even at Auschwitz during the war, ever, and that Elie Wiesel had simply assumed the identity of a much older relative who had been there. A recent [essay by Carlo Mattogno](#) presents the evidence casting the most serious doubts about everything Wiesel has ever claimed about his self-described experiences at Auschwitz and Buchenwald. Perhaps we now know why Wiesel never visits Auschwitz for those, now annual, liberation events in January. The evidence has emerged because of the courage and determination of [Eric Hunt](#), who is waging a great legal battle with Wiesel. Will Wiesel return his Nobel Prize money and apologize to his countless victims, especially the German people, for his hateful lies? Time will tell! There is even a [new video for Wiesel fans](#).

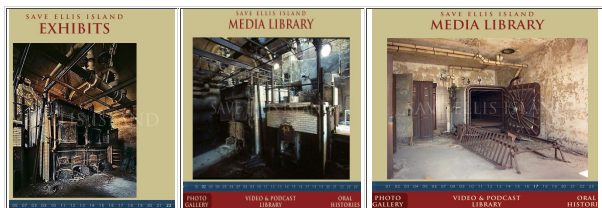

Holocaust by Bombing Discussion Forum (auf Deutsch)

The Planned Mass Extermination (auf Deutsch)

[IRONLIGHT website](#)

To appreciate the disaster that Germany and much of Europe were dealing with, in large part due to the Anglo-American terror bombing—one should read [Earth-Burial and Cremation](#) about disease and the necessity for cremation in nineteenth century America during a long period of peace and prosperity. In post-Civil War America until at least 1890, at least 10 per cent of America's fatalities were directly attributable to the spread of diseases from non-cremated corpses, generally through contaminated ground water and drinking water. A. G. Cobb, the author, believed cremation was a necessity and that traditional burial should be banned.

One reason the "Holocaust" has been sold so successfully to the public is because of the general ignorance about the public health disaster Germany dealt with during the Second World War. That disaster was compounded by the Anglo-American terror bombing and strafing of civilian targets, especially in the last months of the war. Nazi Germany should actually be lauded for its advanced crematory practices and public health measures in the concentration camps and elsewhere.

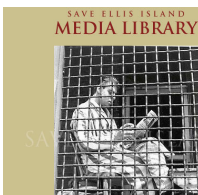

The above images are all from Ellis Island as it can be seen today, albeit only with special permission since what actually occurred in the southern part of the island, the quarantine area, is generally taboo. Ordinary tourists are NOT allowed to see these areas yet, and may never see them. Although tens of millions of dollars have been raised and spent for Ellis Island's restoration generally, the money to "restore" these areas of Ellis Island seems unavailable. The images are from the "laundry building" which also had a huge brick chimney (far larger than needed for any laundry). The images appear on the ["Save Ellis Island" website](#). Although there are no identifying captions for these images, the image on the extreme left looks like a large crematory oven to perform at least two cremations at a time. The middle image shows what also looks like a crematory oven (on the left) for two cremations at a time. The image on the right is a typical autoclave for sanitizing laundry just as at Birkenau's "sauna" and elsewhere. If one had mislabeled these images as "images of Auschwitz," few people would have any doubt that the images represented something "horrific" or "evil."

[Click on any of these images to see an enlarged view](#)

The image to the right is also from Ellis Island but from the time when the island complex was actually used to process immigrants to America, and quarantine those who might be carrying any number of contagious diseases, and/or treat them as well. Note the **striped** uniforms that the two "prisoners" are wearing and also the substantial barrier to confine these people. If someone had mislabeled this image as an "image of victims at Auschwitz waiting to be gassed," who would dare to even doubt that it was "evidence," or even "proof," of Nazi bestiality. Were there also medical experiments at Ellis Island? If not, why not? New experimental procedures and medications are entirely normal for all major hospitals throughout the world.

According to Sharon DeBartolo Carmack, *The Family Tree Guide to finding your Ellis Island ancestors*, (2005), page 102: "If you have a relative who was born or died on Ellis Island, the event should be recorded among the New York City (Manhattan) birth and death records. The death record should tell you if the relative was cremated on the island, or if the body was removed for burial and where interment took place." According to page 101: "Ellis Island had its own hospital, contagious disease ward, mental ward, autopsy theater, morgue, and crematory..." Dangerous contagious diseases included trachoma and pulmonary tuberculosis. Loathsome diseases included favus (scalp and nail fungus), syphilis, gonorrhea and leprosy. Those who were deemed unfit for observation or recuperation underwent daily delousing, where immigrants were stripped naked to have their clothing fumigated. During the Island's history, more than 3500 immigrants died on the Island.

The statements of Dr. Prof. **WILHELM PFANNENSTIEL**, a world-renowned professor of hygiene, in numerous post-war court appearances are incredible also. Only the smallest portion of his testimony ever appears anywhere. The statements of second-string "eyewitnesses" such as **FILIP MÜLLER** (*Eyewitness Auschwitz: Three Years in the Gas Chambers*) or **RUDOLF VRBA** are even worse than that of **GERSTEIN**. In his most famous book *Night*, **ELIE WIESEL** neglected to even mention gas chambers anywhere in his book. According to Wiesel, the Nazis committed mass murder of the Jews by simply marching the victims directly into flaming pits—in other words, there was no need for gas chambers.

Pro-Nazi Collaboration by Elie Wiesel and hundreds of thousands of Jews

Although **ELIE WIESEL** is today the poster-boy of the "Holocaust," he clearly "chose" to collaborate with the Nazis in January 1945 rather than be "liberated" by Soviet troops advancing on Auschwitz. Although he has become a kind of rock star at Davos economics conferences with his "moral voice," even [singing Sholom Aleichem in Yiddish](#), he never attends the, now annual, Auschwitz liberation celebrations in Auschwitz in January. The fees are not as good, perhaps?

New evidence has emerged, however, that Elie was not even at Auschwitz, ever, and that Elie Wiesel had simply assumed the identity of a much older relative who had been there. A recent [essay by Carlo Mattogno](#) presents new evidence casting the most serious doubts about everything Wiesel has ever claimed about his experiences at Auschwitz and even Buchenwald.

According to *Night*, it was in January 1945, just before the first Auschwitz "liberation" event, that both Elie and his dad trekked west with the Nazis in a terrible winter on foot **by their own choice** and assisted the Nazis during the last months of the war. They had both, just as many tens of thousands of other Jews, chosen in effect to c-o-l-l-a-b-o-r-a-t-e with the Nazis and work (no free ride waiting in a *Gasthaus*) to defend the *Reich*. Some of Wiesel's exact words in *Night*, paperback edition (Bantam Books, 1960) page 78 are:

"The choice was in our hands. For once we could decide our fate for ourselves. We could both stay in the hospital, where I could, thanks to my doctor, get him [the father] entered as a patient or nurse. Or else we could follow the others. 'Well, what shall we do, father?' He was silent. 'Let's be evacuated with the others,' I told him."

Elie's tale in this regard is corroborated by other "survivor" accounts including that of **PRIMO LEVI**. In Levi's book *Survival in Auschwitz*, we have his words for January 17th, 1945:

"It was not a question of reasoning: I would probably also have followed the instinct of the flock if I had not felt so weak; fear is supremely contagious, and its immediate reaction is to make one try to run away."

The Jews on "Schindler's List," just thirty miles to the east of Auschwitz, also chose to collaborate and went west eagerly also rather than hang back, or hide, or go east to be "liberated" by the Soviets. Their last months of the war were spent in what is now the Czech Republic making ammunition (all supposedly "defective and useless" by their postwar accounts) for the Nazis until they were "liberated" by Soviet troops in May of 1945. Of course, they could have been "liberated" six months earlier and put to work making ammunition for the Allies—but they had all chosen to collaborate with the Nazis instead.

The vast majority of the people who entered Auschwitz "survived" because there was absolutely NO extermination program. No one had even tried to kill them. Clearly, the Nazis could NOT possibly have been mass murderers as many of those same Jews alleged, **WIESEL** especially, after the war.

If **OSKAR SCHINDLER** had really been a clever savior of his Jewish workers, he could have simply found any number of places for his favorite 1,000 Jews (the chosen among the chosen) to hide from the SS for a few days until Soviet troops arrived and "liberated" them all. But he and they chose instead to flee west with the Nazis and SS, even going to or past Auschwitz just thirty miles to the west from Krakow and Plaszow. In effect, they ALL chose to collaborate instead of be "liberated" by Soviet troops who were so near. "Liberation" is what supposedly happened, after all, to the Jews who were NOT on Schindler's List. Is there any doubt about that? And those "liberated" Jews did not have to fear Auschwitz or any other horrors at the hands of the Nazis once they were "liberated" by the Soviets—right!!

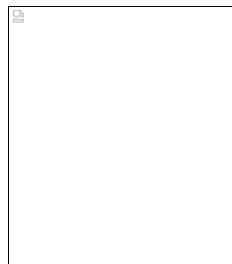

We also learn from Israeli Holocaust historian professor [Israel Gutman](#) that Jewish prisoners actually joined the march voluntarily. Here is testimony taken from Gutman's book *as given by Gilad Atzmon: 'One of my friends and relatives in the camp came to me on the night of the evacuation and offered a common hiding place somewhere on the way from the camp to the factory. ... The intention was to leave the camp with one of the convoys and to escape near the gate, using the darkness we thought to go a little far from the camp. The temptation was very strong. And yet, after I considered it all I then decided to join the march) with all the other inmates and to share their fate' from Israel Gutman (editor), *People and Ashes: Book Auschwitz - Birkenau*, (Merhaviva 1957) page 168. In commenting about this passage from Gutman, Gilad Atzmon has said: *"I am left puzzled here, if the Nazis ran a death factory in Auschwitz-Birkenau, why would the Jewish prisoners join them at the end of the war? Why didn't the Jews wait for their Red liberators?"**

Isn't it rather obvious than no in his right mind wanted to be "liberated" by the Soviets. That is just one dirty little secret that is buried in the Jewish Holocaust fables. Compared to the Soviets (America's greatest allies), even the Nazis and the SS from Auschwitz (the worst of the worst?) were preferred by the "survivors" of the mass extermination of more than a million Jews. It makes no sense at all, especially when one realizes how many Soviet leaders and officials were Jews also. Millions of Palestinians fled in terror a-w-a-y from the Israelis (not toward the Israelis!!) after the deliberate murder of merely hundreds, perhaps a few thousands, at Deir Yassin and elsewhere. At Auschwitz, a million Jews had supposedly been murdered by the Nazis practically in front of the eyes of the "survivors." And yet, those same "survivors" still preferred to endure the hardships of wartime travel in the depth of winter with, and continue to work with and for those very same Nazis—supposedly the greatest murderers of Jews in all of human history. It is unbelievable!

Did those "Auschwitz survivors" think, if they went west with the Nazis, they could at some point simply skedaddle over to the western Allies and offer themselves as witnesses to Nazi barbarism?

Did they think the Nazis would really let them escape if they were worried about what these Jewish "survivors" and "eyewitnesses" might have to say? Clearly, what was happening was totally different from the horrible fairytale we have been given since the war. No doubt, the Jews went west with the Nazis because they knew the Nazis would keep them alive as best they could. The greatest danger they faced on their trek west was Allied bombing and strafing—and NOT the Nazis or SS at all.

The Klaus Zwilsky Scam

A photograph of the [happy Holocaust survivor Klaus Zwilsky](#) reminds us that Jews were easy enough to find in Nazi Germany, even throughout the war, and even in Berlin. Smiling Klaus lived in one of the most unique and unusual safe havens in full view of the Gestapo.

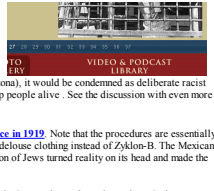

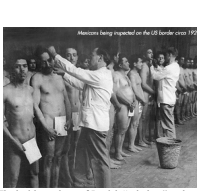

Few people realize that the Nazis allowed a Jewish hospital staffed by Jewish medical personnel and Jewish administrators to operate in Berlin—the heart of the Third Reich—throughout the entire war. The strange reasons behind this situation are presented in [Daniel](#)

including some 1,400 children..."

The shocking truth is that Nazi procedures at Auschwitz-Birkenau, Dachau, and elsewhere were essentially the same as those used later by the Germans in WW2 except that the cubic procedures used steam to delouse clothing instead of Zyklon-B. The Mexicans had the decency and good sense to recognize that it was all for their benefit whereas the later generation of Jews turned reality on its head and made the lifesaving ordeal into the greatest mass murder hoax ever.

A detailed description of the delousing procedures was actually given by the [US Public Health Service in 1919](#). Note that the procedures are essentially the same as those used later by the Germans in WW2 except that the cubic procedures used steam to delouse clothing instead of Zyklon-B. The Mexicans had the decency and good sense to recognize that it was all for their benefit whereas the later generation of Jews turned reality on its head and made the lifesaving ordeal into the greatest mass murder hoax ever.

The hard squawking of Jewish "scholars" and medical doctors (far too many to be even named here) regarding the "holocaust" is outrageous. Ultimately, the Jews only condemn themselves. In the meantime, however, countless Americans will die fighting in foolish wars far from America *"to protect Jews from another holocaust."*

B. Silver's book *Refuge in Hell: How Berlin's Jewish Hospital Outlasted the Nazis*. The book details how the 800 or so Jews lived in the hospital and survived.

"We didn't know at the time," he said, that the Nazis were systematically executing Jews. "You find out all these things afterwards." Yes, folks—a f-t-e-r the war. During the war itself and living in the very heart of the Nazi state, he never even imagined that there was any kind of extermination program of his fellow Jews. Is that amazing, or what? Soviet troops reaching Berlin in April of 1945 were so surprised to find any Jews alive in the city at all.

Klaus, the son of the hospital's pharmacist and a hospital administrator, lived at the hospital with his parents all through the war. With the collapse of the Third Reich in April 1945, Klaus Zwitsky was finally able to celebrate his Bar Mitzvah — the first one held in post-war Berlin. The real reason for why Klaus "survived" is that the Nazis never tried to kill him in the first place; they actually wanted him and the 800 others Jews to survive. But not to worry, Zwitsky's status as a "survivor" was never challenged and he spent the next **five decades as a bona fide survivor** with all the rewards from German taxpayers that go with such status. Is the *Shoah* a fantastic business, or what?

ZYKLON-B: the misunderstood Lifesaver of Millions

RUDOLF VRBA achieved fame for his part in writing the famous VRBA-WETZLER Report of April 1944 on the basis of which many Holocaust fanatics insist America should have bombed the tracks leading to the gas chambers of Auschwitz. One book which promotes this bit of lunacy is *The Bombing of Auschwitz* edited by NEUFELD and BERENBAUM, 2000. That book contains some of VRBA's claims on pages 242-248. According to VRBA and WETZLER, see page 244: *"After three minutes everyone in the chamber is dead."* That never happened.

Anyone with any expertise on the subject, and there were many experienced experts in the US where gas executions were already quite common at that time, could have explained that gassings of the sort imagined by VRBA and others with Zyklon-B would have taken far, far longer than three minutes. At least two of the last eleven gas chamber executions in the US over the last thirty years (Walter La Grand, 1999, Florence AZ, Ricky Sanderson, 1998, Raleigh, NC) took 18 minutes to kill their victims in well-designed, cyanide gas chambers with a rapid and highly concentrated release of cyanide gas. It took 17 minutes to kill David Lawson, 1994, Raleigh NC.

Zyklon-B by contrast releases its cyanide so slowly that more than half-an-hour is needed for most of the cyanide to escape the granules—and then in addition, far more time (four hours—see below left) is also needed for the cyanide to disperse by convection throughout any gas chamber not equipped with circulation or *Kreislauf*. In addition, it takes about 2-1/2 hours for nearly all of the cyanide to escape from Zyklon-B at room temperature once a can has been emptied. That should give everyone a good general idea as to how slowly cyanide escapes from Zyklon-B—especially when compared with the pot method which releases nearly all of its cyanide within about five minutes, probably a lot less. After just three minutes (the alleged Nazi mass execution time), the escape of cyanide from the Zyklon-B has barely even begun, the vast bulk of the cyanide is still escaping regardless of how large, or small, the initial dosage of Zyklon-B granules was. Merely opening the doors after three minutes, or even 30 minutes, even with a fan running during venting will not provide good ventilation of the corpses at all since more cyanide is still escaping the granules. Unless the ventilation of the corpse-filled room continues for at least 2-1/2 hours, anyone entering the chamber without a gas mask during that time will succumb to the cyanide that is still coming out of the Zyklon-B granules.

Since there was no real "evidence" (such as autopsies or functioning gas chambers) to support the charges, the Allies did the next best thing which was to follow an old police rule which is: *"if you have no evidence, try to get a confession."* The real basis of the "testimonies" cited again and again is the willful lying of self-described, Jewish "eyewitnesses" and lying on the part of some Germans under torture to either save their own lives or minimize the suffering of colleagues and family members. RUDOLF HOESS, for example, had to fear that his wife and children who had lived with him at Auschwitz would be tortured as well. The purpose of the Nuremberg trials was to perpetuate the racist propaganda against the German people forever using all the hype and hoopla possible. But even with all the sanctity of elaborate legal proceedings, with lawyers, stenographers, movie cameras, and CBS journalists in the court room—they could NOT make the nonsensical testimony any less nonsensical. The courts and torturers of the Grand Inquisitors of the middle ages could not actually make the sun go around the earth—even if everyone on earth had been persuaded to "testify" under oath that it did. The Allied courts in Nuremberg or in Guantanamo today are no better. Throwing revisionists in jail in Germany or anywhere merely shows, ultimately, how thoroughly depraved the hoaxers truly are and that the race war against the German people continues to this day, albeit by less violent means.

VRBA and WETZLER had obviously lied about the most important feature of their atrocity tale. Even if the intended victims had been **assisting the fiendish Nazis** by taking deep breaths of the cyanide vapors, the execution times would have been far longer because of the slow rates with which cyanide leaves Zyklon-B granules unless it is actually **forced out of the granules by warm air**. That forcing process (forced circulation or *Kreislauf*) was common in gas chambers for delousing clothing, even in Birkenau's delousing stations only a hundred yards from the crematoria—but, strange as it may seem, it has never even been alleged that such logical methods were ever used for homicidal gassings of thousands of Jews daily in Birkenau, or anywhere else. Nothing even remotely close to what would have been needed has even been suggested in any of the Holocaust gassing stories. Without the gassing angle, the rest of the Holocaust legend, even if it were all true, has no "uniqueness."

Für alle Zwecke der Schädlingsbekämpfung in Gefäuden, geschlossenen Räumen und Geschloßten wurden unsere hochwirksamen Gasrohre bevorzugt.

click for enlarged view and much more

Zyklon-B was widely used to fumigate clothing and countless other items which might harbor lice—which were the usual carrier of typhus to humans. Zyklon-B gas chambers were widely used in German POW camps, and transit camps, and labor camps *only* to keep people alive. The Auschwitz camp was so huge that it served all three purposes.

The infamous "Vergasungskeller"

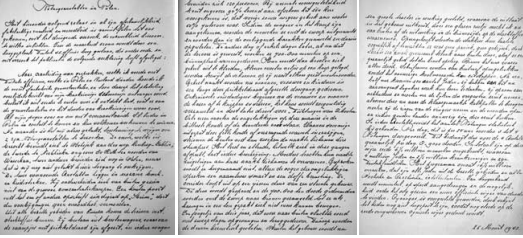

A single letter from SS-Hauptsturmführer BISCHOFF dated January 29, 1943 contains the word "Vergasungskeller" and is to this day the strongest evidence for the mass extermination hoax with cyanide (see Pressac page 211 [link]). The word has several possible translations, the most literal being a "cellar where gas is released, or generated." It has been given the most sinister meaning possible by the exterminationists who insist that it must have been a place where people were gassed to death. But, the word is actually explained by a related letter, also from Bischoff, dated December 18, 1942 (see Pressac page 210 [link]) in which the very first sentence says: *"Im Monat Dezember musste wegen Entlassung und Entwässerung die Arbeit an mehreren Tagen ruhen."* (During the month of December work had to be stopped for several days because of delousing and disinfection.) It is clear enough that the fumigations were occurring somewhere within the building—or else, why would there have been any need to stop work? The work was actually stopped for days (Pressac actually mistranslated the text) and delayed completion of this urgently needed crematorium. The surrender of five million Soviet soldiers to the Germans by this time would have been a major reason for completing these Kremnas as quickly as possible. But obviously, the need for "delousing and disinfection" was even greater.

Some historians using the shabby logic of HILBERG will, no doubt, continue to insist that the words "delousing and disinfection" were merely euphemisms for mass murder—but even Pressac insists (see Pressac page 227 [link]) that the first homicidal gassing occurred on March 14, 1943. This was just a day after the crematorium was finished—but nearly three months after life-saving fumigations had been carried out in the incomplete structure over several days. In other words, rather than being a place off mass murder, the *Vergasungskeller* was actually used to keep

SUPER threads on the [RODOH](#) and [CODOH](#) Discussion Forums — The most often referred to piece of "evidence" for the holocaust hoax is the "statement" of SS lieutenant Kurt Gerstein who insisted that he had actually witnessed homicidal gassings in April 1942 and had tried afterward to alert the world, even the Pope, but without any success. He seemed extraordinarily credible because he was not simply some irate Jew, or a Polish terrorist, but a German SS officer—even a "righteous gentile" according to the Israelis. A play "The Deputy" (*Der Stellvertreter*) by Rolf Hochhuth about Gerstein achieved international success. The RODOH thread shows how Kurt Gerstein confabulated his hoax about diesel gas chambers for Treblinka and Belzec over several years beginning at least as early as March 1943, initially without the diesel feature or **blue corpses**. We are now able to look into the mind of one of the principal holocaust hoaxers and see how his ghouly tale evolved.

The CODOH thread shows that one can indeed commit mass murder with diesel exhaust but, and this is so astounding, the lethal factor is the heat of the exhaust and NOT any toxic ingredient such as carbon monoxide, or carbon dioxide, or reduced oxygen or any combination thereof. "Diesel exhaust temperatures normally range from 120 to 720 °C for non-turbocharged systems and 100 to 600 °C for turbocharged systems." from page 897 of the referenced essay. Such temperatures will kill anyone. The time needed to reach these temperatures in a chamber will vary widely depending on the speed with which the gas is generated and on the amount of cooling before the gas enters the chamber. From a typical 1500 HP Soviet submarine engine, heating will be quite rapid especially at "fast idle." If the holocaust hoax persists, one should rename the chambers that supposedly used diesel exhaust as **"bo-a-t chambers"** rather than as "gas chambers." Of course, to use diesel exhaust for heating is about as when any controlled fire that is large enough would give the same result without any engine at all. For intense heat combined with extremely concentrated CO, nothing would have been better or simpler than the producer gas generators (*Holgas-generatoren*) on wheels that were ubiquitous throughout wartime Europe—see the discussions below and elsewhere on this website.

Kurt Gerstein's March 1943 Statement to J. H. Ubink of the Dutch resistance

Click the images above for enlarged views. For the text in English, check the RODOH link given above.

In the transcription above by J.H. Ubink of Gerstein's story as of early 1943, there is NO mention of a diesel engine, or "blue" corpses, or Professor Wilhelm Pfannenstiel, or the stopwatch that Gerstein supposedly used to time the entire process (32 minutes), or the lengthy delay of nearly three hours (2 hours 49 minutes) because the diesel would not start. Those details should have been just as well-known to Gerstein in 1943 at the time of this early "statement." Those details were added later and put into his five statements made in 1945. In the 1943 statement, the entire killing process occurred "within an hour" and there was NO mention of any delay because the engine, diesel or gasoline, failed to start. Clearly, the 1943 "statement" was still a "work-in-progress" (hoax-in-progress) with many more revisions to come. The five 1945 "statements" contain substantial differences also as shown by Henry Roques in *The Confessions of Kurt Gerstein*.

One should also look at the [tale of Yankiel Wiernik](#) and how that may have inspired Gerstein. If there were any truth to Gerstein's claim that 700 to 800 people were packed into a space of only 25 square meters (the same space as Wiernik claimed in his chapter 5 for only 450-500 people), most of those people would have surely been dead long before the engine (from a Soviet tank according to Wiernik —Chap. 5), even started. It was later in 1943 that the first public mention of diesels for mass murder in gas was occurred in the Soviet show trials at Krasnodar and Kharkov described in *The Verdict*. In general, revisionists include [Thomas Kues](#) and Henri Roques, have not taken the Ubink account seriously enough. Although the provenance is not as pristine as one might like, such perfection is too much to expect when one is mind-rund. The Ubink statement has little to do with what was happening in Poland—but everything to do with what Gerstein was concocting in his head, and when.

GENUINE MIRACLES OF THE HOLY HOAX
PALESTINE 1948
HOLOCAUSTS
AT A BALKON
OF MORALITY
UNTO ALL NATIONS

Tales of the Holocaust from 1988. Simon Sheppard and Steve Whittle, are currently in jail in Britain [http://www.herecatal.com](#) for distributing *Tales of the Holocaust* which is a scholarly comic book ridiculing the holocaust claims. The same liberal media which says cartoons about Mohammed are protected as examples of freedom of expression is totally silent about freedom to criticize the holocaust tales, or even supports the imprisonment of two brave young men who foolishly thought they had human rights also. When Sheppard and Whittle fled to the USA seeking political asylum in the USA (the freest country on the planet??), they were arrested instead and after many months of imprisonment returned to Britain where they were put in prison once again. Obviously, criticizing Mohammed is quite different from criticizing Holocaust stories. Click the image above-left for an enlarged view.

Nazi Shrunken Heads

David Duke's Video Critique of ENGLORIOUS BASTERDS

Thomas Blatt and the genocidal Diesel for Sobibor "It took up to 40 minutes for those inside to die. We heard the whine of the generator that started the s-u-b-m-a-r-i-n-e engine which made the gas that killed them." All submarine engines such as WW1 and through WW2 were diesel engines. The diesel mass murder hoax is still alive even if the hoax promoters are now uncomfortable with it.

Manufacturing Testimony against Demjanjuk in Germany (auf Deutsch) If Samuel K. is a "good boy" and helps convict Demjanjuk, Samuel K will avoid prosecution for his own involvement at Sobibor, go home, and die in peace. But if Samuel K. is uncooperative, he will spend what remains of his life in prison or in court. Such a deal we got for you, Samuel K!

Revisionism for Our Time from 1966 by Murray N. Rothbard

Juergen Rieger — An Attorney for Germany Support the NPD for freedom of thought and for Human Rights—even in Germany! No one has the right to imprison anyone for expressing their opinions—even if Jews are offended.

Third Reich Research

Hitler's Platterhof Speech of 26 May, 1944 is enormously important because with this speech Hitler reveals many of his secret thoughts and feelings just days before the Normandy invasion and before Germany's war became hopeless. Although the speech has been used by historians such as John Lukacs, its contents have been withheld for fear they will not serve the interests of the victors of World War 2. By publishing this carefully translated text, Clark and Heintz have ripped away the curtain of secrecy. This book is a must read for serious students of the war and the anti-German psychosis which continues to this day. List Price with contribution = \$35.00 in paperback.

"As Hitler shook my hand, a picture was taken. That was the happiest day in my life. For the first and last day in my life, I was treated as a human being. I could enter the front door of a bus seat in the front and talk to Germans. The American Olympic Committee forbade me to shake the picture. As I was back in America, I was not invited to the White House to celebrate the Olympic medals". ~ Jesse Owens

To see how the Germans and Nazis built real gassing installations with real gas chambers, look at the following [from Jean-Claude Pressac](#) about the beautiful reception building and connected gassing facility with 19 ten-cubic meter DEGESCH gas chambers:

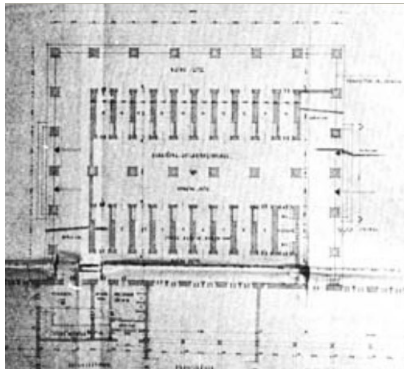

[http://veritas3.holocaust-history.org/a...0033.shtml](#)

[http://veritas3.holocaust-history.org/a...0034.shtml](#)

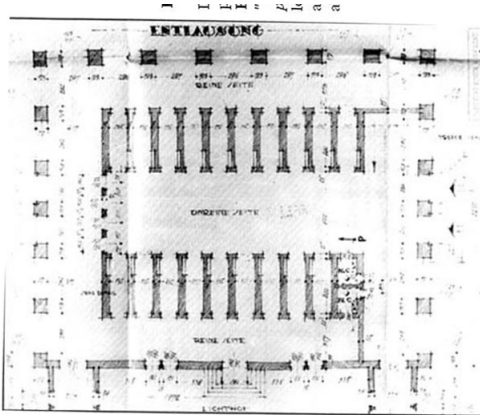

The image above is from Google Earth. Today, one can visit Auschwitz-Birkenau from one's own PC — and see it all. Look at the [linked image](#) to see the entire reception building at the Auschwitz Main Camp.

Note the e-p-a-r-a-t-i-o-n between the huge, odd-shaped reception building and the gassing facility (almost square). I did not know that this extraordinary building even existed any more—but there it is today, thanks to Google Earth surrounded by a parking area for the employees. It is NOT on the tour given to visitors although the reception building definitely is. No doubt, it would be far too difficult to explain that the SS used gas chambers to keep people alive. "Oh NO, how could that be possible?" Keep those tourists as stupid as possible, and for as long as possible. That beautiful reception building is the first building tourists visit today to get their personal tour guides, and brochures, and to eat in the basement cafeteria.

In **Drawing 2** above, from page 34 of Pressac, one can see the 19 stalls for standard DEGESCH gas chambers. Those chambers were each equipped with separate internal heaters and fans for thorough forced fumigating and venting. One can also see that the entire building had NO walls between the support columns so that the gas chambers, and clothes racks, were open to as much natural venting as possible as well afterward. What's more, the building used a "patio" arrangement so that carts could sit for as long as desired in fresh air before the clothing would be given back to the owners, or inmates of the camp.

The drawing above is from **Photo 8**, page 37 of Pressac. Carts with dirty clothes would enter the "dirty side" (*Unreine Seite*) of the building, (via roofed but open passage way, lower right) and be brought to the interior center of the building, and then pushed into the gas chambers. After fumigation and forced venting were all completed (one hour), the doors on the opposite side of the gas chambers would be opened so that the carts could be pulled out to the "clean side" (*Reine Seite*) and parked in the open patio areas for some additional natural venting. The carts would then be wheeled back into the reception building (via roofed but open passageway, lower left)—and the clothing returned, lice-free, to its original owners.

For some super, actual wartime photos of this stunning gassing facility, see: <http://veritas3.holocaust-history.org/a...0038.shtml>

BTW, that was how the SS and the Germans did things. The reception building and the gassing facility are probably, still today, among the most beautiful buildings one can find anywhere, especially in Poland. They are both awesome. By contrast, Poland—still today—is generally a horrible, third-world dump, really! The design and orderly flow through the delousing station also shows the great care that was taken, and needed, to protect people inside the reception building. There is nothing remotely like that for the Kremas and alleged homicidal morgues/gas chambers at Birkenau or Auschwitz 1. At Kremas 2 and 3, there is NO s-e-p-a-r-a-t-i-o-n between the alleged homicidal morgues/gas chambers and the rest of the Krema structures.

The Nazis and SS shared their food and medicine and much more with the Jews—even until the very last days of the war!

The horrible food shortages in Germany, long before 1945, were the direct result of the British blockade made much worse by the United States, even before Pearl Harbor. German farmers working in their fields were seen as "legitimate" targets by cowardly American airmen such as Chuck Yeager (as explained in his autobiography (*Yeager*, pp 79-80)). It was so much safer to strafe German farmers (for freedom and democracy, of course) rather than soldiers who had a nasty tendency to shoot back. Almost everyone was starving in Germany during the war. That was the major result of the typical British strategy, from the very beginning, of their "*Sitzkrieg*" strategy. The fiendish Nazis could have dramatically eased their desperate food situation by "exterminating" worthless, non-productive Jews like Anne Frank, Elie Wiesel and Ada Binke and many others—but they did nothing of the sort. They were accused of that after the war—but, in fact, they had shared what little food they had, even with the Jews. The Jews were NOT gassed or moved down as German prisoners had been by Patton's murderous thugs. In the historic video below, Ada Binke explains that the Nazis had taken the chocolate out of the Red Cross packages intended only for them (apparently, they left the rest). Oh, my—such fiends! If that story has any truth, perhaps some of the Nazis had indeed felt it was high time that Jews shared some chocolate with them, and rightly so.

The following image is from the US Government film: "**Nazi Concentration Camps**" which used only official military photographs and film footage gathered by the US Department of Defense for the war crimes trials. See: http://www.archive.org/details/nazi_concentration_camps

Although there were many thousands of dead at Belsen when the British took over the camp through a negotiated transfer with the SS, and although there were many thousands of sick and dying—there were also many prisoners who were quite healthy, some even fat and overweight. The most remarkable of these was probably **ADA BINKE** (Hadassah Rosensaft). Her appearance in the film begins 50:00 minutes from the start of the film and continues for exactly three minutes. She was so upset that the SS had removed the chocolate from the inmates' Red Cross packages. A bit less chocolate might have helped keep people alive. No doubt, there must be many International Red Cross records for the prisoners, including signed receipts from Jews, for all of the German concentration camps. Otherwise, the Swiss would have been helping the German war effort by feeding German guards and soldiers.

Mongole's "New Way of Killing"

The following text is from the *New York Times*, October 8, 1997: "Hadassah Rosensaft, 85, Dies; Saved Auschwitz Inmates."

In 1945, Dr. Rosensaft was an important witness for the prosecution at a war crimes trial before a British military court in Luneburg, Germany, of former commandants and staff members of the Nazis' Auschwitz and Bergen-Belsen concentration camps, where she had spent a total of 20 months. Her tattooed concentration camp number visible on her left forearm, she stood and identified 15 of the 45 defendants, who were charged with mass murder.

Hadassah Binke Rosensaft studied medicine at the University of Nancy in France, received her doctorate as a dental surgeon there in 1935 and practiced dentistry in her native city of Sosnowiec in southern Poland from then until August 1943, when she was sent to the Auschwitz concentration camp along with her parents; her first husband, Josef Preserewicz, and their 5 1/2-year-old son, Benjamin.

All but she soon died in the gas chambers there, but, as her son recalled, "because of her medical training, she was assigned to work in what was called the Jewish infirmary at Auschwitz, and in that capacity she saved hundreds of Jewish women" from the gas chambers.

people alive. These are just some examples of how life-saving activities—shaving of hair and showering are other examples—have been turned upside down and made to appear as "evidence" of mass murder, in other words, the extreme opposite of their true function. The hoaxers have nothing better. Out of necessity, the underground mortuary rooms also served whatever other purposes seemed most important—from simple storage, or as workrooms, and even as gas-tight bombshelters (with the legally-required peepholes in their doors) and with hand-operated ventilators.

Cremation and Incineration in Kremas 2 and 3 with POISON GAS from Coke

Cremation and crematoria are mis-used explain the fact that there simply is no forensic medical or scientific evidence (like autopsies) of any gassings. Supposedly, all of the physical evidence went up in smoke. How convenient for those who might otherwise be pressed for real evidence for their paranoid fantasy. Many thousands of dead bodies (from other causes, primarily disease) were found in the camps at the end of the war, but all of the "gassing" victims had been vaporized, supposedly.

Clay urns found at the Buchenwald concentration camp

Where one should expect huge crematory ovens, or incinerators to dispose of enormous numbers of bodies, with co-mingling of the remains and fuel ash—one finds instead, small crematory ovens designed to burn only one body at a time consistent with ordinary cremations as practiced around the world. [Click image to the left for an enlarged view.](#) The remains from corpses were put into individual urns and returned to family members. In other words, there was nothing at all like the "*assembly-line killing and/or disposal of bodies*" that has been alleged. To

appraeite the disaster that Germany and much of Europe, especially eastern Europe, were dealing with—one should read [Earth-Burial and Cremation](#) about disease and the necessity for cremation in nineteenth century America.

Cremation only makes sense if one intends to return a portion of the actual ashes of a corpse to the true family members; otherwise, cremation makes no sense at all. Cremation is distinguished from incineration by the fact that cremation, in the West, allows recovery of the deceased person's ashes free of the ashes from other corpses or of the fuel. The clean ash that results is totally worthless compared to the far greater costs of the coal, or coke, needed to produce it. The claim that the Nazis made fertilizer from the bones is a bad joke indeed. Crematory ovens are specially designed to allow recovery of ashes from one corpse at a time free of any other ash, either from the coal or coke used as fuel or from another corpse. Such a careful recovery of ashes only makes sense if one intends to return something from the deceased to the family. In other words, the purpose of cremation is to preserve, at least some, evidence. [Click image to the right for an enlarged view.](#) If one intended to merely destroy evidence of mass murder, incineration as is commonly practiced for garbage disposal would be many times quicker and more efficient in every respect, especially in terms of the amounts of fuel consumed. One could still gather enough ashes to fill urns and deceive family members but, oddly enough, it has never been claimed in any of the Holocaust literature that garbage incinerators were ever used for anything but garbage. Even the incinerators within Kremas 2 and 3 in Birkenau have never been implicated. The startling fact is that by practicing cremation the Nazis and the SS went to considerable lengths and expense to treat the dead with genuine respect even when many of the dead were Jews. See also [Documents F1 and F2 in Pressac, page 133.](#)

Clay pots for the ashes of prisoners who were cremated

A new perspective on the problems of mass incinerations come from the **foot-and-mouth epidemic in the UK in 2001**. Countless articles with pictures and videos help show the magnitude of what anything like the alleged holocaust mass exterminations would have entailed. At least [one video is helpful](#) for showing the enormous clouds of smoke generated by the fires.

A trench 250 yards long was dug and lined with straw. Wooden railway sleepers were then laid across the straw followed by cows with pigs placed in between. This whole site was then covered with 2 feet of straw, sprayed with 600 gallons of diesel and lit. The fire lit the day and night sky for 2 days and at the end only ash remained.

[Click the image left for an enlarged view.](#) The following quote describes the technique for a cattle and pig incineration in 1967:

[The pyre](#)

If all one wanted to do was save space and avoid burial, garbage incinerators or lime kilns or brick kilns would have been the logical choice—NOT crematory ovens. The garbage incinerators within Kremas 2 and 3 or even larger incinerators specially built for that purpose certainly could have done the job and far more efficiently in terms of labor, equipment cost and cost of fuel. The crematory ovens from Topf & Sons at Birkenau could only cremate one normal-sized body at a time. The reasons are fairly simple. If one puts more than one normal-sized corpse into a standard crematory oven, one is likely to make contact between a corpse and the firebrick. This must be strictly avoided because of uneven heating of the firebrick and subsequent exfoliation and rapid deterioration of the expensive, refractory fire brick. The essential difference between garbage incinerators and crematory ovens is that a garbage incinerator allows co-mingling of fly ash from the fuel with the garbage residue whereas a crematory applies the external heat indirectly to keep the cremains as pure as possible. A garbage incinerator can have the coal fire directly below the grating that supports the garbage as it burns. At the end of the process, the coal ash and the garbage ashes are all mixed together. That would have been intolerable for human cremation. But, if one were engaged in mass murder, why would anyone care?

Some of the drawings from Pressac which clearly show the location of the garbage incinerator are:

page 277 <http://www.holocaust-hist...ration/pressac0277.shtml>

page 278 <http://www.holocaust-hist...ration/pressac0278.shtml>

page 281 <http://www.holocaust-hist...ration/pressac0281.shtml>

page 283 <http://www.holocaust-hist...ration/pressac0283.shtml>

The drawings also show that there are no doorways to allow easy movement of personnel or corpses from the crematory oven area to the garbage incinerating area—except by leaving the building. Such doorways would be rather natural to allow personnel to move to all parts of a building without first leaving the building—but, here such passage has been deliberately obstructed. No doubt, the designers did not want any corpses to be treated as garbage, ever—an understated but clear sign of the respect with which corpses were treated, even if some of them were Jews.

From [page 488 of Pressac](#), we have the following testimony by Henryk Tauber about the *Muellerverbrennungsofen*, garbage incinerator ovens, and how they were separated from the rest of the Krema buildings:

A prisoner mechanic worked on their maintenance. Facing the entrance gate to the crematorium grounds, in the center of the building, was a wing [27] in which rubbish was burnt in an incinerator [U]. It was called "Muellerverbrennungsofen" (waste incinerator). It was separate, reached by going down a stairway [28, still visible in the ruins]. It was surrounded by an iron platform and was coal fired. The entrance [27a] to the waste incinerator wing faced the crematorium access gate. [The facade off this wing had, in addition to its entrance door with a transom window over it, two windows, one on the right [27b] and one on the left [27c] of the entrance. In the left corner of the entrance, there was an opening [27d] through which, from a walled-off area on the outside [29], the objects to be burned were passed inside. The incineration hearth [for hearths?] [M] for these things was [where?] to the left of the entrance and the firebox [G] on the right. I would point

He recalled that since sick inmates were sent to the gas chambers, she would do things like tell camp officials that the ill inmates were actually healthy, or get the sick women dressed and send them out of the infirmary.

In testimony at a United States Senate subcommittee hearing in 1985, she described the death of one inmate under the foot of the notorious war criminal Dr. Josef Mengele. She said that late in 1943, while she was working in the Auschwitz infirmary, a young woman was late for roll-call outside her barracks. Dr. Rosenzweig said Dr. Mengele "ordered her to come forward" and "knocked her down with his booted foot," then put his foot on her chest. He hummed an "aria from 'Madame Butterfly' and kept his foot there until the woman was dead" from suffocation. Dr. Rosenzweig testified: "He showed the SS men a new way of killing."

The above text is from page 2 of the NYT obituary at: <http://www.nytimes.com/1997/10/08/nyreg...mates.html>. The incredible anecdote about Dr. Mengele humming an aria from "Madame Butterfly" as he killed a prisoner was almost certainly concocted to feed the interest in Dr. Mengele in 1985. There was no mention of anything like that in [her testimony at the Beben Trial in 1945](#). For the US Senate in 1985, however, there seems to have been no problem at all with that absurd story. Aside from what her anecdote tells us about the gullibility and stupidity of the NYT and a US Senate committee, it also establishes Birnko-Rosenzweig as a pathological liar.

Holocaust "superstar," racketeer, perjurer and founding matriarch of USHMM. Although Ada-Hadasah Birnko-Rosenzweig is no longer with us, her glorious work is continued by her devoted son Menachem Z. Rosenzweig (born in Bergen-Belsen, of all places, in 1947). Rosenzweig continues the family business of hate and lying for profit and vast influence. If Menachem's claim that his mother had actually dressed up sick inmates and sent them out of the infirmary is true, then she contributed mightily to the spread of disease, especially typhus, inside the camps. For people infected with typhus (a reconvalescent disease), there are daily periods of several hours at a time without fever or chills when the vital signs seem quite normal to the casual observer. If one uses such periods to disguise the underlying presence of typhus, one is assuring the spread of the disease and the deaths of countless other victims. When the Nazis put such monsters as Ada Birnko into concentration camps, they certainly had the right idea. That the SS used people like Birnko to actually care for the sick shows just how desperate they were in the final months of the war. From the image left—[click image to enlarge](#)—it is obvious that Hadasah never lost her appetite for chocolate. She and her husband "Yossi" also had an enormous appetite for black marketing and the fabulous riches it brought to them—even before "liberation." Liberation by the British made everything so much easier. Instead of "evacuating" Birnko to the west with hundreds of thousands of other Jews from Auschwitz, the SS should have left her in Auschwitz to be gang-raped by the Russians. See also the [essay by Mark Weber from 1995](#).

The image left appears at the Bergen-Belsen Museum today with deaths for the early months of 1945. The date there corresponds quite well to the increasing intensity of the Anglo-American terror bombing and strafing in the late winter and early spring of 1945—and NOT at all to conditions within Bergen-Belsen generally. The same kind of graph can be shown for any of the western concentration camps.

The following notable letter appeared in the *Journal of the American Medical Association* (*J. A. M. A.*) in the "Foreign Letters" section on page 220 for May 19, 1945. The war had just ended.

Typhus Causes a Truce

By negotiations between British and German officers, British troops took over from the S.S. and the Wehrmacht the task of guarding the vast concentration camp at Belsen, a few miles northwest of Celle, which contains 60,000 prisoners, many of them political. This has been done because typhus is rampant in the camp and it is vital that no prisoners be released until the infection is checked. The advancing British agreed to refrain from bombing or shelling the area of the camp, and the Germans agreed to leave behind an armed guard which would be allowed to return to their own lines a week after the British arrival. The story of the negotiations is curious. Two German officers presented themselves before the British officers and explained that there were 9,000 sick in the camp and that all sanitation had failed. They proposed that the British should occupy the camp at once, as the responsibility was international in the interests of health. In return for the delay caused by the truce the Germans offered to surrender intact the bridges over the river Aller. After brief consideration the British senior officer rejected the German proposals, saying it was necessary that the British should occupy an area of 10 kilometers round the camp in order to be sure of keeping their troops and lines of communication away from the disease. The British eventually took over the camp.

According to Ben Shephard, *After D-Day: The Liberation of Bergen-Belsen, 1945* (2005) although 18,000 inmates died in Belsen before "liberation" by the British on April 15, 1945, as many as 14,000 inmates died a-f-r-e-e "liberation" over several months in spite of the general abundance of food and medical care and DDT. Did the internees who died before "liberation" look any worse than those who died afterward? Of course, not—but, there simply was no interest in photographing and publicizing the photos of those who died under British care.

Gas Executions in the USA

In preparation for the gas execution of **David Lawson** in 1994, one of the last gas chamber executions anywhere in the world, the following diagram was published to explain the procedure to the general public. It appeared in *The News & Observer*, Raleigh North Carolina, 11.6.1994, page 14A. Lawson had even offered to let his execution be televised live on the "Phil Donahue Show" on nationwide TV.

North Carolina's gas chamber.

How it works

Moments after the keys are turned, a trap door, beneath the chair's seat, opens. A container of poison drops into a container of acid.

One pound of Potassium cyanide, wrapped in paraffine
26 ounces of water and 12.6 ounces of sulfuric acid concentrate
The resulting fumes will be visible for a few seconds. Prison officials saw Lawson will be dead within 10 to 14 minutes after the chemicals mix.

After Lawson's heart has stopped for five minutes, the warden will signal for the number to be cleared. Ammonia, which will render the poisonous gas inert, will be injected into the room for 15 minutes. Prison staffers won't enter the room until 30 minutes later—and even then, they'll wear breathing apparatus.

I selected by the N.C. Law Enforcement Officers Association S chosen by Lawson.

The mask:
A leather mask is strapped over Lawson's face. The mask covers his face except for a nose hole.

The chair:
The chair Lawson will sit in as he dies was formerly the state's electric chair.

Previous executions in North Carolina under current law:

March 1984 James W. Hutchins
Nov. 1984 Velma M. Barfield
Sept. 1986 John William Rock
Oct. 1991 Michael McDougall
Oct. 1992 John S. Gardner

- first man executed in E.C. 367
- first gas chamber execution January 1936
- first gas chamber execution October 1961
- first electric chair execution March 1910
- first electric chair execution July 1938
- first lethal injection execution March 1994

Please note that the anticipated time to death was 10 to 14 minutes. The actual time to death was 17 minutes because Lawson deliberately held his breath in order to make a spectacle of his own execution. After the execution, the chamber was to be neutralized chemically with ammonia for 15 minutes and then vented for an additional half-hour before prison staffers, wearing gas masks, could actually remove Lawson's corpse. Readers should contrast this real scenario with the fantastic holocaust scenarios where thousands of people were supposedly murdered in as little as three minutes with the manual removal of the masses of corpses beginning immediately thereafter—without any comparable safety precautions. Some of the specially-assigned *Sonderkommando* were supposedly even eating and smoking as they removed the corpses—obviously, without even wearing gas masks. But there are many other monumental problems with the holocaust scenarios as well. The gassing claims really are a monstrous Jewish HOAX.

NEW General Jaruzelski: Poland's population explosion after WW2 NEW

<http://polskaweek.com/polska-mysteri%C3%B9se-bev%C3%B6lkerungsexplosion-nach-dem-zweiten-weltkrieg-65373111118.html>

http://de.altmedien.info/general/bci-andere-gelesen-polska-mysteri%C3%B9se-bev%C3%B6lkerungsexplosion-nach-dem-zweiten-weltkrieg-03-11-09_37014.html

The following is a translation of three paragraphs from the extremely important German essay in Polskaweek NEWS (links above) entitled "Jaruzelski: Mysteriöse Bevölkerungsexplosion in Polen." The numbers thoroughly undermine the holocaust hoax generally.

"To this day I fail to understand how 24 million Poles could have been counted after World War 2 when already by the next census in 1970 there were suddenly 14 million more Poles. Then, as if hit by lightning, the population explosion ended and fluctuated at a level of about 38 million inhabitants which is still unchanged to this day. Obviously it was a strong aphrodisiac which had led to the birth of X-millions of new Poles because in the grocery stores there had been only vinegar and milks had died even after the war?" according to the former Polish president [General Wojciech Jaruzelski] as he spoke to the amazed journalist of the daily newspaper "Izvestija."

Clearly, the well known official growth of the Polish population is very mysterious and differs from the figures given by Wojciech Jaruzelski by "only" approximately 6 million persons. According to the ex-president who is regarded as an honorable person in spite of his history, there were in 1946 only 24 million people left over from a population of 37 million people in the late 1930's. Consequently there were 13 million missing Poles of whom 5.9 million had supposedly died during the war, including almost 2.9 million Jews. The fate of the remaining 7 million Poles is still unexplained. The numbers from official Polish statisticians (GUS) give 23.6 million for 1946 and 32.7 million for 1970 which is 5.8 million fewer than in 1990 after the fall of communism and after which there were 38 million Poles.

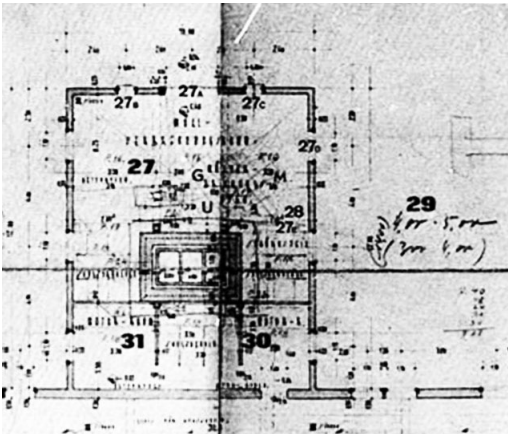

Since the end of communism, the birthrate in Poland is only 1.3 children per woman—the population growth rate, even 20 years after 1990, is at 0.00 percent. However, according to Jaruzelski the birthrate had already been stagnant since 1970. By which gigantic leap must the birthrate have climbed already shortly after the war in order to make Jaruzelski's statement plausible? A population of only 23.6 million Poles produced according to official (GUS) statistics 312,000 children in 1946. From these 72,500 died during or shortly after birth. But it was not just the child mortality that was enormously high in 1946, it was high generally. In addition, several million men in the best years of their lives had died during the war also. Bigamy was strictly forbidden, illegitimate children were denounced as "bastards," and "in the grocery stores, there was only vinegar" as General Jaruzelski admitted to "Izvestija."

NEW Poison Gas: Another Fuel for Motor TransportNEW

The online book linked above is actually entitled **Producer Gas: Another Fuel for Motor Transport**. I changed the title slightly here because this fuel was also extremely toxic. It would have been ideal for mass murder. The book itself speaks of CO concentrations ranging from 18-25% on page 50. The German technical literature, however, from the war itself makes it clear that in Germany, levels as high as 35% were common. Producer gas or poison gas, take your pick as to the terminology, was used to propel at least 500,000 vehicles throughout German-occupied Europe as well as countless other stationary engines—in factories and workshops, for example. See pages 17 and 18. For a thorough discussion of the producer gas technology one should, however, read at least some of the vast German literature on this subject in wartime technical journals such as *ATZ Automobiltechnische Zeitschrift* (especially from 1940 and 1941). A serious deficiency in the linked book is that the bibliography fails to include even one German work on this subject. The most comprehensive book on the subject anywhere, ever, is *Generator-Jahrbuch 1942* edited by Ostwald, 1943, (496 pages) and published with the special consent of Reichsminister Albert Speer and the Zentralstelle für Generatoren. A superb new book in German is: Eckermann, Erik. 2008. *Fahren mit Holz: Geschichte und Technik der Holzgasgeneratoren und Ersatzantriebe*. Bielefeld, Germany: Delius Klasing Verlag, (392 pages).

out that it was in this particular furnace that the documents of the Political Section of the camp were always burned. From time to time, the SS would bring whole truckloads of papers, documents and files that had to be burned under their control. During the incineration of these papers, I noticed great stacks of records of dead people and death notices ["Totenmeldung"]. We were not able to take any of these documents because we were operating under the close and direct surveillance of the SS. Behind the waste incinerator, at the end of the wing, was a chimney for all the cremation furnaces and the incinerator. At first, there were around this chimney three electric motors used for the draught ["Sauganlage / suction type forced draught installation"]. Because of the heat given off and the proximity of the incinerator, these motors often broke down. There was even a fire on one occasion. Because of these problems, they were later removed and the [underfloor] smoke flues of the cremation furnaces were connected directly to the chimney. A door [27e] allowed passage between the waste incinerator wing and the part where the chimney was. This part being slightly higher, it was reached by a few steps [28]. After the motors were removed some wash basins for the Sonderkommando were installed next to the chimney [30] [Dr Miklos Nyiszli speaks of "a beautiful ten-man shower made of gleaming tile" (page 60), which was certainly supplied with water heated by the incinerator], and in the other part on the opposite side looking towards the undressing room, there was a room [31] where Obercapo [chief Capo] August sometimes slept.

A **Bauleitung drawing** (see enlarged view below) shows the locations of the corresponding doorways and other features as indicated by the reference numbers given in the quoted text. Any mention of human bodies being burned there is remarkable for its total absence—not only in the text above but also in the wildest anecdotes of Henryk Tauber or any other self-described "eyewitnesses." The Nazis did not do that sort of thing and clearly built the garbage disposal area to make that as inconvenient as possible. There was NO co-mingling of human remains with garbage, even when some of the human remains were from Jews. The Nazis really were the Good Guys!

Note that room 30 ("wash basins for the Sonderkommando") and room 31 ("where Obercapo [chief Capo] August sometimes slept") were separated from the waste incinerator by a solid partition wall without any doorways.

John C. Zimmerman and others have tried to overcome the severe technical limitations of crematory ovens by claiming the Nazis used open air burnings to dispose of an unlimited number of corpses. No doubt, there were some open air burnings but there were also other alternatives such as garbage incinerator ovens (*Müllverbrennungsofen*) which have never, ever been implicated anywhere. Both Kremas 2 and 3 at Birkenau had such garbage incinerator ovens within the very same buildings—but they have never been implicated, ever. Why? Excess corpses could have simply been brought from the crematory oven room through a doorway to the incinerator—but according to the building drawings, there was no interior doorway. Why? But in addition, the Nazis could have built or used BIG OVENS to begin with such as brick kilns or lime kilns. As soon as one is no longer concerned about co-mingling of cremains, even with fuel ash, the technical problems become simple by comparison. When they rebuilt the three-muffle ovens with new refractory brick, they could have been thoroughly rebuilt to burn far more corpses albeit with lots of co-mingling. Also, if one no longer cares about producing esthetically pleasing white ash, one can get away from expensive coke and use ordinary coal or even wood as a fuel. But the Nazis used coke in the Kremas—go figure!

For a healthy dose of reality regarding cremation possibilities and absurdities, the following videos from **Ernst ZUENDEL** are excellent:

Part 1: <http://www.youtube.com/watch?v=dUUYVO1cIC0&feature=related>

Part 2: <http://www.youtube.com/watch?v=6454kBB7QBk&feature=related>

Part 3: <http://www.youtube.com/watch?v=gfZaZmK3Ms&feature=related>

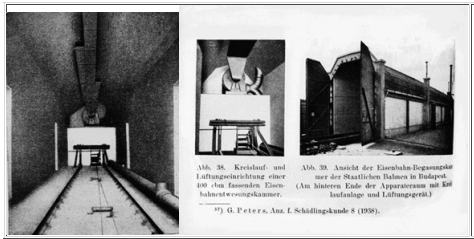

Refractory brick as shown by Lagace in Part 1 is actually rather s-o-f-t and can even be cut with an ordinary saw quite easily. Such brick is however extremely expensive (\$60 per brick versus \$1 for ordinary brick) in order to withstand the temperatures with its aluminum oxide and yet, it is also rather delicate—all the more reason to heat Kremas muffle carefully, and slowly, and even—-and to cool them carefully, and slowly, and evenly as well.

These videos convey the technical information extremely well, and quickly. For all his commendable research and vast scholarship, Carlo Mattogno has not provided anything more persuasive than these videos. Ernst Zuendel deserves enormous credit also for what he put together. A crematorium in Japan excused itself recently after the big earthquake by saying that it could only cremate 18 corpses per day to which some exterminationists suggested they must have had only muffle in their crematorium. The testimony in the Zuendel videos suggests they must have two muffles, at the very least.

During cremation there are essentially three stages. In the first stage, the corpse temperature is raised to the boiling point of water and all moisture is removed. In the second stage the corpse temperature is raised to the temperature at which the dried corpse self-ignites. Finally, the corpse consumes itself from its own fuel. During this last stage, the highest temperatures are reached which consume the bones as well. (The bones are almost totally consumed the exceptions are generally the hip, skull and teeth.) If at this time the corpse is in direct contact with the firebrick, the uneven heating of some of the bricks will cause them to crack.

A great deal of effort has been directed at determining the actual amounts of coal, or coke, or wood one would need to cremate a body. The margin of error for any such calculations has to be enormous when one recognizes that the degree to which a body is cremated can vary enormously depending on one's objective. If one merely wants to sterilize the remains so that whatever is recovered afterward is no public health danger to the water supply, then the amounts of fuel needed can be rather small. If one wants to generate at least enough white powder to fill an urn for the benefit and comfort of bereaved family members, the amounts of fuel and the cremation temperatures must be greater. If on the other hand, one wants to totally destroy all trace of the body including the bones, the amounts of fuel will be greatest of all—even when larger bone fragments are pulverized as well. A hard and fast number based even on body weight is simply impossible. It would seem that if the Nazis and SS were simply trying to cremate as many corpses as possible to protect the water supply, there should be many large bone fragments available somewhere, still today.

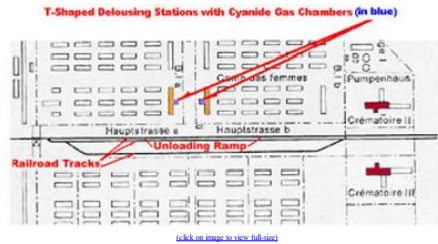

One can check out the following: [link from Wikipedia](#) from which the following quote is taken:

The above images show the **Budapest gas chamber for delousing and fumigating entire railroad trains**, several railroad cars at a time, in Budapest, Hungary. This facility was already in operation before the war and would have been well-known to anyone reading the extensive German technical literature for the use of Zyklon-B and cyanide gas, to keep people alive. This facility, and many others like it, would have been ideal for mass murder, but they have never been implicated, ever, in the holocaust gassing claims. Several hundred thousand Hungarian Jews, who were destined to be gassed in 1944, were never gassed here—but were shipped by train instead to Auschwitz-Birkenau, supposedly, to be gassed in cellar rooms with a few holes in the ceilings, without forced ventilation (**Kreislauf**) or any of the other special features that this Budapest gas chamber contained. [Read more](#). If the holocaust hoax persists, the holocaust believers should accuse the Nazis of monumental clumsiness and inefficiency as well.

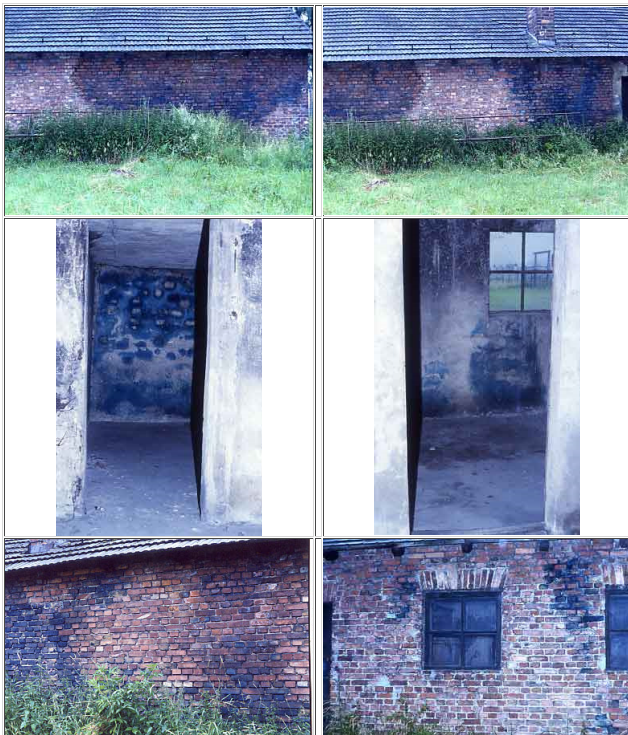

Above is the actual advertisement for Zyklon-B that was widely used in German pesticide literature to promote their superb product and its possible applications. Zyklon-B had already been used worldwide since the 1920s, especially by the US Public Health Service to fumigate ships. The railroad delousing tunnel shown in the lower left was typical of similar large chambers used in major eastern European cities. Instead of fumigating empty cattle cars after Jews had disembarked, the same cattle cars with Jews inside could have been "gassed" just as easily before they disembarked. And yet, these wonderful devices were never used to, or even implicated in nazi "exterminations" anywhere. [Photo Source-Note](#)

Cyanide Gas Chambers to keep Jews ALIVE in Auschwitz-Birkenau—Only 200 feet from the center of the infamous unloading ramp, where Mengele supposedly made "selections," are two T-shaped delousing stations. Here new arrivals entered the "dirty" side and undressed before being examined medically and showering. Their clothing and personal articles were fumigated with Zyklon-B (which released cyanide) in gas chambers in the meantime. There was no secret about these "gas chambers"—they are clearly marked as such on all relevant German construction drawings for example. Eventually, (after about an hour) all fumigated articles and clothing were returned to the new arrivals who would dress and leave from the "clean" side, and enter the camp proper.

Nowhere is it even claimed that the delousing stations or their gas chambers were ever used for murder. These real, life-saving gas chambers gave rise, no doubt, to false claims long afterwards about non-existent, "genocidal" gas chambers in the crematorium buildings at the extreme end of the ramp as shown. "Selections" were routinely made because of the limited capacity of the delousing stations, and people were "sent to the gas chambers" but not to be gassed themselves;— they were sent ONLY to have their clothing and personal effects fumigated so that they would stay healthy and alive in the camp, and wherever they were eventually sent, afterwards. [Photo Source-Note](#)

The BLUE Walls of Birkenau's Delousing Stations—a visual refutation of the hoaxes

The above photos were all taken by F. P. Berg in 1988 and are not enhanced or retouched in any way. The blue staining of the stucco and bricks in these photos is merely a subdued approximation of the

and readers. The widespread use of poison gas or **Holzgas** as an alternative fuel throughout German-occupied Europe was additional graphic proof that the diesel exhaust murder accusation was too absurd to be believed, indefinitely. It also became clear, albeit very gradually, that **all** the other gassing claims are purest rubbish also. There was a wilful misuse of real humane German measures to keep POW's and Jews alive and to portray those lifesaving measures as part of an extermination program instead. It is also clear now that the western Allies, especially the Americans, are in fact guilty of those more horrendous, real crimes against the Germans, Japanese, Koreans and Vietnamese. Those real American war crimes are far worse than anything the Nazis were ever accused of committing. But there is no sense of shame for those real, cowardly, despicable American atrocities. On the contrary, Americans salute their flag and pledge allegiance as if they never did anything wrong to anyone. They really are criminally insane.

The deliberate mass murder of totally innocent civilians by incineration is the great Anglo-American contribution to military science. Americans and Brits deliberately r-o-a-s-t-e-d women and children and babies to death by the tens of thousands. If the Nazis had murdered innocent people in gas chambers, such horrific, fictional crimes would have still been humane and even civilized compared to what the US and Britain actually did. The arch war criminals of all time are, in fact, the Americans and it is they, not the Germans, who should hang their heads in shame forever.

The ultimate genocidal maniacs and exterminationists were, and still are, the Americans. They have nothing to be proud of. They have no reason to feel self-righteous about anything. **DWIGHT D. EISENHOWER** epitomized the American-Jewish madness and depravity when he expressed well-orchestrated shock and righteous indignation over the handful of bodies (perhaps 20 bodies, cause of death—unknown) that were proudly displayed at Buchenwald for him, and **PATTON**, and American reporters on April 13, 1945. Had **EISENHOWER** and his motley crew never seen bodies of civilians murdered in Allied air attacks? Was he really blind to what America and Britain were doing in WW2. What did he think happened when British and American air forces bombed countless German cities, like Dresden two months earlier ([see the image below and click to enlarge](#)), Hamburg and Würzburg (one month earlier)? Was Eisenhower oblivious to the fact that Allied generals and leaders like himself, aided and abetted by tens of thousands of "ordinary," and "good" Americans and Brits had turned entire cities into crematory ovens? Was there ever a greater display of sanctimonious hypocrisy? Were these guys the most thoroughly insane and depraved creatures to ever walk the planet—or what? 9/11 was merely a taste of America's own medicine.

The air war against innocent civilians was begun by the British—**NOT by the Germans**. It was the British who had begun the deliberate war on civilian targets (with American approval) as early as May 11, 1940 to which the Germans reluctantly responded with their first attack on London only on September 7, 1940 (after five major attacks on Berlin) nearly four months later. It was all supported by an enthusiastic American press led by such journalistic, award-winning "giants" as **EDWARD R. MURROW** from CBS. CBS was led in turn by its Jewish CEO, **WILLIAM F. PALEY**.

Today, the holocaust hoax is the continuation of America's insane, racist war against the German people and the German nation by less violent means. The Morgenthau Plan and the planned extermination of the German people would, no doubt, have actually occurred if Stalin had not frightened the Anglo-American heroes into changing their plans. The Germans were still needed to protect them and western civilization, once again, from communism. Without German troops and military genius, America's performance in Korea and Vietnam was monumentally pathetic.

No doubt, neither Britain nor America would have ever sunk as low as they did if it had not been for the vast power and influence of the most thoroughly racist people on the planet, namely the Jews. The Jews had reduced Germany to ashes just as they had supposedly reduced Jericho and Sodom and Gomorrah with the help of their racist god. At the end of WW2, the Jews found to their utter amazement that among the ashes in Germany, there were also the remains of some Jews—shock, horror, awe—for which the entire whole world must beg forgiveness and chant "Never Again! Although "historians" may not want to become "anti-Semitic" when they begin their studies of WW2, they certainly must ultimately become "anti-Semitic" if they follow the evidence to where it truly leads. Here I use the term "anti-Semitic" in the same way that Jews today use the term, meaning "anti-Jewish." Truth itself is anti-Semitic.

The complete destruction of Germany had been the Jewish goal long before WW2 even began. **"For months now the struggle against Germany is waged by each Jewish community, at each conference, in all our syndicates, and by each Jew all over the world. There is reason to believe that our part in this struggle has general value. We will trigger a spiritual and material war of all the world against Germany's ambitions to become once again a great nation, to recover lost territories and colonies. But our Jewish interests demand the complete destruction of Germany. Collectively and individually, the German nation is a threat to us Jews."** - **VLADIMIR JABOTINSKY** (founder of the Jewish terrorist group, *Irgun Zvai Leumi*) in Mascha Rietsch, January, 1934 (also quoted in "Histoire de l'Armée Allemande" by Jacques Benoit-Mechin, Vol. IV, p. 303). The above quote is only one of **many** that **one can find** which show the almost universal Jewish obsession for war against Germany—even as early as March of 1933. Is it any wonder that Jews, albeit with many exceptions, were put in German concentration camps and or expelled when the war finally arrived?

The Real Mass Murderers were the Jews themselves

In general, Jews were treated extremely well by the Nazis, and the SS and the Germans; Jews have nothing to complain about. Can anyone in his right mind seriously imagine that the Germans would not have interned the Jews? And, so what? Until the very last months of the war when the Anglo-American terror bombing had its most horrible effects on Germany, there was nothing comparable to the horrible scenes at Bergen-Belsen in March and April, 1945 anywhere, ever. The real mass murderers during WW2 were the Jews themselves. Masses of gentle soldiers died the actual fighting and dying after having been whipped up by the Jews with the vilest lies and propaganda that the human mind can conceive. No lie was too outrageous for their "Good War." Their whining and scamming since the war is outrageous. No doubt, some Jews were shot in Russia and elsewhere by the Germans, including innocent Jews—but the true numbers are minuscule compared to what is claimed. Since the war was their doing for which they had worked so hard, they have nothing to complain about. They got their dirty war, perhaps good and hard—but if so, so what? In any event, the gassing claims are absolute rubbish.

Ultimately, the Jews condemn themselves—and vindicate the Nazis and Germans for the Final Solution policy to expel Jews from Germany and Europe forever. Today, we are on the verge of putting ground troops into Pakistan, and Yemen. We are moving ever closer to a third World War over Iran—even with thermonuclear weapons possibly in order to make Israel secure and "prevent another holocaust." That's what it is really all about. Americans should look at themselves and ask: **"why?"**

The so-called "Death March" from Auschwitz

According to the holocaust myth: **"The death marches were to stop the prisoners appearing in newsreels and recounting their horrific experiences."**

If there were any truth to that statement, why were thousands of Jews and others left in Auschwitz by the retreating Nazis and SS for the Russians to "liberate" and use for their propaganda? The number of such prisoners, including twins, left for the Russians that I have seen recently is **"7,000."**

The fact is that the holocaust theory is rubbish. The so-called "death march" was NOT at all to kill the tens of thousands of Jews and others who had all "chosen" to go west. It could only have been a rather humane attempt to help these people avoid the inevitable horrors of the Soviets. No doubt, many deaths occurred along the "march" to the west from the misery of the ordeal—but, the worst killers were the Allied bombers and fighter planes, piloted by depraved cowards, who found it so much safer to murder refugees, even Jews, on the ground in trains or on foot rather than attack armed German soldiers who might shoot back and kill them instead.

But, by their HUMANE measures to bring Jews to the west safely, (for the benefit of Jews who I suspect were at least in some cases still under quarantine against typhus) the Germans and SS inadvertently helped bring about the typhus epidemics in the west in places like Bergen-Belsen during the last chaotic months of the war. It was those horrors and medical catastrophes that are the "real" (but false) basis for most people for the holocaust claims, including the gassing claims. So, by their humanity toward the Jews, the Nazis and SS inadvertently brought about their own vilification. The real mass murderers were the western Allies. The Nazis and the SS were heroes! If

extremely intense blue staining which is actually there.

In reality, the blue staining matches the intense color of Prussian blue pigment which is a well-known, synthetic dye made by reacting hydrocyanic acid with iron oxide. The same chemical process has obviously taken place here between the cyanide gas used in delousing and the iron oxide in red clay bricks. The staining of the stucco on the interior walls follows the outlines of the underlying bricks behind the stucco. Because of the erratic quality of the bricks, some bricks yield far more than others—hence the disparity in the intensities of the staining from brick to brick. What is especially surprising is the fact that the exterior walls show the same staining even after more than forty years of weathering. And, what is even more surprising and important is the fact that just 400 yards away at Kremas 2 and 3, the exact same brick shows absolutely NO trace of blue staining anywhere—even in the cellar room remains where supposedly cyanide was used on a vast scale for mass murder. There is absolutely NO blue staining there anywhere. This is indirect but enormously powerful evidence for the fact that these really were no homicidal gasings there either.

These conclusions of mine, based purely on visual evidence, are also supported by chemical analysis of samples of the brickwork collected over the years by a number of revisionist researchers—including Fred Leuchter and Gernar Rudolf. The best in depth analysis of the results is provided by Gernar Rudolf who is a highly qualified chemist as well as leading revisionist. Those who will, no doubt, continue to insist there is something wrong with the revisionist arguments in this regard should conduct an even more intense chemical investigation of probes made deep into actual bricks that are still there today in abundance. This will not happen, however, because the powers that be—and, especially in Poland—know perfectly well that their mass gassing claims are rubbish. Nazi gasings never happened! Without those outrageous and false gassing claims—the continued possession of the land and property stolen from millions of innocent Germans at the end of WW2 by Poland will be too difficult to sustain.

The holocaust hoax is anti-German racism gone wild. Essentially, the “holocaust” never happened because no one was ever killed in gas chambers, or made into soap or lampshades by the Nazis, and there was NO program to physically exterminate all the Jews of Europe or the world. As to mass murder or “mass extermination” by other means such as mass shootings, all Americans and Brits should look at themselves in the mirror. The primary focus of this website is the claim that the Nazis used gas chambers for mass murder. Those gas chamber claims are pure rubbish for countless technical reasons, many of which are given here. But the claims of mass shootings in Russia by “*Einsatzgruppen*” units and should be regarded with the greatest possible scepticism also because of the total absence of exhumations and forensic examinations or autopsies of the supposed victims, even more than sixty years after the war.

The “real” mass murderers and the ultimate genocidal maniacs were, and still are, the United States and Britain. During World War 2, the US and Britain deliberately murdered well over a million totally innocent civilians, mostly women and children, by deliberately “roasting” them to death (Curtis LeMay loved that terminology) with massive, incendiary air attacks. America even used nukes—and eventually nuclear weapons as well to deliberately “roast” women, and children, and babies to death. Mass gasings by the Nazis, those mythical crimes, would have been humane and merciful compared to what the US and Britain actually did and about which there is no dispute. Men fight men, cowards and moral perverts murder civilians as a matter of deliberate strategy. The worst war criminals in all of human history were the Americans in WW2. Holocaust propaganda is the continuation of the same racist madness against the German people. It was the Germans who against all odds, and in spite of their own inevitable military defeat, continued to fight heroically in order to save most of the world from total enslavement to communism and the Jews.

It was the British who began the cowardly air war against civilians, not Germany, in 1940—with encouragement from the US even though the US was technically still neutral. In spite of having the largest empire in human history and the support of the United States with its nearly total domination of the entire western hemisphere and vast human and material resources, the mass murder of Axis civilians was widely recognized and accepted as an essential part of Allied strategy because Allied ground forces were simply no match for the firmly German army and its few allies. But instead of even trying to make peace, the cowardly western Allies resorted to terror. The Allied demand was for total “unconditional surrender.” Terrorism is firmly embedded in American and British modern military performance and that, in turn, makes the current flavor about al-Qaida atrocities laughable. America and Britain have simply been given a small taste of their own medicine. 9/11 was “blowback” for America’s criminally insane support for racist Israel in spite of countless violations of UN resolutions and international law by Israel.

The US and Britain have continued their racist madness, especially against Germany, with elaborate show trials in violation of international law to try to perpetuate their wartime atrocity claims forever. The brazen strategy has been to use the anticipated verdicts and conclusions of the trials as justification for the illegal means, including torture, needed to conduct the trials. Such show trials are no better than those of the medieval Inquisition. Accused Nazis, and now revisionists or mere doubters as well, are the newest heretics and witches. Ultimately, the hoaxers will fail because of the overwhelming evidence against the holocaust gassing claims. Where, for example, are the bodies—not just bodies of people who died from disease or American strafing and bombing, but bodies of people who actually died from poison gas or poison? There are none.

RUDOLF HESS: Prisoner For Peace. In May of 1941, HESS flew alone from Germany to Britain to prove with his own physical presence that Germany’s offers of peace with Britain were sincere and not mere propaganda. For this heroic, Christ-like act HESS was rewarded with life imprisonment, most of it in solitary confinement—until he was actually murdered in Spandau Prison by a British assassin in 1987 at age 93. No one ever deserved the *Nobel Peace Prize* more than RUDOLF HESS.

I regret nothing. If I were to begin all over again, I would act again as I did—even if I knew that I would not be in the end was the stake at which I was to be burned alive. It makes no difference what men may do to me. One day I shall stand before the judgment seat of the Eternal. To Him I shall answer, and I know that He will pronounce me innocent.

When **Robert Wolfe** was still the director of the Military Branch of the National Archives in Washington, DC, he held a small conference in 1978 attended by this webmaster in which Wolfe admitted that, contrary to what people generally believed, the real “evidence” for the holocaust “fits into a small shoe box.” He then reached into a small pile of papers from which he took one version of the famous “**Statement of Kurt Gerstein**.” That ridiculous piece of “evidence” is still the best evidence there is for the “holocaust.” Since that small conference in Wolfe’s office, a huge holocaust museum has been constructed in Washington, DC a short distance from the National Archives—but that gargantuan structure contains nothing better than the papers Wolfe held in his hand years earlier. The US Holocaust Memorial Museum (USHMM) in Washington, DC is a monument to mountains of non-evidence, and stupidity, and fanatical racism on the part of the creators of that museum, mostly Jewish, only a few feet away from many of America’s most cherished monuments. Let those who insist otherwise identify even a single name from a German wartime document anywhere showing that the person named was killed by the Germans in a gas chamber. Let those who insist otherwise identify even one photo of a corpse found in any German concentration camp of someone who (no name or identity necessary) was killed in a gas chamber, or with any poison based on any kind of forensic examination of the human remains.

The Holocaust HOAX is like the tale of the **Emperor’s New Clothes**. Only people who are blind or demented, psychically and morally, could possibly fail to recognize the “undeniable” truth. In the children’s fairytale, only people who were stupid and/or unfit for their positions could possibly deny seeing the Emperor’s beautiful new clothes. A single child was apparently unimpaired by the possible loss of his government position and was the first to say the emperor was totally naked.

Evidence for holocaust gasings is minuscule and false. But, the ongoing campaign to make such evidence appear “overwhelming” and “undeniable” is awesome. The campaign is also quite ruthless as shown by the imprisonment and ruination of many, entirely non-violent people who have merely expressed disbelief in the “holocaust.” The people targeted and most clearly hurt by the holocaust accusations, namely the Germans, are denied the most basic human rights of any accused person, or people, which is to protect their innocence. Holocaust propaganda is “overwhelming,” but NOT the evidence for gasings. There are indeed “mountains of German wartime documents” in various archives but they are nearly all totally irrelevant. The documents which would be most likely to reveal the total innocence of the Nazis are still hidden in places like Arolsen and Moscow and even Auschwitz, far from all critical examination except by the most carefully screened few. The “holocaust” in general is a big lie repeated many, many times—with officially sanctioned terror as an essential tool for persuasion in many countries, including Germany and Austria. By contrast, the fairytale Emperor imprisoned no one, as far as we know, for doubting the existence of his marvelous, new clothes.

The “holocaust” is a **hoax** in the same way that religions are hoaxes. One does not require conspirators who knowingly concoct a pack of lies. One simply needs people who want to believe something so fervently that they blind themselves to all contrary evidence. The emperor’s tailors certainly were “hoaxers” in the classic sense of the word. But their dishonesty would have amounted to little without all those people who wanted to believe the emperor really was wearing beautiful clothes. Intimidation and penalties against “non-belief” are helpful as well.

Bergen-Belsen, 1945

America’s Murderous Handwork: Victims of disease—generally typhus—at Belsen, a direct result of the Anglo-American terror bombing and strafing of axis civilians and civilian targets. The Germans are still falsely blamed. **General Dwight D. EISENHOWER** had even forced thousands of German civilians to leave past the dead as if they were somehow responsible. He should have looked at himself in the mirror, instead. Belsen was the handwork of American and British generals just like himself. Such horrors were also the handwork of all of America’s and Britain’s leaders, from the highest to the lowest. Just what did they expect to find after years of bombing and strafing every conceivable target from entire cities to unarmed farmers in their fields? The real horrors of the so-called holocaust, in pictures that everyone should look at, were America’s own doing. Don’t be shy, don’t deny—take pride in your achievement America! You did it! But, instead of embracing their own achievements, they actually believe they were the “good guys.” They continue to blame the Germans, especially those “fiendish” Nazis, for what they themselves had caused. They themselves were the true friends and genocidal criminals. But they won the war. And EISENHOWER, instead of being hung as the depraved, cowardly war criminal that he truly was, actually rose to become president of Columbia University and later the United States—American “hero” and an inspiration for future generations!

The best discussion of what really happened at Bergen-Belsen was given by **Dr. Russell W. BARTON** and Ernst Zuendel after Zuendel’s 1988 trial in Toronto. Dr. BARTON had testified there on Zuendel’s behalf. BARTON as a young British medical officer was assigned to Belsen just a few days after the British took over at the camp. Barton’s explanations of what really happened and what he actually witnessed had shocked British audiences years earlier when he first published an article about his experiences. The discussion appears on YouTube in three parts as follows: [Part 1](#), [Part 2](#) and [Part 3](#).

The above picture of one of the mass graves at Bergen-Belsen and countless others like it are also used to support the gassing claims when, in fact, the people who generally do this know perfectly well that not even one of the bodies shown in any photo, anywhere, is of someone killed with poison, or poison gas of any kind. Dr. Charles P. Larson, an American pathologist, was just one of the doctors specifically assigned to search for forensic evidence of deaths from poison or gas—and they all found nothing!

Although Larson believed there had been exterminations with cyanide gas and that “only a relatively few of the inmates I personally examined at Dachau were murdered in this manner” (page 61), he also admitted that when he had sent the organs from “30 or 40 bodies” to a laboratory in Paris for analysis, the “reports came back negative.” He was part of War Crimes Team 6823 which gathered evidence for the subsequent war crimes trials. See also the [essay by Theodore J. Olskoff](#).

During the American Civil War, the Union army lost more than twice as many men to disease alone as from wounds. Near the end of World War I, the United States lost roughly half-a-million people to the **Spanish influenza** without even one enemy bomb having been dropped on the USA—and without any serious food shortages either; the death rate from war-related disease alone exceeded the death rate from wounds by a factor of ten. In September, 2005, for example, the entire world witnessed the human disaster following Hurricane Katrina—not in defeated Germany, but in the richest country on the planet and in peacetime. New Orleans had become Bergen-Belsen on the Mississippi. Many thousands of people die of diseases such as cancer in American hospitals every day; their undressed remains look no better than any of the dead at Bergen-Belsen. Just line up those near death and take off the pajamas and covers and open your eyes. Americans should bite their tongues regarding Nazi Germany and the German concentration camps. They should look at themselves in the mirror instead. Shame on America!

CRIME DOCTOR 119
Dr. Charles Larson was a colonel in the U.S. Army Medical Corps in Germany during WW II. The Mercedes-Benz was “traded” (order online from the commanding general of the 7th Army) for a red Mercedes convertible. The 18-cylinder special, one of only three cars built, was a gift from a grateful German to Col. Larson for attending a daughter. The general later killed himself when the car ran off a winding mountain highway.

they had merely wanted to hide evidence of some alleged “fiendishness,” they could have done that so easily and simply lied about it afterward as the Allies had done throughout the war and continue to do to this very day.

The Jewish portrayal of the evacuation of Auschwitz as a “death march” merely shows, once again, how something that was humane and decent on the part of the Nazis and SS has been turned on its head and portrayed as the complete opposite. This is typical of the Jewish propaganda. Other examples of such gross distortion are the use of Zyklon-B and crematoria, showering and the shaving of body hair—but there so many more examples as well.

The following page <http://www.air-photo.com/english/denial.html> is from John Ball’s Air-Photo Evidence site. Some of the highlights include:

1. **U.S. and German top-level government officials talked with each other through Swiss and Irish contacts in 1944 and ‘45 about the condition of inmates in German-operated camps,**

2. **In 1944 German officials denied any intention to mass-murder inmates,**

3. **Germany guaranteed to evacuate inmates ahead of Soviet advance,**

4. **Former camp inmates confirmed inmates were being safely evacuated.**

In addition, there are scans of two letters between the Allies and Germany regarding the disposition of the inmates from Auschwitz-Birkenau. The Nazis really were the “Good Guys.” Get used to it, folks!

If you get away with it, crime pays very well — and American “Success” is the best proof of that

America has been praising itself to the heavens ever since the last Great Depression—and getting away with it, in large part because it won WW2 and looted everything of value from Germany. That loot from Germany was the basis of America’s undeserved success for the next sixty years. Even before the end of the war in Europe on May 8, 1945, the USA had begun the systematic, official LOOTING of everything in Germany that could be of any military, scientific, technical or commercial value using highly trained teams of engineers, scientists, and technicians with photographers and stenographers. The stolen information about German technology—with countless chemical and mathematical formulas, for example—was put into reports which were printed, bound and available to anyone in the US, including corporations, for the minimal cost of the paper and printing of those reports. Many were available for less than a dollar. Britain did essentially the same thing with reports for its citizens. The US reports were called **F.I.A.T. reports** for “Field Intelligence Agency, Technical.” Others were known as **C.I.O.S.** (Combined Intelligence Objectives Subcommittee) and **B.I.O.S.** (British Intelligence Objectives Subcommittee). Major libraries throughout the country, including the Columbia University Engineering School’s library which I used, were repositories of entire collections of these reports of looted technology—and open to everyone.

Germany was to be reduced to nothing more than farmland in accordance with the Morgenthau Plan—but not before everything of value was stolen. Many of the details appear in an excellent new book in German by Friedrich Georg, **Unternehmen Patentreiz 1945**. (Tübingen: Grabert Verlag 2008). An [important document in English](#) appears on page 53 describing the so-called “German Documents Conference” (Germans were NOT invited). More than 1600 tons of German documents had to be dealt with somehow at this special conference from October 22-25, 1945. Simply returning the documents to the rightful German owners was out of the question for the victorious criminals. The intent, clearly, was to destroy all documents which were NOT useful to the victors. No doubt, documents exonerating German defendants accused of atrocities would NOT have been useful to the victors either. An American document giving the conclusions of the “German Documents Conference” is still not available. See also [John Gimbel](#).

With the above document, we may have an explanation here for the apparent absence of key documents relating to the so-called “holocaust,” especially to the actual resettlement of Jews in eastern Europe. To avoid the enormous possibilities for corruption and bribery, there would have been meticulous records for the disposal and/or dispersal of Jews, by whatever means—whether that meant “resettlement” or “extermination.” The absence of such record-keeping on the part of German bureaucrats, of all people, is totally inconceivable and contrary to the German national character which loves detailed record-keeping. A cover-up, if there had been mass extermination, would have surely included a vast paper trail, somewhere, even if only a fraudulent one, to disguise an extermination program.

In the *NY Times* and *Scientific American* magazine articles appeared after the war encouraging everyone to buy the F.I.A.T. reports and use the information to make products of every sort without fear of patent violation so long as the information was not protected by valid American patents. *“Help yourselves folks, and corporations, to what our heroes have just stolen in Germany”*—that was the message in essence. Many corporations bought entire sets of the reports and used them for decades. Since Germany was to be reduced to farmland in keeping with the Jewish Morgenthau Plan, Germany would have no use for any of that “intellectual property” anyway. The “real” war criminals were, as we should all know by now, the Allies—especially the Americans.

Among the countless ideas **S-T-O-L-E-N** were the patents and technology for the world’s first programmable electronic computers, magnetic tape recording (essential for computers for decades), jet engines, rocket propelled aircraft, the first jet aircraft, swept wing aircraft technology, operational helicopters, guided liquid-fueled missiles of every sort, electron microscopes, semiconductors and the first transistors, many pesticides, synthetic fuels, rubber and motor oils, and fertilizers from coal and even oil shale, gas turbine technology to drive ships and tanks, hydrofoil boats, infra-red night-fighting equipment, birth control pills, and on and on.

The dollar value of all that loot is incalculable but certainly exceeded 10 billion dollars in WW2 dollars based on some known negotiations after the war between the US and the Soviet Union. By contrast, Germany’s portion of the Marshall Plan aid was only 1.25 billion dollars whereas Britain and France each received double that amount. What Germany received was barely enough to cover the wristwatches, cameras and other “souvenirs” STOLEN by American GI’s from German POW’s and ordinary civilians. What did America actually invent in the last century and a half, if anything? How many Americans have any idea that even the automobile, the gasoline engine, the diesel engine and the airplane were all German inventions? By countless pseudo-legal frauds, the rightful German inventors were never able to gain patent protection in the US. Today, China is doing nothing worse than what America did throughout the last century and a half.

The Nazis and Hitler put the World into Space

The German liquid-fueled rocket engine from WW2 is the basis of nearly everything the world has learned about the universe through space exploration since the war. The Hubble telescope, for example, would have been impossible without Nazi technology. No one other than the Germans was even remotely close to developing that technology. By contrast, **ROBERT H. GODDARD**’s work in America in the 1930s was an endless series of total failures. He had no idea as to the magnitude of the technical problems just as the US Navy had no idea when it tried to impress the world with the Vanguard rocket in 1957. The launch attempt was a fiasco.

It was **WERNER VON BRAUN** and his German experts who put America into space after Sputnik. But the real basis of everything that happened in space, from Russia and the US, was the WW2, liquid-fueled rocket engine technology developed by Nazi engineers like **WERNER VON BRAUN**, charismatic and brilliant, and **ARTHUR RUDOLPH**, and many thousands of other German engineers, scientists, and technicians. Their fantastic achievement was the product of decades of German Faustian idealism as well as the necessities of German defense and survival in WW2.

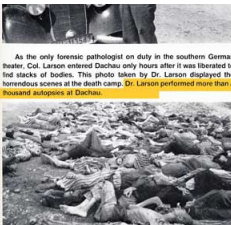

But **HITLER**’s and **HIMMLER**’s approval of the V-2 development should be appreciated as well. The liquid-fueled rocket was NOT the result of a few lone geniuses working in makeshift facilities in the New Mexico desert, or on Peenemünde. It was the result of a national commitment with vast resources and support from the highest levels—and that included **ADOLF HITLER**! **HITLER** could have cancelled such development, for many good reasons, for far more modest technical programs. For that technology alone, Nazi Germany and **HITLER** deserve the eternal respect, admiration and gratitude of the entire world.

No doubt, if **WERNER VON BRAUN** had been given the recognition he deserved after 1970 for his epic achievements, we would be far closer to landing humans on Mars today; we would probably be there already with a thriving research colony! Instead, America has let itself be driven by pathological Jews like Congresswoman **ELIZABETH HOLTZMAN** (from Brooklyn, of course) to actually expel **ARTHUR RUDOLPH** (SA and NS party member) from America.

ANNE FRANK was also among the dead at Bergen-Belsen. She died there from typhus even though she had spent many months in Auschwitz in 1944. She had later been evacuated to Bergen-Belsen and died there just two weeks before the camp was turned over to a British medical team on April 15, 1945 as part of a [negotiated truce](#) which had been initiated by the SS. It was the British who had delayed the actual transfer of the camp for several days, perhaps even weeks, because of special security demands they had put upon the SS. See footnote 34 of my essay ["Lustern and the Jews."](#) Anne Frank and countless others had "survived" Auschwitz because the Nazis had wanted them to "survive." If the Nazis had wanted them to die, they certainly would have been able to arrange it—but they, obviously, had no desire to kill her even though Anne Frank's usefulness to the Nazi war effort would have been close to nil. They fed her, and clothed her with clean lice-free clothing, and provided shelter and security and much more as best they could in spite of the war. If they had simply left her out in the cold winter, she would have died quickly from exposure—but they kept her warm and alive instead.

British and American terror bombing and strafing ultimately murdered Anne Frank—NOT the Nazis! Her unburied remains were probably still there when British troops entered the camp and may even be identified someday in a picture such as the one above. Of course, the Americans and Brits had not murdered her intentionally—Anne Frank's death was merely the kind of collateral damage that "happens." If she had merely been any German girl of the same age, there would be nothing to talk about. For example, 140 German girls named "Anna" were murdered in Würzburg on March 16, 1945 by the Allied bombing in which 7,000 innocent civilians were murdered. To the suggestion that Anne Frank would never have died if the Nazis had not imprisoned her, the fact is that America had been sponsoring underground terrorists throughout Europe for years and the Franks were involved. If the Germans did not shoot likely partisans outright, they had to incarcerate them. The Nazis had good reason to incarcerate the entire Anne Frank family because of the close relationship they had with the Dutch underground which actually built the famous hideaway. Shame on America for its sponsorship of terrorism which also led to Anne Frank's death.

Images (above) with captions from: John D. McCullum & Dr. Charles P. Larson, *Crime Doctor* (Merrett Island, WA, USA: Writing Works, 1978), page 129.

RUDOLPH had been the chief engineer for the production and design of the enormous Saturn V rocket which was the largest rocket the US has ever built, 363-foot high, which made all the manned lunar missions possible. Thirteen Saturn V's were launched successfully; **none failed**. For that truly fantastic achievement **RUDOLPH** received the Congressional Medal of Honor for extraordinary services but had to give the medal back after mad-dog Jews went after him. **NAAL M. SHER** from the OSI branch of the Justice Department forced **RUDOLPH** to leave the U.S. If **VON BRAUN** (SS officer and NS party member) had not died as early as he did in 1977, he would have been expelled as well. **HOLTZMANN** and **SHER** and many other Jews just like them should be expelled instead. What have they ever contributed? For America's political leaders, however, nothing is more important than those Jewish votes. The Jews must be appeased! Honor, American lives, gratitude, loyalty, the attack on the USS Liberty — all mean nothing if the Jews are unhappy.

Shame on America!

America is a kind of luxury, insane asylum for serial mass murderers. The deranged patients are reassured from morning until late at night that they are the "best" and "greatest"—and living in the most perfectly wonderful society that has ever existed. They firmly believe they were the "good guys" (even "the greatest generation"—**TOM BROKAW**) in World War 2. Even if the holocaust hoax were true, the actual atrocities (including the deliberate and repeated mass incinerations of totally innocent civilians with napalm) committed by the US during WW2, and in Korea, and Vietnam were far worse. If the numbers of innocent people murdered by the Anglo-American terror bombings do not rise to six million, it was NOT for lack of trying. Just what do such cowardly, depraved monsters think they have to be proud of? They live in a world of Hollywood fantasies where whatever bad things may have occurred along the way were morally necessary to achieve "peace and democracy." They actually believe that!

America is a mentally-damaged nation, a paranoid nation with NO comprehension of world affairs, or history, or cultures—not even its own. Of all the nations on the planet, America has had the least reason to be frightened by events in Europe or elsewhere since it has vast security moats on its west and east and passive neighbors north and south. And yet, it has foolishly meddled again and again into foreign affairs which are of no real interest or importance to the vast majority of its people—unless they can be driven by fantasies of imminent doom and horror.

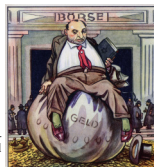

WW1 and WW2 were wars of aggression against Germany. Although Germany may have technically started WW2, the stage was carefully set by the jealousy of the British and French and even America. It was Hitler who had succeeded in countering the world depression with an economic miracle which has been unmatched in all of human history. The Czechs and Slovaks knew that, as anyone with half a brain in central Europe also knew, and that was why they acquiesced—no shots were fired—when Hitler incorporated those peoples as protectorates into the Reich. But, for the mad-dog anti-Nazi, especially the Jews, the establishment of the protectorate was just one more rallying excuse for another war on Germany.

The Jews and America are a perfect combination. On the one hand, the Jews are possessed by a megalomaniacal vision, given to them by their monster God, to rule the world and fulfill his racist promises to them. On the other hand, the American people are easily the most depraved and stupid creatures anywhere on the planet who will eagerly commit mass murder of millions of others whenever their "freedom" to behave like pigs seems the least bit threatened. The success of the new film "Inglorious Basterds" shows just how thoroughly depraved the American public really is. It also shows just how determined the Jews are to continue their war of extermination against Germany.

Can such depraved monsters possibly understand the well-deserved "meltdown" happening around them today? Of course, not! Can they ever grasp how they are enslaved by Israel and the Jews? No! It was all OK for such a long time. America had even persuaded a gullible world to support the American delusion; America had conned most of the world to send America its money long after WW2 and, in effect, kept the biggest Ponzi racket of all time going until very recently. By contrast, **BERNIE MADOFF** is merely a small-time, grubby Jewish crook who competed to be just like the really big Jews at Goldman Sachs, Citigroup, the Federal Reserve and elsewhere. They are running the country into the ground and getting ever richer in the process. American industry has been overcast so that American corporations could send productive based on manufacturing overseas. "Why get your hands dirty when you can simply skim off the profits from the labor of foreigners?" America has embraced the traditional model of Jewish success; just count the money and take a big cut.

Bernard MADOFF's mistake was that he robbed many prominent Jews. If **MADOFF** had merely been robbing *goyim*, he would shine on his own TV show just like **JIM Cramer** or **LARRY Kudlow**, and be getting taxpayer "bailout money" like the parasites at Goldman Sachs, AIG and Citigroup. Shame on America! [Click to enlarge the image to the right](#). Does anyone NOT see the resemblance to **LLOYD BLANKFEIN** from Goldman-Sachs? The satiric image is from Julius Streicher's infamous, anti-Semitic book *The Poison Mushroom*. The word "Börse" means: stock exchange. "Gold" is money. If **BLANKFEIN** put his money into a sack, it would be vastly bigger than the sack in this cartoon. Julius Streicher was convicted as a war criminal at Nuremberg even though he never held a German government position—but, he did mock the Jews and, therefore, had to be hung.

In one of my opening paragraphs above I wrote: "[Holocaust-belief is a form of collective insanity driven by the ravings of unhappy Jews.](#)" In a world where the vast majority of people are non-Jews or *goyim*, any group of people who are as fundamentally racist as the Jews are will always be extremely unhappy and frustrated—and extremely dangerous.

In Defense of [Adolf Hitler](#) (video)

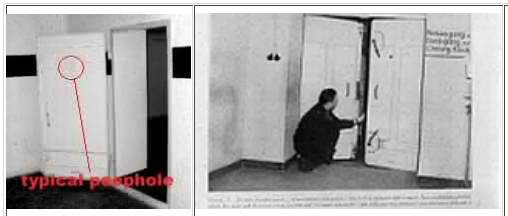

[Tears in Heaven – A Tribute to Adolf Hitler](#) (video)

The monumental blindness and stupidity, unmatched barbarism and sadism of America and Britain nearly brought a new Dark Age upon a world dominated, not by them, but by the Soviet Union and communism. Although the Nazis and fascists lost the war—their heroic struggle with hardly any resources against overwhelming odds allowed civilization to survive. After 1945, it was the atomic bomb, beyond everything else, which allowed the west to survive—but before that, it was **ADOLF HITLER** who saved us.

[NEW The other Face of Adolf Hitler](#) (video) **NEW**

According to Sir Arthur Bryant the British historian *Unfinished Victory* (1940) pp. 136-144:

"It was the Jews with their international affiliations and their hereditary flair for finance who were best able to seize such opportunities. They did so with such effect that, even in November 1938, after five years of anti-Semitic legislation and persecution, they still owned, according to the *Times* correspondent in Berlin, something like a third of the real property in the Reich. Most of it came into their hands during the inflation. But to those who had lost their all this bewildering transfer seemed a monstrous injustice. After prolonged sufferings they had now been deprived of their last possessions. They saw them pass into the hands of strangers, many of whom had not shared their sacrifices and who cared little or nothing for their national standards and traditions. The Jews obtained a wonderful ascendancy in politics, business and the learned professions (in spite of constituting less than one percent of the population. The banks, including the Reichsbank and the big private banks, were practically controlled by them. So were the publishing trade, the cinema, the theatres and a large part of the press all the normal means, in fact, by which public opinion in a civilized country is formed. The largest newspaper combine in the country with a daily circulation of four millions was a Jewish monopoly. Every year it became harder and harder for a gentile to gain or keep a foothold in any privileged occupation. At this time it was not the 'Aryans' who exercised racial discrimination. It was a discrimination that operated without violence. It was exercised by a minority against a majority. There was no persecution, only elimination. It was the contrast between the wealth enjoyed and lavishly displayed by aliens of cosmopolitan tastes, and the poverty and misery of native Germans, that has made anti-Semitism so dangerous and ugly a force in the new Europe. Beggars on horseback are seldom popular, least of all with those whom they have just thrown out of the saddle."

(click on image right to see enlarged view)

Steel, gas-tight bombshelter doors with peepholes for safety—typical of tens of thousands of identical doors throughout German-occupied Europe. At the US Holocaust Museum in Washington DC, the only piece of physical evidence on display was a similar door with a peephole. It proves absolutely nothing when one understands what was really happening. Peepholes were required in all such bombshelter doors according to the German industry standard: *DIN-Vormum 4104*. For more about German bombshelters, especially the gangster doors, see [Index, Page 3](#).

German civilian victims of Allied terror bombing found inside a Hamburg bombshelter. The British dropped the actual bombs, but America, ever since the start of Lend Lease in March 1941 and long before Pearl Harbor, provided the financing for these true atrocities. The British had begun the deliberate bombing of civilian targets in WW1 already in May of 1940. The German response in kind only began after much restraint on September 7, 1940—more than three months later after five separate air attacks on Berlin, and only after numerous German peace proposals were totally rejected by Churchill. The Allied war criminals responsible for this monstrous kind of warfare should have been burned at the stake after the war; that would have been a proper learning experience for such criminals, and an important lesson for all future world leaders everywhere.

The **Go-anywhere CO Poison Gas Generator** on wheels, or on skids, is shown to the right. [Click for an enlarged view](#). This was the device that would have made sense for mass murder if the fiendish Nazis had really wanted to gas people with carbon monoxide. For fuel it burned ordinary woodchips. Note the *Anfachgebläse* (startup blower) on the right which was always present to force ventilate the fire in the generator during start up or anytime later when more gas was needed. That blower with the mere addition of a few feet of stovepipe or hose could have blown highly concentrated and toxic CO gas almost anywhere. For a discussion see: Eckermann, Ernk. 2008. *Fahren mit Holz*. Bielefeld, Delius Klasing Verlag, page 277.

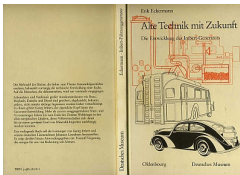

A typical, self-propelled, poison gas generating bus (with up to 35% CO)—**never implicated in mass gassings!!** Thousands of these vehicles were in daily operation in Austria and Germany already before the war. In German, they were called *Holzgaswagen*. In English, they were called "producer gas vehicles." They burned wood chips with a restricted air supply. The result was a highly-combustible gas, principally carbon monoxide, which was also highly toxic. **Producer gas is poison gas! Holzgas ist Giftgas!**

Poison Gas to Go. One of more than 500,000 self-propelled, poison gas generators in German-occupied Europe. The poison gas (with as much as 35% CO) was a necessary alternative to the liquid fuels, mostly synthetic, which were reserved for combat vehicles and aircraft. **HITLER approved!** Each producer gas vehicle could have been easily adapted for mass gassing if there had ever been any such intention. Each generator was equipped with its own **start-up blower (Anfachgebläse)** which normally blew some of the generated gas only to atmosphere—but which could easily have been connected to a hose or stovepipe to fill a jail cell, or barracks, or gas chamber.

Strength through the use of Gas. The logo to the right was used to promote voluntary use of producer gas in early years of war for as long as possible. However, it was already by September of 1942 that all medium and heavy vehicles including all buses throughout German-occupied Europe had to, by law, use only producer gas as fuel. By September of 1943, Reichminister **Albert SPEER** made producer gas use compulsory for all civilian motor vehicles as well, including all trucks and buses. Liquid fuels were prohibited except for military and emergency services. Diesel and gasoline engines at all concentration camps were also driven with the highly toxic, producer gas! The resulting engine exhaust, from diesel or gasoline engines, was harmless in comparison to the fuel itself—and one more reason to reject the "Holocaust" gassing claims. The engines (diesel or gasoline) supposedly used in Poland at the *Aktion Reinhardt* camps (Treblinka, Belzec and Sobibor) to make toxic carbon monoxide for mass murder could have used the fuel instead which was far more toxic than any engine exhaust. That gaseous fuel was even recommended by the government so that liquid fuels could be conserved for the military. Even in America which was literally swimming in gasoline compared to Europe, liquid fuels were strictly rationed to help the war effort.

500,000 Poison Gas Generators on Wheels. The Germans actually used poison gas as a fuel for nearly all civilian motor vehicles as well as many military vehicles—throughout the war in all of their occupied territories including Russia. The best evidence of this is the German wartime literature—but, a recent book *Alle Technik mit Zukunft* from 1986 summarizes the wartime history of the German producer gas technology. One key sentence appears already on its back cover: "**More than 500,000 suction-gas-driven trucks and cars were driven until the end of the Second World War in nearly all European countries...**" The term "suction-gas-driven" refers only to producer gas (Holzgas) vehicles. The primary ingredient in producer gas is carbon monoxide which is highly combustible as well as toxic. For the Nazis to have used diesel exhaust, or even gasoline engine exhaust, as a source of toxic carbon monoxide when the actual fuel they were most likely to use to drive their diesel engines, or gasoline engines, was itself far, far more toxic—containing from 18% to 35% CO—is simply too unbelievable. It never happened! [Click on image for enlarged view](#).

The Startup Ordeal for every Producer Gas Vehicle

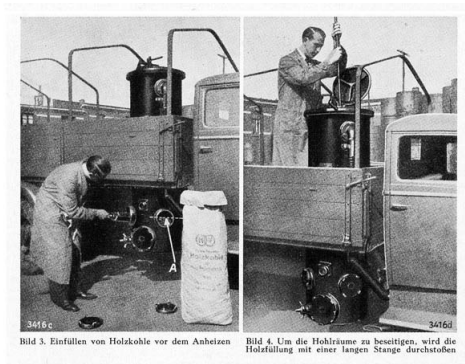

Figure 3 - Adding charcoal prior to startup. Figure 4 - To hollow out the space for the wood, a rod is pushed through to make room

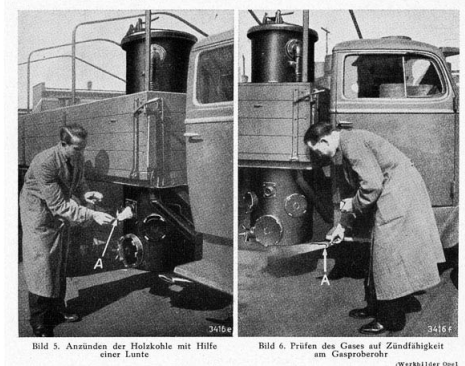

Figure 5 - Igniting the charcoal with a match. Figure 6 - Testing the gas for combustibility at the test pipe opening

The above images are from: "Feste heimische Kraftstoffe für Generatoren (Solid domestic energy sources for Generators)" by Damschke in *ATZ Automobiltechnische Zeitschrift*, 1940 Heft 18, page 456. The same images also appear in Erik Eckerman, *Fahren mit Holz* (Bielefeld: Delius, Klasing & Co. KG, 2008) pages 126 and 128.

The "test pipe opening" (Gasproberohr) is connected directly to the start-up blower (Anfachgebläse) which force-ventilates the entire system at least until the engine starts and force ventilates the system with engine vacuum instead. At that point, the electrically-driven blower is simply turned off with a switch on the vehicle dashboard. However, the blower can be turned on, or off, at will to also blow highly-toxic producer gas through the test opening and on through some hose or stovepipe into any jail cell, or basement, or gas chamber to kill whoever is there. No diesel or gasoline engine would have been needed. Just gas the Jews with the fuel, producer gas—and forget the engine completely.

Because of the toxicity of producer gas—all drivers and people who worked with this technology were repeatedly warned about the dangers. The poster to the right (originally in color) was widely used to tell everyone involved: "**Attention – carbon monoxide – Danger of Poisoning!**" The bottom of the poster goes on: "**Do not start the generator except in the open or else vent gases to the outdoors! Do not refill in enclosed spaces.**" Purchase of the above Safety Poster (Unfallverhütungsbild) in DIN A2 format was recommended in *Der gewerbliche Kraftverkehr*, 1943, Heft 11/12, page 147 for a price of 0.25 RM from the Reichsverband der gewerblichen Berufsgenossenschaften, Berlin-Wilmersdorf, Nikolsburger Platz 4.

In the German technical journal *ATZ Automobiltechnische Zeitschrift*, 1941 Heft 18, p. 449-50 we have an essay entitled: "**Die Gefahr der Kohlenoxydvergiftung beim Generatorbetrieb** (The Danger of CO poisoning through Generator use)." The essay tells us there were 17 fatal cases of CO poisoning in Sweden between December 1939 and March 1941. Ten of those fatalities occurred when generators were started inside closed garages. Four fatalities occurred when the drivers were sitting in their truck cabs as the generator blowers were running. This led to special, strict regulations to ventilate garages, enforced with penalties.

The most [comprehensive discussion](#) (5 MB file-slow download) anywhere appeared after the war in 1954 in German written by Signy ALMGREN about Sweden's wartime problems with CO toxicity from producer gas. From the Almgren essay (page 101) we learn there were 41 fatalities in Sweden from 1939 through 1944 and all this in a country which (page 97) had a total of only about 100,000 producer gas vehicles. For 1942 alone in Sweden (page 101) there were 1106 cases of acute producer gas poisoning and 2858 chronic cases. Within a short time, producer gas poisoning had become the most common industrial illness in the country.

Guidelines for Safety with Gas-generating Vehicles. Each truck driver of the hundreds of thousands of producer gas vehicles in German-occupied Europe was required by law to know just how potentially deadly his fuel was—and was required by law to keep the guidelines (left) with the vehicle registration papers on the vehicle. See [full text](#) with translation. The safety of each vehicle and its cargo, which was often munitions, as well as the driver's own survival depended on strict adherence to the technical guidelines and rules that were also spelled out in numerous publications related to these vehicles. The fuel was potentially explosive as well as toxic. The dangers of explosion are easily controlled, however, since the initial high concentration is diluted instantly below 12% (the explosive lower limit) as soon as it enters a large enough space.

Guidelines for Mass Murder? All one needed for mass murder with CO was well-known to literally hundreds of thousands of people throughout Europe. Would the Nazis involved with diesel or gasoline engines for mass murder at Treblinka, Belzec and Sobibor not have known this as well?

Today, one can find thousands of discussions for the keyword *Holzgaz* with Google "search." However, hardly any of the discussions since WW2 even mention the toxic hazards, ever. By contrast, the German WW2 guidelines for the use of *Holzgaz* already *begin* with a concise description of the toxic dangers and give a stern warning. The first two sentences tell any would-be mass murderer all he needs to know. The first two sentences explain that *Holzgaz* contains as much as 35% carbon monoxide—and that already as little as 0.1% can kill; *Vergiftungsgefahr!* And yet this technology has been implicated in any Holocaust claims. The fiendish Nazis were far more concerned about the toxic dangers of producer gas than anyone else before, during, or since the war—but never, ever used it to kill even one Jew, or gypsy, or anyone. Supposedly, they murdered millions of people with the exhaust of Diesel engines instead. That is unbelievable!

In addition to producer gas, the Germans had the world's most advanced coal gasification technology. One of the first steps was to produce carbon monoxide which he used either as fuel or as an intermediate raw material in the synthesis of other products. The amounts of carbon monoxide generated were enormous. Please note in the above figure the words **"PLUS CARBON MONOXIDE"** which show that the CO in combination with hydrogen was one of the basic feedstuffs for the Fischer-Tropsch plants to make diesel and motor fuels, or to make methanol and many explosives. The figure is from *German war economy: the motorization myth* edited by W. Victor Maderj, 1984, page 119 based on the United States Strategic Bombing Survey, *The German Oil Industry*. The following postwar statement by some of America's leading experts on German industry summarized the situation:

"War-time Germany was an empire built on coal, air and water. 84.5% of her aviation fuel, 85% of her motor fuel, more than 99% of all her rubber, 100% of her concentrated nitric acid — the base substance for all military explosives — and 99% of her no less important methanol were synthesized from these three raw materials. ... Coal gasification facilities, where coal was converted into producer gas, were the body of this industrial organism." from: U.S. Strategic Bombing Survey, *Oil Division Final Report*, War Department, Washington, D.C. 1947, page 1.

Because of Germany's isolation from adequate sources of petroleum and natural rubber, she had already converted much of her industry during World War One to use coal as a substitute source of hydrocarbons for making synthetic liquid fuels as well as a vast assortment of chemical substances, including synthetic rubber. Millions of tons of carbon monoxide were produced as part of this technology and would have been more than enough to kill the entire population of Europe many times over. Auschwitz's Monowitz plant could have easily provided almost unlimited amounts of CO to Auschwitz-Birkenau through a small pipeline—but, CO has never been implicated in any murders there. Cyanide and Zyklon-B were supposedly used there instead.

Berlin 1950
Hans Paul Wurm, Dresden 1. Schuljahr 1950

2. A photostatic copy of the voluntary confession signed by Rudolf Hoess admitting to the murder of some two million people during his two and a half year tenure as commandant of Auschwitz. (Courtesy UPI)

Statement made voluntarily at Gestapo
by Rudolf Hoess, former commandant of
Auschwitz (concentration camp), on 11 May 1946

I personally arranged on orders received from Himmler
in May 1941 the gassing of two million persons between
January 1941 and the end of 1945 during which
time I was commandant of Auschwitz.

signed
Rudolf Hoess
11-5-1946
H. Hoess, Auschwitz, Germany

Manufactured Evidence as a result of Torture. The above appeared after the "Forward" in the 1960 (hardcover) first edition of *Auschwitz* by Dr. MIKLOS NYIZSLI. Although the signature with title and rank of RUDOLF HOESS may well be genuine, the text of his outlined "confession statement" is in English and clearly in a different handwriting. No doubt, United Press International was quite proud of itself when it distributed this "scoop" world-wide to its wire service subscribers. Here was all the proof needed to convince the world that HOESS had "personally arranged on orders received from Himmler in May 1941 the gassing of two million persons between June/July 1941 and the end of 1945 during which time I [Hoess] was commandant of Auschwitz." This "voluntary evidence" from March 1946 was obviously manufactured so as to condemn HEINRICH HIMMLER as well.

For more info about the torture of Rudolf Hoess see the work of Joe Belling and the [discussion](#) on the CODOH Revisionist Forum. See also the [essay](#) by Robert Faurisson on just how Hoess was tortured and by whom.

The "confession" (left) from May, 1946 expands on the earlier "confession" of March, 1946 by adding 1/2 million more who were killed by other means. But here is also the additional claim that the 2 million who were supposedly gassed were Jews. The earlier "confession" while in British custody merely mentioned "persons." Josef P. Maier who witnessed the May confession and signed the bottom of the page was Jewish and an active member of the so-called "Frankfurt School" of extreme leftist Jewish fanatic émigrés which included characters like Herbert Marcuse (OSS during the war and CIA after the war). Maier's signature is followed by his title: "Chief, Analysis Section Interrogations Division, Office of U.S. Chief of Counsel." That office was overwhelmingly Jewish and the results of their "investigations" are precisely as one should expect: Jews, far above all others, were the victims of the alleged Nazi genocide. But the "proof" amounted to essentially nothing more than "eyewitness testimony" and manufactured "confessions" such as the ones above.

For more information about Marcuse and Maier, please see [the discussion on the CODOH Forum](#). For the connections of Maier to peculiarly Jewish political causes already before the war, see the [essay](#) by Judith Marcus. Just as Arthur Butz and others have shown, the International Military Tribunal at Nuremberg was far from "international" but rather, it was a carefully stacked and staged Jewish tribunal of the hapless German defendants and the broken German nation. In hindsight, the trials themselves show that when the Nazis had put creatures such as Maier and Marcuse in concentration camps, they certainly had the right idea.

Ich habe die ersten 1000
KZler im Jahr 1941 bei 1941
erhalten. Meine Aufgabe war es, die
KZler zu erhalten und zu
verwalten. Ich habe die ersten 1000
KZler erhalten.

14. 5. 1946

at Nuremberg, Germany, on May 14, 1946.

Joseph P. Maier
Chief, Analysis Section
Interrogations Division
Office of U.S. Chief of Counsel

The great depth of Jewish involvement at the most critical levels of the Nuremberg Trials was a major point in Arthur Butz's *The Hoax of the Twentieth Century* which included many revelations about Col. David (Mickey) Marcus. Butz's work and conclusions regarding Marcus are supported by a [Wikipedia essay](#) about Marcus's life. That Jewish involvement would be comparable to trying to conduct fair trials today of alleged Serbian war criminals with Bosnian Muslims in all the key organizational positions for the trials. Judge Charles Wenster's nearly suppressed attack on the Nuremberg proceedings in Case 7 seems appropriate in general. It appears on pages 26 and 27 of Arthur Butz's excellent book.

The following text from Adolf Hitler appears in a German school textbook entitled *Die verlorene Insel: Das Gesicht des heutigen Englands*. (The Lost Island: The face of today's England) editor unknown, published by Volk und Reich Verlag sometime after December 1940. Hitler's criticism of "democracy" is so timely because of the ongoing world-wide protests today against Wall Street and the powerful 1% over the 99% who are being impoverished and ruined—not even their homes are safe or secure. For those who still cannot read German, learn German or be patient.

THE ENGLISH WORLD

... In dieser englisch-französischen Welt da existiert die sogenannte Demokratie. ... Es heisst, dass das die Herrschaft des Volkes sei. Nun muss das Volk ja doch irgendeine Möglichkeit besitzen, seinen Gedanken oder seinen Wünschen Ausdruck zu geben. Wenn man sich nun näher dieses Problem ansieht, dann kann man feststellen, dass das Volk an sich primär dort gar keine Überzeugung hat, sondern die Überzeugung selbstverständlich — wie übrigens überall — vorgesetzt erhält. Und das Entscheidende ist nun: Wer setzt diese Überzeugung eines Volkes fest? Wer klärt ein Volk auf, wer bildet ein Volk? In diesen Ländern regiert tatsächlich das Kapital, d.h. es ist eine Schar von einigen hundert Menschen letzten Endes, die im Besitz unermesslicher Vermögen sind und die infolge der eigenartigen Konstruktion des Staatslebens dort mehr oder weniger unabhängig und frei sind. Denn es heisst: "Wir haben hier Freiheit", und sie meinen damit vor allem freie Wirtschaft, und unter freier Wirtschaft verstehen sie die Freiheit, Kapital nicht nur zu erwerben, sondern vor allem Kapital wieder frei zu verwenden, frei zu sein von jeder staatlichen, d.h. volklichen Aufsicht. Das ist in Wirklichkeit der Begriff ihrer Freiheit. ...

... Nun müsste man doch meinen, dass vor allem in diesen Ländern der Freiheit und des Reichtums ein unerhörtes Wohlbefinden für das Volk bestehen müsste. Es ist aber umgekehrt. In diesen Ländern ist die Not der breiten Massen grösser als irgendwo anders. Da ist dieses reiche England: 40 Millionen Quadratkilometer werden von ihm kontrolliert, 100 Millionen kolonialer Arbeiter mit einem erbärmlichen Lebensstandard in Indien z.B. müssen dafür tätig sein. Man müsste nun meinen, in diesem England selbst da muss dann wenigstens doch jeder einzelne Teilhaber an diesem Reichtum sein. Im Gegenteil: in diesen Ländern ist der Klassenunterschied der krassste, den man sich denken kann. Armut, unvorstellbare Armut auf der einen Seite und auf der anderen Seite ebenso unvorstellbarer Reichtum. Sie haben nicht ein Problem gelöst! Das sind

Länder, die über die Schätze der Erde verfügen und ihre Arbeiter die hausen in erbärmlichen Löchern, Länder die über die Bodenschätze der Welt verfügen und die breite Masse ist miserabel gekleidet; Länder, die mehr al genügend an Brot und an alien sonstigen Früchten haben könnten, und Millionen ihrer unteren Schichten habe nicht genug, um sich nur den Magen einmal voll zu füllen, laufen verhungert herum. Leute, die auf der einen Seite es fertigbringen könnten, eine Welt mit Arbeit zu versehen, müssen es erleben, dass sie nicht einmal mit der Erwerbslosigkeit in ihrem eigenen Lande aufräumen können!..."

..... Aber es ist auch verständlich: in diesen Ländern der sogenannten Demokratie wird ja überhaupt gar nicht das Volk in den Mittelpunkt der Betrachtung gerückt. Was entscheidend ist, ist ausschliesslich die Existenz dieser paar Macher der Demokratie, d.h. also die Existenz dieser paar hundert gigan"tischen Kapitalisten, die im Besitz ihrer Werte und ihrer ganzen Aktien sind und die letzten Endes damit diese Völker ausschliesslich dirigieren. Die breite Masse interessiert sie nicht im geringsten. Die interessiert sie genau wie früher unsere bürgerlichen Parteien nur in der Wahlzeit. Dann brauchen sie. Stimmen. Sonst ist ihnen das Leben der breiten Masse vollkommen gleichgültig ..."

Der Führer in seiner Rede an die deutschen Rüstungsarbeiter am 10. Dezember 1940, nach dem Bericht des „Völkischen Beobachters“

Englands Aufstieg zur Weltmacht begann, als das Reich im Herzen Europas zerfiel und der Kontinent Jahrhunderte hindurch in blutigen Kriegen zerrissen wurde. Während England mit Hilfe seiner Flotte Länder jenseits der Weltmeere auf alien Kontinenten eroberte und Länder mit unerschöpflichen Rohstoffen und Stützpunkte zum britischen Weltreich vereinigte, schürte das Inselreich Hass und Feindschaft zwischen den Völkern und Staaten Europas, spielte ein Volk gegen das andere aus, um sich um so leichter die Vormachtstellung im europäischen Kräftespiel sichern zu können. England hat dabei nie das eigene Leben auf Spiel gesetzt. Es hat die von ihm heraufbeschworenen Kriege immer durch fremde Völker führen lassen. Während die Völker für britische Interessen verbluteten, erschlích sich die englische Führung ungeheuren Reichtum und baute eine Machtstellung aus, mit deren zweckbewusster Anwendung einem grossen Teil Europas auch das korrupte englische Geistesgut aufgezwungen wurde. Die bequeme Führerstellung des englischen Adels, der mit Handel und Börse, Unternehmertum und Spekulanten auf das engste verwandt und verfilzt war, wurde auch dem eigenen englischen Volk gegenüber zu einem hartnäckig verteidigten Lebensanspruch. In dem kapitalistischen Zeitalter, das die herrschende britische Plutokratenschicht heraufführte, verkümmerte und verrottete der Sinn dafür, dass die Macht eines Weltreiches nur Bann auf die Dauer gehalten werden kann, wenn sie von der Kraft eines jungen, von gemeinsamen Idealen befühlten Volkes genährt wird. Auf der britischen Insel, aus deren Geborgenheit heraus die herrschende Gesellschaftsschicht das grosse Wirtschaftsunternehmen des Weltreiches lenkte und regierte, verfiel zur gleichen Zeit die Fruchtbarkeit des breiten Landes, starb das Bauerntum mehr und mehr aus, bildete sich in de grossen Städten ein Proletariat, das kümmerlicher dahinvegetierte als in alien anderen Ländern des europäischen Festlandes.

Als in der zweiten Hälfte des 19. Jahrhunderts neben England neue Weltmächte heranwuchsen und damit die Alleinherrschaft des britischen Weltreiches in Frage gestellt wurde, verlor die britische Führung bald die Sicherheit des Instinktes, mit dem frühere Generationen das Weltreich aufgebaut hatten. Sie kannte nur noch das eine Ziel, mit allen Mitteln, und sei es auch mit den blutigsten und weltumspannendsten Kriegen, die jemal über die Erde dahingegangen waren, ihre Besitzungen und Stützpunkte und damit ihren Reichtum zu erhalten und zu sichern. Sie geriet sich in der Rolle des Besitzenden, dessen einziges Ideal der Besitz selbst geworden ist, und sie vergass darüber das eigene Volk und die Völker der Erde, die auf die Dauer nicht gewillt waren, diesem Anspruch ihr Lebensrecht zu opfern.

Die englische Plutokratie hat die Zeichen der Zeit nicht verstanden. Sie will auch heute noch nicht sehen, dass die jungen Völker die Bannerträger der sozialen Zukunft der Menschheit sind. Durch einen neuen Krieg versuchte England, die Verwirklichung der Lebensrechte des deutschen wie des italienischen Volkes zu verhindern, zweier Völker, die nun ihren Existenzkampf mit der Kraft und der Zuversicht des Sieges führen. Die Heere der Achse haben England auf dem Kontinent in gewaltigen Schlachten geschlagen und vom Nordkap bis zur Biscaya eine einzige Front gegen die britische Insel aufgerichtet. In ihrem Schutz reift das neu Europa heran, wächst das Gefühl der Gemeinschaft der europäischen Völker, deren sozialer Gedanke sich deutlich abhebt gegenüber dem Herrschaftsanspruch der britischen Oberschicht. Noch ist der Kampf im vollen Gange, Schlag auf Schlag trifft die britische Insel zu Wasser und aus der Luft. Auf den Schlichtefeldern des Ostens verliert England auch seinen letzten Festlandsdegen. Die deutsche Wehrmacht vernichtet in einem gigantischen Ringen den bolschewistischen Weltfeind, während sich die Herrschaftsschicht des wankenden britischen Weltreiches mit ihm verbündet und verbrüdet und damit ihr wahres Gesicht enthüllt. Unter den militärischen Schlägen im Osten und auf dem Atlantik zerbricht eine morsche, verlogene Welt. England ist ein verlorene Insel. Erschauend ahnt das verblendete, von seinen Machthabern verführte Volk, dass sich sein Schicksal erfüllt. Während die britische Macht dahinsinkt, erhellet das erste Wetterleuchten eines neuen Jahrtausends europäischer Geschichte den Kontinent.

Die Insel England ist ein von Natur begünstigtes Land. Durch seine Lage am Rande der europäischen Welt un an den Toren zum Atlantischen Weltmeer hat es Jahrhunderte lang eine beherrschende Mittlerrolle gespielt. Die Küsten der Insel sind reich gegliedert und boten Gelegenheit zur Errichtung vortrefflicher Häfen. So wurden die Engländer ein seefahrendes Volk, das aus allen Erdteilen, aus seinen endlosen Besitzungen in Übersee, grosse Schätze heimbrachte und in seiner Inselheimat einen Reichtum hoher alter Kultur in stolzen Städten, herrlichen Bauten, aber auch im Denken und Dichten schuf und erwarb. Handel und Industrie standen bis zum heutigen Tage in Blüte, und in vielen Zweigen der modernen Industrie hatten die Engländer lange Zeit eine führende Stellung.

Und doch ist England ein armes Land! Was nützt dem englischen Volk alter Reichtum, alle Schönheit des Landes, alles Erbe alter Kultur, wenn es in seiner Gesamtheit keinen Anteil daran hat, wenn es geführt und beherrscht wird von einer kleinen Schicht von Menschen, die nur einseitig ihren eigenen unermesslichen Reichtum, ihre Macht und ihr Wohlleben im Auge haben. Ihr hartherziger, egoistischer Herrschaftsanspruch bestimmt das Bild des englischen Landes und Lebens. Es ist das Bild einer versinkenden Welt — der verlorenen Insel.

Die Insel vor Europa

DAS DEUTSCHE ZIEL

„ . . . In unseren Augen ist das Gold überhaupt kein Wertfaktor, sondern nur ein Faktor zur Unterdrückung und Beherrschung der Völker. Ich habe, als ich zur Macht kam, nur eine einzige Hoffnung besessen, auf die ich baute: Das war die Tüchtigkeit, die Fähigkeit des deutschen Volkes und des deutschen Arbeiters, die Intelligen unserer Erfinder, unserer Ingenieure, unserer Techniker und Chemiker und so weiter. Auf die Kraft, die in unserer Wirtschaft lebt, habe ich gebaut. Ich stand vor der einfachen Frage, sollen wir denn zugrunde gehen, weil wir kein Gold haben, soil ich mich an einen Wahn hängen, der uns vernichtet? Ich habe die andere Auffassung vertreten. Wenn wir schon kein Gold haben, dann haben wir die Arbeitskraft. Und die deutsche Arbeitskraft, das ist unser Gold und unser Kapital, und mit diesem Gold schlage ich jede andere Macht der Welt . . .“

„ . . . Uns schwebt ein Staat vor, in dem in Zukunft jede Stelle vom fähigsten Sohn unseres Volkes besetzt sein soli, ganz gleichgültig, wo er herkommt. Ein Staat, in dem die Geburt gar nichts ist und Leistung und Konnen alles! Das ist unser Ideal, für das wir nun arbeiten und für das wir uns mit unserem ganzen Fanatismus einsetzen, es ist für uns, ich darf sagen, dies die schönste Glückseligkeit. Das ist die grösste Freude auf dieser Welt, die uns gegeben werden könnte . . .“

„ . . . Ich habe den Ehrgeiz, das deutsche Volk reich, das deutsche Land schön zu machen. Ich möchte, dass der Lebensstandard des Einzelnen gehoben wird. Ich möchte, dass wir die schönste und beste Kultur bekommen. Ich möchte, dass das Theater für das ganze Volk und nicht nur für die oberen Zehntausend, wie in England, da ist und überhaupt die ganze deutsche Kultur dem Volke zugute kommt ...“

„ . . . Wenn dieser Krieg abgeschlossen sein wird, dann soll in Deutschland ein grosses Schaffen beginnen, dann wird ein grosses „Wacht auf!“ durch die deutschen Lande ertönen. Dann wird das deutsche Volk die Fabrikatio der Kanonen einstellen und wird dann beginnen mit den Werken des Friedens und der neuen Aufbaubarbeit für die Millionenmassen! Dann werden wir erst der Welt zeigen, was in Wirklichkeit der Herr ist und wer der Herr ist: Kapital oder Arbeit! Und dann wird aus dieser Arbeit jenes grosse deutsche Reich erstehen, von dem einst ein grosser Dichter träumte. Es wird das Deutschland sein, dem jeder Sohn mit fanatischer Liebe anhängt, well es auch für den Ärmsten die Heimat sein wird . . .“

Der Führer in seiner Rede an die deutschen Rüstungsarbeiter am 10. Dezember 1940, nach dem Bericht des „Völkischen Beobachters“
